The Unbounded Mind Breaking The Chains Of Traditional Business Thinking:

The ^AUnbounded Mind Ian I. Mitroff, Harold A. Linstone, 1993-01-21 Global markets Japanese competition the service economy the sophisticated consumer American business today faces challenges undreamed of just a few decades ago and traditional approaches to corporate problems are becoming increasingly less effective And yet as the authors of The Unbounded Mind point out MBA programs still preach and thousands of American firms hold sacred an antiquated system of business thinking that is wholly inadequate to the problems they face In this groundbreaking work two pioneering thinkers in business studies Ian I Mitroff and Harold A Linstone pinpoint the profound changes that must occur in the way business executives think make decisions and solve problems if America is to remain competitive They put forth a radically new approach new thinking and show executives exactly how to employ these special critical and creative tools to clear the hurdles businesses now face Logic and rationality they explain are useful but limited And traditional simplification often inhibits the ability to ask the right questions and recognize the true problem But varying perspectives multiple realities and openness to multiple solutions are the secrets of contemporary problem solving and lead us to the cutting edge of innovation Clearly and compellingly Mitroff and Linstone weave together insights gleaned from philosophy psychology management science economics and decision science and quote thinkers from Descartes to Robert Bly from Alvin Toffler to Chief Seattle In illustrating how new thinking differs from the usual ways in which American firms have handled problems they analyze a wealth of examples including the decline of the American auto industry and the consequences of this country's blind exporting of technology They also revisit and interpret some of the most grave crises corporate America has faced the Bhopal disaster the Tylenol scare and the accident at Three Mile Island Hard hitting and insightful The Unbounded Mind is a clarion call for American business It argues that if we are to produce products and services that can compete in the information age we must challenge the very foundations of our thinking and learn how to approach decisionmaking in a truly creative way

Next Generation Information Technologies and Systems Yishai Feldman, Donald Kraft, Tsvi Kuflik, 2009-09-29 This book constitutes the refereed post conference proceedings of the 7th International Conference on Next Generation Information Technologies and Systems NGITS 2009 held in Haifa Israel in June 2009 The 14 revised full papers presented together with two keynote lectures and one invited paper were carefully reviewed and selected from numerous submissions The papers are organized in topical sections on middleware and integration modeling healthcare biomedical service and information management and applications

Managing Change Select Knowledge, *Knowledge Synthesis* Yoshiteru Nakamori, 2015-11-26 This book provides readers the idea of systemically synthesizing various kind of knowledge which needs to combine analytical thinking and synthetic thinking Systems science is expected to help in solving contemporary complex problems utilizing interdisciplinary knowledge effectively and combining analytical thinking and synthetic thinking efficiently However traditional systems science has been divided into two schools one seeks a systematic procedure to give a

correct objective answer the other develops an emergent systemic process so that the user can continue exploratory learning It is not an exaggeration to say that analytical thinking and synthetic thinking have been developed independently in different schools This book integrates approaches developed in these two schools using ideas in knowledge science that have been emerging recently under the influence of Eastern thinking It emphasizes the importance of utilizing intuition in systems approaches whereas other books usually try to solve problems rationally and objectively rejecting subjectivity This book never denies rationality and objectivity however complex problems of today do not always yield to complete analysis The novelty of this present volume is that it takes in the ideas of synthetic thinking in knowledge science to develop systems science further The chapter contributors who are experienced systems scientists with a profound understanding of knowledge management discuss knowledge synthesis from the Western and Eastern cultural perspectives The book introduces a theory on systemic knowledge synthesis in an odd chapter and then presents an application of the theory in the next chapter in order to contribute to developing translational systems science

Socio-Technical and Human Cognition Elements of Information Systems Clarke, Steve, Coakes, Elayne, Hunter, M. Gordon, Wenn, Andrew, 2002-07-01 Information resource management is too often seen as a domain dominated by technology or at best one in which human considerations are secondary to and dependent on technological systems This title brings together chapters from Europe Australasia Canada and the Americas all drawn together by the common theme of the book It will present information management not as technology influenced by people but as fundamentally a people centred domain

The Interdependent Organization Rexford H. Draman, 2017-09-08 The Interdependent Organization provides its readers with a template for the development of an individualized transition plan to guide their journey toward becoming more organizationally sustainable We as humans tend to rely on our current set of assumptions when we evaluate our actions and their potential impact on the future With today's ever increasing rate of change in technology our access to information and cultural interactions interdependence around the world the reliance on old ways of thinking linear will not allow us to effectively transition into the systems based world of tomorrow The Interdependent Organization presents a deeper understanding of the financial operational and cultural crossroads we are facing as a planet and introduces a systems based transitional path that individuals organizations and societies can draw on to move towards a more holistic and sustainable future The book provides readers with the necessary understanding and insight into systems thinking and the use of systems based business tools to guide the sustainability journey while producing a positive impact to the organization's bottom line its employee engagement and its stakeholders expectations in each of the journey's three stages The journey begins with the adoption of simple yet powerful systems based tools for managing the organization's operations and projects These proven tools provide increased productivity with a proven bottom line improvement that exceeds 30% This introduction to systems based tools and thinking provides the organization with the time to become more familiar with this new way of thinking and making business decisions

before they expand their exposure to broader more complex systems based and sustainable practices The second stage of this journey is focused on introducing new tools and practices to insure a consistent set of measures are used across the organization The third and final stage focuses on aligning the organization s people management practices First Things First Stephen R. Covey,A. Roger Merrill,Rebecca R. Merrill,1995 A guide to managing your time by learning how to balance your life Homeland Security Organization in Defence against Terrorism Julian P.I.A.G. Charvat,2012-06-15 The threat of terrorist attack continues to feature prominently in the field of homeland security Dealing with this issue demands a balanced strategy which will defeat the terrorist threat whilst at the same time ensuring that vulnerable communities and individuals feel included in society and are not pushed towards radicalization and violent extremism by the very measures implemented to prevent this This book presents the proceedings of the NATO Centre of Excellence Defence Against Terrorism COE DAT Advanced Research Workshop entitled Homeland Security Organization in Defence Against Terrorism held in Ankara Turkey in November 2009 The workshop brought together participants from some 13 countries and consisted of five sessions current threats to homeland security from terrorism homeland security organization legal and security responses to terrorism in homeland security the challenge of international terrorism other threats and countering radicalization and the psychology of terrorism During these sessions presentations by thirteen expert speakers from eight countries were followed by a debate The workshop concluded with a final discussion of all the topics reflected in the individual papers presented Representing a significant contribution to furthering the science of counterterrorism this book will be of interest to all those whose work involves them in aspects of homeland security and the terrorist threat Method Engineering Sjaak Brinkkemper,Kalle Lyytinen,Richard Welke,2013-06-05 Method Engineering focuses on the design construction and evaluation of methods techniques and support tools for information systems development It addresses a number of important topics including method representation formalisms meta modelling situational methods contingency approaches system development practices of method engineering terminology and reference models ontologies usability and experience reports and organisational support and impact Information Technology and Changes in Organizational Work W.J. Technology Run Amok Ian I. Mitroff,2018-09-06

The recent data controversy with Facebook highlights that the tech industry as a whole was utterly unprepared for the backlash it faced as a result of its business model of selling user data to third parties Despite the predominant role that technology plays in all of our lives the controversy also revealed that many tech companies are reactive rather than proactive in addressing crises This book examines society's failure to manage technology and its resulting negative consequences Mitroff argues that the technological mindset is responsible for society's unbridled obsession with technology and unless confronted will cause one tech crisis after another This trans disciplinary text edgy in its approach will appeal to academics students and practitioners through its discussion of the modern technological crisis

Leadership Blind Spots and What To Do About Them Karen Blakeley,2007-06-29 Knowledge is built from personal experience and coloured by our needs and values It follows that all knowledge is personal and incomplete We all suffer from blind spots But when leaders have them it matters To guide people on a journey of continuous learning understanding and adapting to events as they occur leaders must overcome their own blind spots and those of their organization Any leader who implements the practices outlined in this book will immediately improve their ability to perform in today's competitive global environment Karen Blakeley provides in depth analysis of how leaders learn on the job and what gets in the way Most importantly she offers a systematic approach for accelerating leaders learning capacity and maximising their performance potential

Reinventing Innovation Aaron C. T. Smith,Fiona Sutherland,David H. Gilbert,2017-05-31 Based on research findings and detailed original cases this book charts the new innovation imperative where organizations must deliver on dual goals an efficient return on current operations and a burgeoning pipeline of new products It argues that the two pursuits cannot be achieved through a bland compromise or by switching priorities back and forth Only a dual organization capable of amplifying the tension can optimize efficiency while seeding innovation Reinventing Innovation examines the nature of dual organizing presents a series of in depth cases to reveal its principles and explains how to fortify organizations with ambidexterity capabilities Ideal for tertiary students academics and practitioners Reinventing Innovation contains a rich balance of theoretical principles case insights and practical guidance

Developing Web Information Systems Richard Vidgen,2002-09-25 Developing Web Information Systems brings together traditional system development methods that have been taught for many years on information systems and computer science courses with web e commerce development It is the first book to bring together IS

development and the web applications in a thorough and systematic way There is a running case study that illustrates web IS development from start to finish The case is easy to understand a theatre and results in a working web application Most if not all analysis and design texts fall short of making that step into software The book draws heavily on practical experiences of web based IS development resulting from commercial system development so as well as appealing to students and academics it will also interest practitioners The coverage of data management and e business strategy gives the book the broader scope essential for understanding IS development properly in an Internet context First book to bring together IS development and web applications thoroughly and systematically Covers full development process from strategy through analysis and design to working software Interactive case study which can be accessed on author s website [Handbook on Decision Support Systems](#) 1 Frada Burstein, Clyde W. Holsapple, 2008-01-22 Decision support systems have experienced a marked increase in attention and importance over the past 25 years The aim of this book is to survey the decision support system DSS field covering both developed territory and emergent frontiers It will give the reader a clear understanding of fundamental DSS concepts methods technologies trends and issues It will serve as a basic reference work for DSS research practice and instruction To achieve these goals the book has been designed according to a ten part structure divided in two volumes with chapters authored by well known well versed scholars and practitioners from the DSS community *Rethinking Project Management for a Dynamic and Digital World* Darren Dalcher, 2022-01-25 Although project management is a newly recognised profession it deals with a number of significant challenges We seem to operate in an unprecedented environment rife with change innovation and turbulence Moreover projects by their very nature tend to push boundaries encourage novelty and demand engagement with the uncertain and the unknown Indeed projects reflect our organised impulse to constantly amend shape improve and refine our context So how can future projects overcome the challenges *Rethinking Project Management for a Dynamic and Digital World* makes a powerful and original statement equipping project leaders and managers with new approaches and frameworks for an increasingly demanding world where the traditional methods models and mindsets no longer suffice The book explores new trends promising ideas and novel concepts and distils the fundamentals for marshalling a world concerned with people communities and value by deploying innovation rethinking purpose and acting responsibly An increasingly borderless upwardly mobile and entrepreneurial society requires a revamped and revitalised project perspective that is more dynamic adaptive and reflective This volume brings together some of the best writing by leading authorities on many key topics including benchmarking lean quality communicating teams and teamwork followership organising for project work project frameworks agile working project portfolios strategic initiatives strategic alignment trust entrepreneurship putting people first social processes positive organisations rethinking progress the hacker paradigm community stewardship and knowledge management The collection thus offers an invaluable new resource for informed managers looking to engage with the latest thinking and research and for researchers seeking to reflect on how the

discipline is changing *The Human Capacity for Transformational Change* Valerie A. Brown, John A. Harris, 2014-02-24

Pressures for transformational change have become a regular feature of most fields of human endeavour Master thinkers and visionaries alike have reframed existing divisions as connecting relationships bringing together as dynamic systems the supposed opposites of parts and wholes stability and change individuals and society and rational and creative thinking This reframing of opposites as interconnected wholes has led to realisation of the power of a collective mind This book offers ways and means of creating the synergies that are crucial in influencing a desired transformational change towards a just and sustainable future It describes how and why our current decision making on any complex issue is marked by clashes between the different interests involved More optimistically the book pursues a mode of thinking that brings together government specialised and community interests at the local regional and personal scales in a collective transformation process Practical examples signal the emergence of a new knowledge tradition that promises to be as powerful as the scientific enlightenment Written in accessible language this book will be insightful reading for anyone struggling with transformational change especially researchers students and professionals in the fields of administration governance environmental management international development politics public health public law sociology and community development **Handbook of Sustainable Development Planning** M.A. Quaddus, M.A.B. Siddique, 2013-09-30 Acclaim for the first edition The book Handbook of Sustainable Development Planning is perfect for readers in different professions who deal with planning and development management It contains interesting theoretical considerations provoke **Organizational Public Relations** Christopher Spicer, 2013-11-05 Public relations practitioners are often called upon to help chart their organization s strategic development thus functioning as managerial decision makers linking the organization to its larger environment This book is about understanding organizations especially the role played by organizational decision making in the development and implementation of public relations programs and activities It emphasizes the ways in which an organization s culture and decision making processes ultimately influence the success or failure of their public relations efforts The research case studies and author s interpretations and suggestions explore the often confusing netherworld of organizational mindsets particularly as those world views affect the organization s relations with clients and other stakeholders Understanding organizational politics is the way to understanding how and why decisions are made by the organization s dominant coalition The primary goal of this text is to enhance our understanding of the ways in which organizations work the political process that accompanies organizational decision making As an instrumental participant in the organizational political process the public relations practitioner must possess knowledge and understanding of the organization s political process in order to succeed within that organization Given the need for public relations practitioners to form coalitions negotiate consensus and advocate organizational interests the political system metaphor is most appropriate for understanding the relationship between organizational power and organizational public relations This book then steps back from a focus solely on the design

of public relations programs and instead examines how the impetus for those programs emerges within the organization as a result of organizational politics in action. Its special features include practitioner responses at the end of each chapter providing commentary on the usefulness of the ideas presented, sidebars from popular sources illustrating theories, new case studies, merging of management and organizational theory and research with communication theory and research, a focus on external stakeholders from both an advocacy and a collaborative frame, resulting in the creation of a collaborative advocacy framework for external communication, and an extended examination of ethical considerations pertaining to organizational decision making and communication.
