Capital Flow Management Measures in the Digital Age Mr. Dong He, Annamaria Kokenyne, Xavier Lavayssière, Ms. Inutu Lukonga, Nadine Schwarz, Nobuyasu Sugimoto, Jeanne Verrier, 2022-05-10 Capital flow management measures CFMs can be part of the broader policy toolkit to help countries reap the benefits of capital flows while managing the associated risks Their implementation typically requires that financial intermediaries verify the nature of transactions and the identities of transacting parties but is facing the rising challenge of crypto assets Indeed crypto assets have become a significant instrument for payments and speculative investments in some countries They can be traded pseudonymously and held without identification of the residency of the asset holder Many crypto service providers operate across borders making supervision and enforcement by national authorities more difficult

The challenges posed by the attributes of crypto assets are compounded by gaps in the legal and regulatory frameworks This paper aims to discuss how crypto assets could impact the effectiveness of CFMs from a structural and longer term perspective To preserve the effectiveness of CFMs against crypto related challenges policymakers need to consider a multifaceted strategy whose essential elements include clarifying the legal status of crypto assets and ensuring that CFM laws and regulations cover them devising a comprehensive consistent and coordinated regulatory approach to crypto assets and applying it effectively to CFMs establishing international collaborative arrangements for supervision of crypto assets addressing data gaps and leveraging technology regtech and suptech to create anomaly detection models and red flag indicators that will allow for timely risk monitoring and CFM implementation *The American Economic Review* ,1999
