We The People Consenting To A Deeper Democracy:

We the People John Buck, Sharon Villines, 2017-09 Sociocracy uses cybernetics and the study of biological systems to design organizations that are powerful self organizing and self correcting Democracy promises the rights of life liberty and the pursuit of happiness but in practice only to the majority or the rich Sociocracy ensures these rights for everyone We the People explains how We the People John A. Buck, Sharon Villines, 2007 We the People describes a new method of governing that creates more inclusive and efficient organizations Sociocracy ensures the rights of life liberty and the pursuit of happiness to everyone and in the process makes businesses more profitable and non profit organizations more effective

Accelerating Social Change Luigi Morelli, 2021-11-03 Social change is more than a political statement or demand it is a moral and spiritual imperative If this is so then it involves the whole human being in the way he perceives and thinks feels and relates and acts on and impacts the world This work gathers the threads of pioneers and visionaries in various aspects of social and cultural renewal Paradigms of include and transcend offer us paths along which the personal and the global are intimately intertwined Through established pathways and processes we can experiment with new ways of being as we impact our immediate world Practically speaking this book explores three avenues to change At a first level we can start to recognize that society is built around three poles Besides the public and private sectors civil society has emerged to play a crucial role and alter dualistic thinking If we think beyond capitalism and socialism and all their variations and combinations new unthought of frontiers and possibilities emerge It is possible to expand our practice of democracy beyond the majority minority dynamics to the inclusion of all stakeholders A new art and science of civic collaboration can break the gridlocks of polarization and opposition We can engage in a new area of honest energetic collaboration moving beyond weak compromise through an array of social tools that have grown in the last forty to fifty years and have now reached full maturity Lastly we can expand organizational and social forms in ways that completely break away from the past We can reconcile both entrepreneurial and participatory paradigms and transcend top down or bottom up models in ways that our intellect alone cannot fathom Paradigms offer generous visions but are also exacting masters The new revolution will request as much of ourselves as we will request of the world The New Leadership Paradigm Richard Barrett, 2011-01-09 New from Richard Barrett The New Leadership Paradigm is more than a leadership text book 530 pages it is a state of the art learning system for 21st century leaders The book is in six parts Part 1 describes the fundamental principles and concepts that lie at the core of the New Leadership Paradigm learning system Parts 2 3 4 an overview of the Cultural Transformation Tools and an overview of the origins of the seven levels of consciousness model *The Quest for Professionalism* Georges Romme, 2016 Early pioneers in management thinking such as Henri Fayol and Peter Drucker conceived of management as a science based professional activity that serves the greater good Today however many organizations are managed by people demonstrating anything but professionalism resulting in mismanagement of risks as well as a one dimensional focus on short term results

The key thesis in this book is that The Quest for Professionalism must be revitalized because the societal costs and damage caused by managerial amateurism are huge The book is about how to address this grand challenge for example by exploring whether and how a shared professional purpose and a professional body of knowledge can be developed While most work in this area has previously focused on management education The Quest for Professionalism adopts an inside out approach implying management scholarship is the driving force behind any intrinsic transformation of the profession at large Without management scholars playing an active role in advancing science based professionalism in the mould of engineering and medicine any attempt to professionalize management practice is doomed to fail Moreover Georges Romme demonstrates the professionalization quest has to move away from the idea of management being confined to a few people at the top toward management as a technology for distributing power and leadership throughout the organization *Ecovillages* Karen T. Litfin, 2014-01-15 In a world of dwindling natural resources and mounting environmental crisis who is devising ways of living that will work for the long haul And how can we as individuals make a difference To answer these fundamental questions Professor Karen Litfin embarked upon a journey to many of the world's ecovillages intentional communities at the cutting edge of sustainable living From rural to urban high tech to low tech spiritual to secular she discovered an under the radar global movement making positive and radical changes from the ground up In this inspiring and insightful book Karen Litfin shares her unique experience of these experiments in sustainable living through four broad windows ecology economics community and consciousness or E2C2 Whether we live in an ecovillage or a city she contends we must incorporate these four key elements if we wish to harmonize our lives with our home planet Not only is another world possible it is already being born in small pockets the world over These micro societies however are small and time is short Fortunately as Litfin persuasively argues their successes can be applied to existing social structures from the local to the global scale providing sustainable ways of living for generations to come You can learn more about Karen's experiences on the Ecovillages website <http://ecovillagebook.org>
