Machine H. G. Wells, 2017 The Time Machine is a scientific romance that helped invent the genre of science fiction and the time travel story This edition features a contextual introduction detailed explanatory notes and two essays Wells wrote just prior to the publication of his first book The Time Machine and the Domains Richard W. Bevis, 2022-02-18 Why have so many cultures created what we call imaginative literature in the past and still do What prompts so many people to read literature And how are we to understand the economy that links these producers and consumers These and related questions plagued the author for a couple of decades before he began to set down the results of his research into the roles and functions that creative writing has had in various societies More and more the evidence seemed to point towards our feelings about the effects of time on our lives and our memories of special places that enchanted or changed us He illustrates his findings by examining a wide range of literary artifacts **Mobile Narratives** Eleftheria Arapoglou, Mónika Fodor, Jopi Nyman, 2013-08-15 Emphasizing the role of travel and migration in the performance and transformation of identity this volume addresses representations of travel mobility and migration in 19th 21st century travel writing literature and media texts In so doing the book analyses the role of the various cultural ethnic gender and national encounters pertinent to narratives of travel and migration in transforming and problematizing the identities of both the travelers and travelees enacting in the borderzones between cultures While the individual essays by scholars from a wide range of countries deal with a variety of case studies from various historical spatial and cultural locations they share a strong central interest in the ways in which the narratives of travel contribute to the imagining of ethnic encounters and how they have acted as sites of transformation and transculturation from the early nineteenth century to the present day In addition to discussing textual representations of travel and migration the volume also addresses the ways in which cultural texts themselves travel and are reconstructed in various cultural settings The analyses are particularly attentive to the issues of globalization and migration which provide a general frame for interpretation What distinguishes the volume from existing books is its concern with travel and migration as ways of forging transcultural identities that are able to subvert existing categorizations and binary models of identity formation In so doing it pays particular attention to the performance of identity in various spaces of cultural encounter ranging from North America to the East of Europe putting particular emphasis on the representation of intercultural and ethnic encounters **The American Gene** Robert Chernomas, Ian Hudson, Gregory Chernomas, 2025-03-18

Biological justification for all forms of inequality has a long history with the claim that particular groups suffer disproportionately from inherited flaws of ability and character used to explain a remarkably wide variety of inequalities. Providing an important critique of that biodeterminist history and how the Human Genome Project has inspired some contemporary scientists and economists to follow a similar path of ascribing socioeconomic outcomes to genetic inheritance. *The American Gene* details new research that suggests that the social and economic environment can affect how genes express themselves in specific human traits and social outcomes. Using the three cases of the American white working class, Black Americans and American women, the authors demonstrate that relying on nature as an explanation is seriously flawed, showing that the socioeconomic inheritance created by the conditions in which these populations worked and lived offer a far better explanation than nature for the stratified results. This book is the story of an American history rife with unnecessary misery and the waste of human potential along with the liberating effect of understanding the degree to which its citizens are the product of social inheritance and the potential power of a nurturing economy and society that equality promises.

The Time Machine / The Invisible Man H. G. Wells, 2007-10-02 Together in one indispensable volume *The Time Machine* and *The Invisible Man* are masterpieces of irony and imaginative vision from H. G. Wells, the father of science fiction. *The Time Machine* conveys the Time Traveller into the distant future and an extraordinary world. There, stranded on a slowly dying Earth, he discovers two bizarre races: the effete Eloi and the subterranean Morlocks, a haunting portrayal of Darwin's evolutionary theory carried to a terrible conclusion. *The Invisible Man* is the fascinating tale of a brash young scientist who, experimenting on himself, becomes invisible and then criminally insane, trapped in the terror of his own creation. Convincing and unforgettably real, these two classics are consummate representations of the stories that defined science fiction and inspired generations of readers and writers. With an Introduction by John Calvin Batchelor and an Afterword by Paul Youngquist.

The Time Machine H. G. Wells, 2008 A scientist invents a time machine that carries him into the future and while there he meets a race of gentle humans and evil creatures. Written in graphic novel format.

After the Human Sherryll Vint, 2020-12-10 *After the Human* provides a comprehensive overview of how a range of philosophical, ethical, and political ideas under the framework of posthumanism have transformed humanities scholarship today. Bringing together a range of interdisciplinary scholars and perspectives, it puts into dialogue the major influences from philosophy, literary study, anthropology, and science studies that set the stage for a range of new questions to be asked about the relationship of the human to other life. The book's central argument is that posthumanism's challenge to and disruption of traditional humanist knowledge is so significant as to presage a sea change from the humanities into the posthumanities. *After the Human* documents the emergence of posthumanist ideas in the fractures within traditional disciplines, examines the new objects of analysis that thus came into prominence, and theorizes new interdisciplinary methods of study that followed.

The Reception of H.G. Wells in Europe Patrick Parrinder, John S. Partington, 2005-05-12 H. G. Wells was described by one of his

European critics as a seismograph of his age He is one of the founding fathers of modern science fiction and as a novelist essayist educationalist and political propagandist his influence has been felt in every European country This collection of essays by scholarly experts shows the varied and dramatic nature of Wells s reception including translations critical appraisals novels and films on Wellsian themes and responses to his own well publicized visits to Russia and elsewhere The authors chart the intense ideological debate that his writings occasioned particularly in the inter war years and the censorship of his books in Nazi Germany and Francoist Spain This book offers pioneering insights into Wells s contribution to 20th century European literature and to modern political ideas including the idea of European union Reception of H G Wells in Europe Review **Time and Literature** Thomas M. Allen,2018-03-29 Time and Literature features twenty essays on topics from aesthetics and narratology to globalisation and queer temporalities and showcases how time studies often referred to as the temporal turn cut across and illuminate research in every field of literature as well as interdisciplinary approaches drawing upon history philosophy anthropology and the natural sciences Part one Origins addresses fundamental issues that can be traced back to the beginnings of literary criticism Part two Developments shows how thinking about Time has been crucial to various interpretive revolutions that have impacted literary theory Part three Application illustrates the centrality of temporal theorising to literary criticism in a variety of contemporary approaches from ecocriticism and new materialisms to media and archive studies The first anthology to provide a synthesis of recent scholarship on the temporality of literary language from across different national and historical periods Time and Literature will appeal to academic researchers and interested laypersons alike **As American as Mom, Baseball, and Apple Pie** Linda J. Holland-Toll,2001 This book does nothing less than redefine the very genre of horror fiction calling into question the usual conventions motifs and elements Unlike many critics of this genre Linda Holland Toll sees dis affirmative horror fiction acting neither to soothe fears nor reduce them to the vicarious thrills n chills mode but as intensifying the fears inherent in everyday life Get Big Things Done Erica Dhawan,Saj-nicole Joni,2025-09-23 Connectional Intelligence unlocks the 21st century secret to getting big things done regardless of who you are where you live or what you do We typically associate success and leadership with smarts passion and luck But in today s hypercompetitive world even those gifts aren t enough Get Big Things Done argues that the game changer is a thoroughly modern skill called Connectional Intelligence Virtually anyone can maximize his or her potential and achieve breakthrough performance by developing this crucial ability So what is it Put simply Connectional Intelligence is the ability to combine knowledge ambition and human capital forging connections on a global scale that create unprecedented value and meaning As radical a concept as Emotional Intelligence was in the 90s Connectional Intelligence is changing everything from business and sports to academics health and politics by quickly efficiently and creatively helping people enlist supporters drive innovation develop strategies and implement solutions to big problems Can a small town pumpkin grower affect the global food crisis A Fortune 500 executive change her company s outdated culture through video
