Word Prominence in Languages with Complex Morphologies Ksenia Bogomolets, Harry van der Hulst, 2023-03-30 This volume focuses on the theoretical and analytical challenges that languages with complex morphologies pose for the theory and typology of word level prosodic phenomena The morphological complexity and phonological length that are characteristic of words in these languages make them a particularly fruitful ground for investigating the effects of both phonological and morphological factors in the assignment of prominence The first three chapters in the volume explore general theoretical issues pertaining to word prominence in synthetic languages including the issue of wordhood and the empirical theoretical and methodological issues with delineating word level prominence and the higher level prosodic phenomena in these languages These are followed by a series of case studies on stress accent and tone in a geographically and genetically diverse set of languages with highly synthetic morphologies including languages of the Americas Europe and Asia and Australia The volume adopts an interdisciplinary perspective combining phonetic phonological and morphosyntactic insights It will be of interest not only to phonologists and morphologists but to all those interested in the typological and theoretical issues relating to polysynthetic languages

Dimensions of Phonological Stress Jeffrey Heinz, Rob Goedemans, Harry van der Hulst, 2016-11-17 Stress and accent are central organizing features of grammar but their precise nature continues to be a source of mystery and wonder These issues come to the forefront in acquisition where the tension between the abstract mental representations and the concrete physical manifestations of stress and accent is deeply reflected Understanding the nature of the representations of stress and accent

patterns and understanding how stress and accent patterns are learned informs all aspects of linguistic theory and language acquisition. These two themes, representation and acquisition, form the organizational backbone of this book. Each is addressed along different dimensions of stress and accent, including the position of an accent or stress within various prosodic domains and the acoustic dimensions along which the pronunciation of stress and accent may vary. The research presented in the book is multidisciplinary, encompassing theoretical linguistics, speech science, and computational and experimental research.

Points of Convergence in Romance Linguistics Gabriela Alboiu, Ruth King, 2022-03-15. This volume brings together selected papers from the 48th annual Linguistics Symposium on Romance Languages held at York University in Toronto, Canada, in April 2018. It presents original research on a wide variety of Romance languages, both past and present: Latin, Old Catalan, Old Iberian Romance, Old Spanish, Old Portuguese, and West Iberian Medieval Latin, and present Brazilian Portuguese, Catalan, French, Picard, Portuguese, Romanian, and Spanish, along with a number of contemporary dialects, including Basque, Country Spanish, Dominican Spanish, Maine French, Neapolitan, and Picardie French. Divided into four sections: Interfaces, Bridging issues at the CP/TP/vP levels, Bridging issues at the PP/DP levels, and Bridging issues in linguistics, the volume gives researchers and advanced students access to contemporary issues and novel ideas bridging across various areas of Romance linguistics, e.g. morphology, syntax, semantics, phonology, sociolinguistics, first and second language acquisition.

The Syllable and Stress Rafael A. Núñez-Cedeño, 2016-03-21. In this volume, notable scholars honor James W. Harris for his contributions to Romance phonology. Inscribed within generative grammar, the studies seek to explain various phonological processes structured around glides, aspects of onsets, codas, as well as stress and weight. This book will be a useful reference tool for specialists in theoretical phonology, language acquisition, language in contact, bilingualism, and Spanish dialectology.

Offering fresh perspectives on the topic and its study, this book is specifically concerned with basing theoretical work on broad typological surveys and focuses on the collection, selection, and use of data in the analysis of word stress and word rhythm, including their phonetic manifestations.
