Plagued by Fire Paul Hendrickson, 2019 From the award winning and nationally best selling author of Hemingway s *Boat and Sons* of Mississippi an illuminating pathbreaking biography that will change the way we understand the life mind and work of the premier American architect Frank Lloyd Wright has long been known as a rank egotist who held in contempt almost everything aside from his own genius Harder to detect but no less real is a Wright who fully understood and suffered from the choices he made This is the Wright whom Paul Hendrickson reveals in this masterful biography the Wright who was haunted by his father about whom he told the greatest lie of his life And this we see is the Wright of many other neglected aspects of his story his close and perhaps romantic relationship with friend and early mentor Cecil Corwin the eerie unmistakable role of fires in his life the connection between the Tulsa Race Riot of 1921 and the murder of his mistress her two children and four others at his beloved Wisconsin home by a black servant gone mad In showing us Wright s facades along with their cracks Hendrickson helps us form a fresh deep and more human understanding of the man With prodigious research unique vision and his ability to make sense of a life in ways at once unexpected poetic and undeniably brilliant he has given us the defining book on Wright

Translucent Building Skins Scott Murray, 2013-05-07 Exploring the design of innovative building enclosure systems or skins in contemporary architecture and their precedents in earlier twentieth century modern architecture this book examines the tectonics the history and the influence of translucency as a defining characteristic in architecture Highly illustrated throughout with drawings and full colour photographs the book shows that translucency has been and continues to be a fertile ground for architectural experimentation Each chapter presents a comparative analysis of two primary buildings a recent project paired with a historical precedent highlighting how architects in different eras have realized the distinctive effects of translucency The included buildings span a variety of program types ranging from a single family residence to a factory to a synagogue Whether it is Pierre Chareau s glass lens curtain wall at the Maison de Verre Frank Lloyd Wright s wall of stacked glass tubes at the Johnson Wax Research Tower or Peter Zumthor s use of acid etched glass in a double skin envelope at the Kunsthau Bregenz the included projects each offer an exemplary case study of innovations in materiality and fabrication techniques Today among many contemporary architects there is an engagement with new technologies new material assemblies and new priorities such as sustainability and energy efficiency A

resurgent interest in translucency as a defining quality in buildings has been an important part of this recent dialogue and this book makes essential reading for any architect looking to incorporate aspects of translucency into their buildings
