Woodstock Handmade Houses Robert Haney (architektura), David Ballantine (architektura), 1975 *Woodstock Handmade Houses* Robert Haney, 1976 *Remembering Woodstock* Richard Heppner, 2008-10-10 From the early pioneering days to the establishment of one of the premier art colonies in the nation these are the stories of one of America's most famous small towns Beneath the gentle slopes of Overlook Mountain lies the town of Woodstock a thriving community of painters musicians and craftsmen The town's early history of wintry hardships courageous settlers and rebellious farmers sets the stage for a saga of spirited and creative personalities As this energetic individualism carried over into the twentieth century the sounds of cow horns and tin pails gave way to the bacchanalian revelry of Maverick music festivals and the wailing guitar of Bob Dylan The first hippie came to town in 1963 and within a few years this Colony of the Arts was swept up by the counterculture movement of the 60s In this collection of essays from the Historical Society of Woodstock archives Richard Heppner captures the unique spirit of Woodstock where the individual is always welcome and new and creative beginnings are always possible

French Encounters with the American Counterculture 1960-1980 Caroline Maniaque-Benton, 2016-12-05 French American interrelationships in the areas of design and creative thinking have been under acknowledged It is normally asserted that French architects looked to North America for technical lessons in the development of modern architecture in the 1960s but that the French cultural environment was generally hostile to American ideas This book includes interviews with French architects who visited the United States in the 1960s 1970s and then assumed influential positions in the press and education in France Some of these architects found in non mainstream America and its radical groups of architectural drop outs a liberating force free of the taint of American capitalism and the high investment technology Often living in alternative student communities they saw highly innovative low cost technical and structural systems placed in the service of collective forms of living which represented a critique not only of professional architectural practice but also of bourgeois forms of living Many of them also studied in American schools of architecture and came in contact with an intellectual and interdisciplinary style of architectural education unavailable in France at that time

The Art of Waiting Belle Boggs, 2016-09-06 A brilliant exploration of the natural medical psychological and political facets of fertility When Belle Boggs's *The Art of Waiting* was published in Orion in 2012 it

went viral leading to republication in Harper's Magazine an interview on NPR's The Diane Rehm Show and a spot at the intersection of highbrow and brilliant in New York magazine's Approval Matrix In that heartbreaking essay Boggs eloquently recounts her realization that she might never be able to conceive She searches the apparently fertile world around her the emergence of thirteen year cicadas the birth of eaglets near her rural home and an unusual gorilla pregnancy at a local zoo for signs that she is not alone Boggs also explores other aspects of fertility and infertility the way longing for a child plays out in the classic Coen brothers film Raising Arizona the depiction of childlessness in literature from Macbeth to Who's Afraid of Virginia Woolf the financial and legal complications that accompany alternative means of family making the private and public expressions of iconic writers grappling with motherhood and fertility She reports with great empathy complex stories of couples who adopted domestically and from overseas LGBT couples considering assisted reproduction and surrogacy and women and men reflecting on childless or child free lives In The Art of Waiting Boggs deftly distills her time of waiting into an expansive contemplation of fertility choice and the many possible roads to making a life and making a family
