The Family and Social Change in Chinese Societies Dudley L. Poston, Jr., Wen Shan Yang, Demetrea Nicole Farris, 2013-11-26 This book focuses on families and their changes in Taiwan and China Traditional notions of what constitutes a family have been changing in China Taiwan and other Asian countries The chapters in this book provide interesting methodological and substantive contributions to the discourse on family and social change in Chinese societies They also underscore the implications of the various social changes in Chinese families Written by Chinese and Western scholars they provide an unprecedented overview of what is known about the effects of social change on Chinese families One might think that defining a family is an easy task because the family is so significant to society and is universal The family is the first place we learn culture norms values and gender roles Families exist in all societies throughout the world but their constitution differs In the past several decades there have been many changes in the family in Taiwan and China For instance whereas in the West we use a bilineal system of descent in which descent is traced through both the mother's side and the father's side of the family in many parts of China descent is patrilineal although this is changing and China and Taiwan are starting to assume a family constitution similar to that in the West This and other issues are discussed in great detail in this book Indeed it is the very nature of the differences that motivated the writing of this book on changing families in Taiwan and China The chapters in Part I The Family in Taiwan and China focus on the basic family issues in Taiwan and China that provide the groundwork for many of the chapters that follow Chapter 1 is about the distribution of resources in the family in Taiwan Chapter 2 focuses on filial piety and the autonomous development of adolescents in the Taiwanese family and Chapter 3 explores the important issue of family poverty in Taiwan Chapter 4 moves away from Taiwan and looks at several issues of family growth and change in Hong Kong noting the interesting similarities and differences between Hong Kong and China Part II Issues of Marriage the Family and Fertility in Taiwan and China focuses specifically on marriage family and fertility In Chapter 5 the authors discuss the relationships between marital status socioeconomic status and the subjective well being among women in Hong Kong and Taiwan Chapter 6 describes patterns of sexual activity in China and the United States Chapter 7 considers gender imbalances in Taiwan and their impact on the marriage market Chapter 8 also focuses on Taiwan and examines the effects of mothers' attitudes on daughters' interaction with their mothers in law Chapter 9 compares female and male fertility trends and changes in Taiwan Part III Children and the Family in East

Women's Health and Social Change Ellen Annandale, 2008-07-14 Shortlisted for the BSA Sociology of Health and Illness Book Prize 2009 Traditional distinctions between the experiences of women and men are breaking down and being reconfigured in new more complex ways The long established life expectancy gap between men and women appears to be closing in many affluent societies Many men appear to be far more body and health conscious than they ever

were in the past and there are perceptible changes in women's health behaviours such as increases in cigarette smoking and alcohol consumption. Ellen Annandale provides a comprehensive and persuasive analysis of the contemporary social relations of gender and women's health, arguing that the once all-important sex/gender distinction fosters an undue separation between the social and the biological, whereas it is their interaction and flexibility that is important in the production of health and illness. New theoretical tools are needed in a world where the meaning and lived experience of biological sex and of social gender, as well as the connections between them, are far more fluid. This book takes a step forward, outlining what an adequate feminist analysis of women's health might look like. *Women's Health and Social Change* will be of interest to academics and students working in sociology, women's studies, gender studies, social medicine, social policy, nursing, and midwifery.
