Thicker Than Water Essays By Adult Siblings Of People With Disabilities:

Thicker Than Water Donald Joseph Meyer, 2009 Reveals both positive and negative aspects of growing up with someone who might have received the lion's share of his parents' attention or who now requires extra support as an adult. This book is suitable for siblings, parents, caregivers, and those who share a long-term relationship with a person with special needs. **A Spectrum of Solutions for Clients with Autism** Rachel Bedard, Lorna Hecker, 2020-07-29 This book is a comprehensive resource to guide work with individuals on the autism spectrum. It reflects the true range of needs presented by individuals with autism, pulling together the most salient aspects of treatment with invaluable information from several disciplines synthesized to guide your work. Divided into topical sections with chapters from three field experts in each, this book features contributions from therapists, educators, and medical doctors, as well as financial planners, health advocates, and innovators. The diverse disciplines and backgrounds of each author lend a different voice and perspective to each chapter, reflecting the continuum of care necessary when working with clientele on the autism spectrum and that for clients on the spectrum, one solution does not fit all. For use by psychotherapists, counselors, applied behavioral analysts, occupational therapists, social workers, teachers, and more, this text presents readers with expertise from various contributing disciplines to give them a treatment resource that can inform and guide their daily work with clients on the autism spectrum. **Parents and Families of Students With Special Needs** Vicki A. McGinley, Melina Alexander, 2017-01-05 *Parents and Families of Students With Special Needs: Collaborating Across the Age Span* teaches students the skills they need to effectively collaborate with parents and families to ensure a child's success in the classroom. Authors Vicki A. McGinley and Melina Alexander's text takes a lifespan approach with a special emphasis on the critical transition points in a child's life. Information is provided on what can be seen at each stage of an individual with disabilities' development and addresses concerns and needs that families may have during these unique phases of growth. Chapters written by professors and professionals who are also parents of students with special needs bring a diverse range of voices into the narrative. The authors provide an in-depth discussion of how parents and families are affected by particular disabilities, family system theory, the laws that affect individuals with disabilities, and assessments for individuals with disabilities. **Siblings and Autism** Debra Cumberland, Bruce Mills, 2010-06-15 In this collection of personal accounts, siblings from a variety of backgrounds share their experiences of growing up with a brother or sister with autism. They show that certain things are common to the sibling experience: being overlooked, accommodating resentment and helplessness, and the yearning to connect across neurological difference. *Social Work Practice Across Disability* Juliet Rothman, 2018-03-13 This book will help prepare the reader to work across disabilities by providing knowledge and training grounded within the ecological framework in four principal areas. The four principal areas the reader will be trained in are the societal environment and disability, disability and the individual experience, essential skills for social work micro, mezzo, and macro practice with people with disabilities, and the

resource and support network for persons with disabilities The book is organized around four units each of which addresses one of the areas noted It is not the purpose of this book to enable the reader to gain expertise in any one disabling condition or impairment Rather the goal is to provide a broad base of knowledge and skills which will enable the reader to work effectively across a variety of disabling conditions Special educators social workers parents *Lessons from a Complex Child* Ellen Woodbriar,2020-09-21 At twenty nine months my son Jackson had met all of his developmental milestones He spoke in full sentences knew his ABCs and colors had well developed fine and gross motor skills was affectionate had perfect eye contact loved to talk and was extremely social Six months later just after Jackson s third birthday neurologists couldn t rule out that he might have a malignant form of epilepsy some form of neurodegenerative disorder have regressive encephalopathy be autistic or have a pervasive developmental disorder PDD What could possibly have caused the regression he experienced over a four month period the irritability he was exhibiting the sixty to eighty seizures he was enduring each day and the autistic like behaviors he had developed Although I m not a physician and don t work in the healthcare profession I have lived through the regression and recovery of my own child This experience has led me to form the opinion that potentially too many children are being put on the autism spectrum Some children like Jackson with ASD like symptoms are not autistic and therefore are not receiving the full breadth of intervention that could potentially help them recover Do I have proof of this No because from my experience and up until this point there has not been enough research that the medical profession recognizes as reliable made available to the public or to parents like me to identify the root cause of some symptoms The purpose of my telling this story is not to give anyone or any family false hope but with good reason to encourage you to leave no stone unturned in treating a medically complex child It takes passionate determination and tenacity to find underlying and seemingly hidden causes of complex illnesses and to see the journey through to recovery when possible **How to Be a Sister: A Love Story with a Twist of Autism** Eileen Garvin,2010-04-01 The first book by acclaimed author Eileen Garvin her deeply felt impeccably written memoir *How to Be a Sister* will speak to siblings parents friends and teachers of people with autism and to anyone who sometimes struggles to connect with someone difficult or different Eileen Garvin s older sister Margaret was diagnosed with severe autism at age three Growing up alongside Margaret wasn t easy Eileen often found herself in situations that were simultaneously awkward hilarious and heartbreaking For example losing a blue plastic hairbrush could leave Margaret inconsolable for hours and a quiet Sunday Mass might provoke an outburst of laughter swearing or dancing *How to Be a Sister* begins when Eileen after several years in New Mexico has just moved back to the Pacific Northwest where she grew up Being 1 600 miles away had allowed Eileen to avoid the question that has dogged her since birth What is she going to do about Margaret Now Eileen must grapple with this question once again as she tentatively tries to reconnect with Margaret How can she have a relationship with someone who can t drive send email or telephone What role will Eileen play in Margaret s life as their parents age and after they die Will

she remain in Margaret's life or walk away A deeply felt impeccably written memoir *How to Be a Sister* will speak to siblings parents friends and teachers of people with autism and to anyone who sometimes struggles to connect with someone difficult or different
