Moral Education Forum *The Self Beyond Itself* Heidi M. Ravven, 2014-09-16 Intertwines history philosophy and science A powerful challenge to conventional notions of individual responsibility Publishers Weekly Few concepts are more unshakable in our culture than free will the idea that individuals are fundamentally in control of the decisions they make good or bad And yet the latest research about how the brain functions seems to point in the opposite direction In a work of breathtaking intellectual sweep and erudition Heidi M Ravven offers a riveting and accessible review of cutting edge neuroscientific research into the brain's capacity for decision making from

mirror neurons and self mapping to surprising new understandings of group psychology The Self Beyond Itself also introduces readers to a rich alternative philosophical tradition of ethics rooted in the writing of Baruch Spinoza that finds uncanny confirmation in modern science Illustrating the results of today s research with real life examples taking readers from elementary school classrooms to Nazi concentration camps Ravven demonstrates that it is possible to build a theory of ethics that doesn t rely on free will yet still holds both individuals and groups responsible for the decisions that help create a good society The Self Beyond Itself is that rare book that injects new ideas into an old debate and an important contribution to the development of our thinking about morality Washington Independent Review of Books An intellectual hand grenade A magisterial survey of how contemporary neuroscience supports a vision of human morality which puts it squarely on the same plane as other natural phenomena William D Casebeer author of Natural Ethical Facts **Speaking of Teaching** Gabriel Moran,2010-02-01 Speaking of Teaching Lessons from History focuses on teaching as a fundamental act of all human beings viewing the question of teaching through the lens of five famous thinkers and two contemporary problems Moran argues that teaching is not given the attention that it deserves and proposes to situate school teaching in the context of many forms of teaching Tracing the history of the idea of teaching from Socrates to Wittgenstein in the first several chapters this book also examines the intricacies of teaching morality and religion showcasing society s ambivalence about teaching

Conversations with Educational Leaders Anne Turnbaugh Lockwood,1997-03-13 Educational leaders speak out in their own words stimulating accessible provocative on contemporary and controversial topics that range from differing attitudes on diversity to the debate over character education to arguments about education reform Character Deborah L. Rhode,2019-08-02 As Deborah L Rhode explains in this wide ranging work the American public has long insisted on the central importance of character but has failed to adequately nurture and sustain it in families schools law and politics All too often our understandings of character are out of step with psychological research and fundamental values *The Construction of Children's Character* Alex Molnar,1997 This volume provides an analysis of approaches to moral education in the 1960s and 1970s and then moves to a description and analysis of more contemporary efforts that characterize the current movement for character education It becomes clear however that the current movement is a misnomer for there are marked differences today among those who are concerned with the moral and character development of children And there are others who are critical of the idea that schools should be involved in character education at all **The Death of Character** James Davison Hunter,2008-01-04 The Death of Character is a broad historical sociological and cultural inquiry into the moral life and moral education of young Americans based upon a huge empirical study of the children themselves The children s thoughts and concerns expressed here in their own words shed a whole new light on what we can expect from moral education Targeting new theories of education and the prominence of psychology over moral instruction Hunter analyzes the making of a new cultural narcissism *How to Raise Kind Kids* Thomas Lickona,2018-04-10 Can you teach a

child to be kind This vital question is taking on a new urgency as our culture grows ever more abrasive and divided We all want our kids to be kind But that is not the same as knowing what to do when you catch your son being unkind A world renowned developmental psychologist Dr Thomas Lickona has led the character education movement in schools for forty years Now he shares with parents the vital tools they need to bring peace and foster cooperation at home Kindness doesn't stand on its own It needs a supporting cast of other essential virtues like courage self control respect and gratitude With concrete examples drawn from the many families Dr Lickona has worked with over the years and clear tips you can act on tonight How to Raise Kind Kids will help you give and get respect hold family meetings to tackle persistent problems discipline in a way that builds character and improve the dynamic of your relationship with your children while putting them on the path to a happier and more fulfilling life
