City Edge Esther Charlesworth, 2006-08-11 This series of essays outlines a number of case studies from Europe North America Australia and Asia and provides first hand accounts of the experiences that planners architects and politicians have had in reshaping cities These insights provide a pragmatic assessment of the challenges and constraints posed by changing patterns of urban growth in a broad spectrum of urban environments The reader will discover through these multiple voices and views the diverse forms of global cities and will have a grasp of where the debate on urban design stands today and where it may be going in the future

Office Shock Bob Johansen, Robert Johansen, Joseph Press, Christine Bullen, 2023-01-17 A thoughtful practical read about the future of the flexible office Adam Grant Office shock is an abrupt unsettling change in where when how and even why we work In this visionary book three prominent futurists argue that the office is both a place and a process offices and officing with a new range of choices including what they call the emerging officeverse To see the possibilities with fresh eyes we must use future back thinking to ask What is the purpose of your officing What are the outcomes especially regarding climate you want to achieve With whom do you want to office How will you augment your intelligence Where and when will you office How will you create an agile office Traditional offices were often unfair uncomfortable uncreative and unproductive This book explores how to seize this great opportunity to transform office work

Survival of the City Edward Glaeser, David Cutler, 2021-09-07 One of our great urbanists and one of our great public health experts join forces to reckon with how cities are changing in the face of existential threats the pandemic has only accelerated Cities can make us sick They always have diseases spread more easily when more people are close to one another And disease is hardly the only ill that accompanies urban density Cities have been demonized as breeding grounds for vice and crime from Sodom and Gomorrah on But cities have flourished nonetheless because they are humanity's greatest invention indispensable engines for creativity innovation wealth and connection the loom on which the fabric of civilization is woven But cities now stand at a crossroads During the global COVID crisis cities grew silent as people worked from home if they could work at all The normal forms of socializing ground to a halt How permanent are these changes Advances in digital technology mean that many people can opt out of city life as never before Will they Are we on the brink of a post urban world City life will survive but individual cities face terrible risks argue Edward Glaeser and David Cutler and a wave of urban failure would be absolutely disastrous In terms of intimacy and inspiration nothing can replace what cities offer Great cities have always demanded great management and our current crisis has exposed fearful gaps in our capacity for good governance It is possible to drive a city into the ground pandemic or not Glaeser and Cutler examine the evolution that is already happening and describe the possible futures that lie before us What will distinguish the cities that will flourish from the ones that won't In America they argue deep inequities in health care and education are a particular blight on the future of our cities solving them will be the difference between our collective good health and a downward spiral to a much
