Gender and Corporate Governance Francisco Bravo-Urquiza, Nuria Reguera-Alvarado, 2019-11-28 Gender diversity as a corporate governance mechanism is high on the agenda for regulators, firms and researchers. Particularly, gender board composition has received a great deal of attention in recent years. The theoretical foundations of the benefits associated with the inclusion of female directors on boards, how to measure gender diversity in the boardroom and its real impact on board decisions and firm strategies remain hotly debated. Drawing on empirical data, this book summarises the current situation regarding gender board diversity and provides a concise overview of the most important concerns about this topic. This will be a vital tool to guide the future debate on gender diversity and corporate governance for researchers and advanced students as well as regulators, policy makers and board members. It is about innovation, technology development and wealth creation. As a field of research and education, it is relatively new and in the case of Latin America, it is full of promise. Studies undertaken by Babson College, one of the world's premier centers of entrepreneurship, show that Latin America is a hotbed of new business creation but largely without the educational or institutional infrastructure to support it. This volume, the first of its kind, documents the initial state of the art in Latin American entrepreneurship in practice, research and education.
