Preventing Problem Behaviors Robert

Algozzine, Pam Kay, 2002 This book offers an array of suggested good practice with consistent thinking behind it and teachers and other education professionals will find much that both interests and challenges in it. The book has much to offer teachers not only in the setting of challenging behaviours but also in the wider context of effective classroom practice aimed at preventing problems that become challenging. Chris Lee British Journal of Special Education Today most teachers will tell you that they spend an inordinate amount of time, energy and effort managing problem behaviours and that time spent managing behaviour seriously limits the amount of time they can spend teaching. Removing students who misbehave from the classroom only displaces the problem and does nothing to address the school system's responsibility to educate them. This book follows an OSEP funded Office of Special Education Programs project titled Prevention Strategies That Work which covered four years of implementing school based prevention practices. The effective prevention NOT intervention programmes are based on the premise that early response to learning behaviour and emotional problems can lead to better outcomes for students. The three fundamental areas addressed are improving individual behaviours, improving classroom and school wide conditions and improving family and community partnerships. This is a strategy book presenting practices to counter behavioural problems before they get out of hand. They have been tested, adapted and proven effective in a variety of settings. Each chapter cites the research that supports the recommended practices.

Conducting School-Based Assessments of Child and Adolescent Behavior Edward Steven Shapiro, Thomas R. Kratochwill, 2002-07-25 This hands on guide is designed to help school practitioners conduct effective multidimensional assessments of a wide range of emotional and behavioral difficulties. Each chapter focuses on a particular method, describes its applications in the school setting and offers clear guidelines for implementation, illustrated with realistic case examples. Approaches discussed include direct observation, analogue assessment, child self reports, teacher and parent interviewing, informant reports and self monitoring procedures. Recommendations for working with culturally and linguistically diverse children and adolescents are also provided. The theoretical and empirical underpinnings of the assessment strategies demonstrated here are thoroughly reviewed in the companion volume Behavioral Assessment in Schools Second Edition Theory, Research and Clinical Foundations see other side for more information.
