Vrouw En Maatschappij:

De vrouw in de maatschappij Silvia, 1888 **De vrouw beslist** Vilan van de Loo, 2005 Geschiedenis van het feminisme en de vrouwenemancipatie in de jaren zestig en zeventig in Nederland **In de opleiding der vrouwen ligt de toekomst der maatschappij**, 1872 **De Vrouw, de vrouwenbeweging en het vrouwenvraagstuk** C. M. Werker-Beaujon, Clara Wichmann, W. H. M. Werker, 1914 N 14 met oranje linnen band is een Editie voor de Ned Ver van Huisvrouwen *De vrouw en het Socialisme* August Ferdinand Bebel, 1897 Mensch en maatschappij, 1926 De vrouw en het socialisme (De vrouw in het verleden, in het heden en in de toekomst), benevens August Bebel, Sophie Nadejde, Paul Lafargue, Clara Zetkin, Aloys Petzler, 1891 **De opvoeding der vrouw** Constant, 1876 **Nationale Tentoonstelling van Vrouwenarbeid**, 1898 De vrouw F. van Goudoever, 1889 **The dynamics of feminisation** Natalie Verelst, 2025-08-14 In this book feminisation the marking of female sex on personal nouns in Dutch and German is investigated contrastively diachronically and corpus linguistically The corpus based approach entails a theoretical and methodological shift from a structuralist and essentialist approach to the interplay of language and sex to a poststructuralist usage based and holistic perspective which has long been lacking from the scientific domain of Gender Linguistics Starting from the observation that feminising morphology seems less frequently used in Dutch than in German in the same contexts the goal is to examine how intra and extralinguistic factors influence the choice for or against the use of these morphological patterns These only partly consciously made choices are called differentiation and neutralisation respectively On the intralinguistic level the link between the use of feminising morphology and properties of the grammatical gender system is investigated contrastively and diachronically as well as more generally various semantic and pragmatic factors semantics of the personal noun animacy referentiality that may contribute to a more or less stable feminisation system On the extralinguistic level the effect of diverging views on gender fair language use in both language areas and within the respective areas North vs South for Dutch East vs West for German stands out Drawing on diachronic corpus data the effects of these factors are investigated empirically in three case studies by focusing on the form Case Study I and function Case Study II feminisation in human reference and Case Study III feminisation in nonhuman reference of feminising morphology Both formally and functionally Dutch feminisation is a complex system whereas the German one is more uniform and straightforward The use of feminising morphology in Dutch has been restricted since at least the second half of the 20th century but less so in Northern than in Southern Belgian Dutch By contrast the tendency in German goes toward the consolidation of the feminisation system in all semantically female contexts with the exception of language use in former East German newspapers Furthermore as opposed to the Dutch feminisation system the German system has taken on inflectional properties known as inherent inflection the marking of which is semantically motivated Examples of the use of feminising morphology in nonhuman reference fit in this analysis as well e g die Partei als Gewinnerin the party as the winner fem Significant impacting factors in the reduction of a

feminisation system are indeed the gender system feminisation is connected with a preserved masculine feminine gender distinction present in German but not in Dutch referentiality feminisation is an important referent tracking instrument and therefore more likely found in referential contexts semantics in the case of reduction of feminisation remnants of the system are observed in semantic contexts which foreground social gender the newness of a personal noun in a language neutralisation of new nouns is more common than neutralisation of long established nouns and the influence of language policy the Dutch feminisation system as well as the use of feminising morphology in the former GDR has been subject to a significant effect of conscious neutralisation strategies as a means of gender fair language use *De geschiktheid der vrouw voor de uitoefening der geleerde beroepen* ,1899 **Rederijkers weekblad** , **De vrouw en het socialisme** August Bebel,1896 **Transnational Feminism in Non-English Speaking Europe, c.1960-1990** Agnes Andeweg,Heidi Kurvinen,2024-12-27 This edited collection aims to look beyond established narratives of feminist history by focusing on non English speaking European countries Recent scholarship on the history of the women s liberation movement in individual countries has enhanced our understanding of the importance of transnational influences in the history of European feminism and problematised the periodisation of feminisms Additionally the translation of feminist practices and texts have received interest during the past years Despite this work the United States and to a lesser extent the United Kingdom are still the main points of reference in histories of post war feminism This book asks what happens to the picture if we place non English speaking European countries in the centre Using Lucy Delap s concept of mosaic feminism its contributors emphasise the variety of patterns that women s feminist organising showed in different cultural contexts despite similarities in their ideological corner stones *De Hollandsche lelie* ,1888 *Enquête, gehouden door de Staatscommissie, benoemd krachtens de Wet van 19 januari 1890 (Staatsblad no. 1)* ,1890 **Nijhoff's index op Nederlandse en Vlaamse periodieken** ,1913 *Stemmen voor waarheid en vrede* ,1885 **Ken u zelve!** Samuel Smiles,1872
