

GENERAL

The vehicle is equipped with a jiffy stand (or side stand) that locks when placed in the full forward position (down) with the full weight of the vehicle resting on it.

WARNING

Without the full weight of the motorcycle resting on the jiffy stand, any vehicle movement can cause the jiffy stand to retract slightly from the full forward position. If the jiffy stand is not in the full forward or lock position when the full vehicle weight is rested on it, the vehicle could fall over, which could result in death or serious injury.

WARNING

Always park the vehicle on a firm, level surface. The weight of the vehicle can cause it to fall over, which could result in death or serious injury.

WARNING

Be sure jiffy stand is fully retracted before riding. If jiffy stand is not fully retracted during vehicle operation, unsupported contact with the road surface can distract the rider. While the jiffy stand will retract upon contact, the momentary disturbance under rider distraction can lead to loss of vehicle control resulting in death or serious injury.

(Full Forward Position)

REMOVAL

WARNING

Securely block vehicle under frame to be sure that vehicle will not fall when jiffy stand is removed. Inadequate safety precautions could result in death or serious injury.

1. Block motorcycle under frame, so that vehicle is securely upright and level. Jiffy stand should be able to move through its full range of travel without the weight of the vehicle resting on it.
2. See Figure 2-171. Move jiffy stand to the retracted position (up). Remove flange nut and leg stop from threaded end of jiffy stand leg.
3. Move jiffy stand to the full forward position (down). Grasping end of spring or chain to frame tube as possible, hold and turn and with needle nose pliers to unlock from frame hole. Remove jiffy stand leg from bracket.
