Workers Rights As Human Rights:

Workers' Rights as Human Rights James A. Gross, 2003 Provides a new perspective on the assessment of U S labour relations law by using human rights principles as standards for judgment Presents recommendations for what should and can be done to bring U S labour law into conformity with international human rights standards **Are Worker Rights Human Rights?** Richard P. McIntyre, 2008 In a global economy workers must assert their collective rights as workers in order to win human rights as individuals By introducing Marxian and Institutional analysis this book reveals the class relations and power structures that determine the position of workers in the global economy *Structural Injustice and Workers' Rights* Virginia Mantouvalou, 2023 This book seeks to identify structures that trap workers in conditions of exploitation It focuses specifically on state mediated structural injustice where legislative schemes that promote otherwise legitimate aims create inadvertent vulnerabilities for workers **Human Rights, Labor Rights, and International Trade** Lance A. Compa, Stephen F. Diamond, 2003-08-30 A significant contribution to current legal political and economic discourse on workers in the global economy *International and Comparative Law Quarterly* **Re-Imagining Labour Law for Development** Diamond Ashiagbor, 2019-07-25 The aim of this book is to explore labour law s conceptual and normative narrative If labour law is informed by the wider political and economic landscape within which it operates then given the declining prevalence of the post war model of full employment within a formal welfare state regime what shape does or should labour law assume in response to the transformation of the political economy in countries of the global North Correspondingly what is the proper role to be played by labour law and labour relations institutions in the development process within industrialising countries of the global South where informal employment has long been and remains the predominant form Drawing on the expertise of leading labour law scholars this collection addresses those questions by examining the growth and continued prevalence of informality Offering research that is both empirically grounded and doctrinally astute the book explores the changing character of labour law in the global North and South Workers' Rights, East and West , **Scaling Migrant Worker Rights** Xochitl Bada, Shannon Gleeson, 2023-01-10 International migrants home countries often play an integral part in protecting their citizens labor and human rights abroad At the same time institutions such as labor unions worker centers and legal aid groups are among the most visible actors holding governments of immigrant destinations accountable Focusing on Mexico and the United States *Scaling Migrant Worker Rights* analyzes how these organizations pressure governments to defend migrants The result is a multilayered picture of the impediments to migrant worker rights and the possibilities for their realization Highly original and timely this book shines a light on underexplored actors in the labor rights and protection enforcement process LEAH F VOSKO author of *Disrupting Deportability* Transnational Workers Organize A very robust and nuanced empirical analysis documenting how co enforcement mechanisms across transnational civil society consulates and national governments work to implement existing labor rights protections ALEXANDRA D LANO ALONSO author of Mexico

and Its Diaspora in the United States Policies of Emigration since 1848 This important and innovative work provides a nuanced rich and detailed meso analysis of institutions and institutional collaboration in Mexico and the US NANCY PLANKEY VIDELA author of *We Are in This Dance Together Gender Power and Globalization at a Mexican Garment Firm*

Migrants at Work Cathryn Costello, Mark Robert Freedland, 2014 There is a highly significant and under considered intersection and interaction between migration law and labor law Labor lawyers have tended to regard migration law as generally speaking outside their purview and migration lawyers have somewhat similarly tended to neglect labor law The culmination of a collaborative project on Migrants at Work funded by the John Fell Fund the Society of Legal Scholars and the Research Centre at St John's College Oxford this volume brings together distinguished legal and migration scholars to examine the impact of migration law on labor rights and how the regulation of migration increasingly impacts upon employment and labor relations Examining and clarifying the interactions between migration migration law and labor law contributors to the volume identify the many ways that migration law as currently designed divides the objectives of labor law privileging concerns about the labor supply and demand over worker protective concerns In addition migration law creates particular forms of status which affect employment relations thereby dividing the subjects of labor law Chapters cover the labor laws of the UK Australia Ireland Israel Italy Germany Sweden and the US References are also made to discrete practices in Brazil France Greece New Zealand Mexico Poland and South Africa These countries all host migrants and have developed systems of migration law reflecting very different trajectories Some are traditional countries of immigration and settlement migration while others have traditionally been countries of emigration but now import many workers There are nonetheless common features in their immigration law which have a profound impact on labor law for instance in their shared contemporary shift to using temporary labor migration programs Further chapters examine EU and international law on migration labor rights human rights and human trafficking and smuggling developing cross jurisdictional and multi level perspectives Written by leading scholars of labor law migration law and migration studies this book provides a diverse and multidisciplinary approach to this field of legal interaction of interest to academics policymakers legal practitioners trade unions and migrants groups alike

Reconciling International Trade and Labor Protection Wolfgang Plasa, 2015-08-20 Over the last two decades or so a number of developing countries have become important suppliers of manufactured goods A good deal of these goods are produced under extremely poor working conditions incompatible with the fundamental rights and freedoms However WTO rules do not allow restrictions on imports of such goods and the ILO hardly ever sanctions violations of international labor standards On the one hand this leaves exporting countries free to compromise on labor protection in order to enhance their competitiveness on foreign markets On the other hand importing countries are obliged to keep their markets open for goods produced under substandard labor conditions This gives rise to the question of whether the rules of the multilateral trading system should be linked to international labor standards This

study argues that there are two trade related reasons for establishing such a link The first one is commonly referred to as social dumping GATT rules enshrine the principles that should govern international trade fairness and responsibility These principles should also apply where trade meets labor protection Exporting goods made under substandard labor conditions is unfair and distorts trade It would therefore be consistent to make social dumping actionable The other reason concerns the responsibility of importing countries Increased imports of goods produced under substandard labor conditions are an incentive for the exporting country to produce more goods under the same labor conditions and ship them to the same importing country This results in a proliferation of violations of labor standards for which the importing country shares the responsibility There is a need to adopt a link between trade and labor standards enabling the importing country to cap imports in order to escape the blame

International Human Rights Law and Discrimination Protections Mpoki Mwakagali, 2019-03-25 Non discrimination is a fundamental principle of international human rights law This volume discusses the international legal framework on this principle and comparatively elaborates the definition of discrimination as well as the grounds of discrimination in the various general and specialised international human rights treaties including the International Labour Organisation conventions The element of special measures as an integral aspect of this principle is also raised A comparative discussion on the incorporation of international standards on the principle of non discrimination established in the international treaties in regional as well as national human rights frameworks is also set forth to provide practical illustrations of the application of these standards in more specific and localised perspectives Selected regional frameworks discussed are the African American and European human rights regional frameworks and the national frameworks are South Africa and Brazil Other titles in this series Comparative Discrimination Law Historical and Theoretical Frameworks Laura Carlson isbn 9789004345447
