Workplace Justice Organizing Multi Identity Movements:

Workplace Justice, 2002 **Workplace Justice** Sharon Kurtz, 2002 In 1991 Columbia University's one thousand clerical workers launched a successful campaign for justice in their workplace. This diverse union two thirds black and Latina three fourths women was committed to creating an inclusive movement organization and to fighting for all kinds of justice. How could they address the many race and gender injustices members faced, avoid schism and maintain the unity needed to win? Sharon Kurtz, an experienced union activist and former clerical worker herself, was welcomed into the union and pursued these questions. Using this case study and secondary studies of sister clerical unions at Yale and Harvard, she examines the challenges and potential of identity politics in labor movements. With the Columbia strike as a point of departure, Kurtz argues that identity politics are valuable for mobilizing groups but often exclude members and their experiences of oppression. However, Kurtz believes that identity politics should not be abandoned as a component in building movements but should be reframed as multi identity politics. In the end, she shows an approach to organizing with great potential impact not only for labor unions but for any social movement.

Stories of Inclusion? Deborah A. Piatelli, 2009-01-16 Why are some white middle class activists experiencing difficulty creating alliances across racial and class differences? What are the obstacles and what is being done to overcome them? What type of movement structures, cultures and practices can best facilitate inter racial inter class solidarity? *Stories of Inclusion* explores these questions through an ethnographic study of a predominately white middle class contemporary peace and justice network that is working to create a racially and class diverse community of activists. Addressing a very significant and greatly under researched topic, *Stories of Inclusion* raises important and critical questions for the peace movement as well as larger society. In accessible prose, this study bridges the literatures of social movement theory, critical race studies and feminist theory and offers new insight into how power and privilege can affect the process of creating inclusive communities. Drawing on data the author collected through in depth interviews, interpretive focus groups and over two years of participant observation, this study explores how white middle class privilege influences political analyses, definitions of peace work and approaches to alliance building. The findings are compelling and reveal that even those who have developed an oppositional political consciousness and have pledged to work across racial and class divides can still foster exclusive organizing practices. This study also offers examples on how some activists are acknowledging privilege, transforming their worldviews and beginning to establish fruitful relationships across differences. This important work emphasizes the continuing importance of race for those collective actors attempting to construct inclusive movements across diverse groups while also offering important practical solutions on how to bridge differences. The conclusion offers a framework for building a new agenda for the peace and justice movement.

Methods of Social Movement

Research Bert Klandermans, Suzanne Staggenborg, 2002 Citing the critical importance of empirical work to social movement research the editors of this volume have put together the first systematic overview of the major methods used by social movement theorists Original chapters cover the range of techniques surveys formal models discourse analysis in depth interviews participant observation case studies network analysis historical methods protest event analysis macro organizational analysis and comparative politics Each chapter includes a methodological discussion examples of studies employing the method an examination of its strengths and weaknesses and practical guidelines for its application

The Future of Social Movement Research Jacqueliën van Stekelenburg, Conny Roggeband, Bert Klandermans, 2013-07-01 Are the dynamics of contention changing This is the question confronted by the contributors of this volume among the most influential scholars in the field of social movements The answers arriving at a time of extraordinary worldwide turmoil not only provide a wide ranging and varied understanding of how social movements arise and persist but also engender unanswered questions pointing to new theoretical strands and fields of research The Future of Social Movement Research asks How are the dynamics of contention shaped by globalization By societies that are becoming increasingly more individualized and diverse By the spread of new communication technologies such as social media cell phones and the Internet Why do some movements survive while others dissipate Do local and global networks differ in nature The authors essays explore such questions with reference to changes in three domains of contention the demand of protest changes in grievances and identities the supply of protest changes in organizations and networks and how these changes affect the dynamics of mobilization In doing so they theorize and make empirically insightful how globalization individualization and virtualization create new grievances new venues for action new action forms and new structures of contention The resulting work brought together through engaging discussions and debates between the contributors is interdisciplinary and unusually broad in scope constituting the most comprehensive overview of the dynamics of social movements available today

Changing Corporate America from Inside Out Nicole Christine Raeburn, 2004 Despite the backlash against lesbian and gay rights occurring in cities and states across the country a growing number of corporations are actually expanding protections and benefits for their gay and lesbian employees Why this should be and why some corporations are increasingly open to inclusive policies while others are determinedly not is what Nicole C Raeburn seeks to explain in *Changing Corporate America from Inside Out* A long overdue study of the workplace movement Raeburn's analysis focuses on the mobilization of lesbian gay and bisexual employee networks over the past fifteen years to win domestic partner benefits in Fortune 1000 companies Drawing on surveys of nearly one hundred corporations with and without gay networks intensive interviews with human resources executives and gay employee activists as well as a number of case studies Raeburn reveals the impact of the larger social and political environment on corporations openness to gay inclusive policies the effects of industry and corporate characteristics on companies willingness to adopt such policies and what strategies have been most effective in transforming corporate policies and practices to support equitable benefits for all workers Nicole C Raeburn is assistant professor and chair of sociology at the University of San Francisco

[Fighting for Peace](#) Lisa Leitz, 2014-04-15 *Fighting for Peace* brings to light an important yet neglected aspect of opposition to the Iraq War the role of veterans and their families Drawing on extensive participant observation and interviews Lisa Leitz demonstrates how the harrowing war experiences of veterans and their families motivated a significant number of them to engage in peace activism Married to a Navy pilot herself Leitz documents how military peace activists created a movement that allowed them to merge two seemingly contradictory sides of their lives an intimate relation to the military and antiwar activism Members of the movement strategically deployed their combined military peace activist identities to attract media attention assert their authority about the military and war and challenge dominant pro war sentiment By emphasizing the human costs of war activists hoped to mobilize American citizens and leaders who were detached from the wars in Iraq and Afghanistan bring the wars to an end and build up programs to take care of returning veterans and their families The stories in *Fighting for Peace* ultimately reveal that America's all volunteer force is contributing to a civilian military divide that

leaves civilians with little connection to the sacrifices of the military Increasingly Leitz shows veterans and their families are being left to not only fight America s wars but also to fight against them **Waves of Protest** Paul D. Almeida,2008-01-01 One of the first longitudinal studies of collective resistance in the developing world Waves of Protest examines large scale contentious action in El Salvador during critical eras in the country s history Providing a compelling analysis of the massive waves of protests from the early twentieth century to the present in El Salvador Paul D Almeida fully chronicles one of the largest and most successful campaigns against globalization and privatization in the Americas Drawing on original protest data from newspapers and other archival sources Almeida makes an impassioned argument that regime liberalization organizes civil society and conversely acts of state sponsored repression radicalize society He correlates the ebb and flow of protest waves to the changes in regime liberalization and subsequent de democratization and back to liberalization Almeida shows how institutional access and competitive elections create opportunity for civic organizations that become radicalized when authoritarianism increases resulting at times in violent protest campaigns that escalate to revolutionary levels In doing so he brings negative political conditions and threats to the forefront as central forces driving social movement activity and popular contention in the developing world Paul D Almeida is assistant professor of sociology at Texas A M University He is coeditor with Hank Johnston of Latin American Social Movements Globalization Democratization and Transnational Networks

Fighting for the Future of Food Rachel Schurman,William A. Munro,2013-11-30 When scientists working in the agricultural biotechnology industry first altered the genetic material of one organism by introducing genes from an entirely different organism the reaction was generally enthusiastic To many these genetically modified organisms GMOs promised to solve the challenges faced by farmers and to relieve world hunger Yet within a decade this gene revolution had abruptly stalled Widespread protests against the potential dangers of Frankenfoods and the patenting of seed supplies in the developing world forced the industry to change course As a result in the late 1990s some of the world s largest firms reduced their investment in the agricultural sector narrowed their focus to a few select crops or sold off their agricultural divisions altogether Fighting for the Future of Food tells the story of how a small group of social activists working together across tables continents and the Internet took on the biotech industry and achieved stunning success Rachel Schurman and William A Munro detail how the anti biotech movement managed to alter public perceptions about GMOs and close markets to such products Drawing strength from an alternative worldview that sustained its members sense of urgency and commitment the anti GMO movement exploited political opportunities created by the organization and culture of the biotechnology industry itself Fighting for the Future of Food ultimately addresses society s understanding and trust or mistrust of technological innovation and the complexities of the global agricultural system that provides our food
