Web Journalism Practice And Promise Of A New Medium:

Web Journalism James Glen Stovall, 2004 *Journalism on the Web* explores the current practices and future possibilities of Web journalism and examines the characteristics of the Web that distinguish it from traditional media. The author guides students through discussion of the traditional practices of journalism such as reporting, editing, photojournalism, and design while showing how the distinguishing features of the Web—capacity, immediacy, flexibility, permanency, and interactivity—offer new storytelling possibilities. The traditional principles of journalism, particularly journalistic writing that emphasizes accuracy, clarity, precision, and efficiency, are emphasized throughout the text. Features: The first three chapters offer an in-depth examination of the Web as an individual news medium, taking students beyond the idea that Web news is simply a newspaper on screen. An inside look at MSNBC provides students with an idea of what it's like to be inside a 24-hour Web news organization. Ch 13: Three chapters on lateral thinking ask students to think beyond the traditional narrative storytelling forms of the inverted pyramid and present a variety of forms and structures to present information. 4, 5, 6: Cool Ideas sidebars located throughout the book offer short descriptions of innovative ideas of Web journalism to stimulate creative thinking. Web site references at the end of each chapter provide professors with the best sites available for keeping up with advances in Web journalism.

The Handbook of Global Online Journalism Eugenia Siapera, Andreas Veglis, 2012-07-03 The Handbook to Global Online Journalism features a collection of readings from international practitioners and scholars that represent a comprehensive and state-of-the-art overview of the relationship between the internet and journalism around the world. Provides a state-of-the-art overview of current research and future directions of online journalism. Traces the evolution of journalistic practices, business models, and shifting patterns of journalistic cultures that have emerged around the world with the migration of news online. Written and edited by top international researchers and practitioners in the area of online journalism. Features an extensive breadth of coverage including economics, organizational practices, contents, and experiences. Discusses developments in online news in a wide range of countries from the USA to Brazil and from Germany to China. Contains original theory, new research data, and reviews of existing studies in the field. [An Analysis of the Competing Business Models of Online Journalism](#) Michael Fusco, 2010-06-29 From a small town paper in Pennsylvania to the largest international news network in the world, the field of journalism has been revolutionized by the advent of new digital technologies. Since the early 1990s, a new breed of reporting has emerged called online journalism, which utilizes the latest technological tools. After a very successful initial investment, companies like CNN, The New York Times, and Tribune are beginning to seek new strategies for a profitable future. From a variety of success stories emerges a single hybrid model that is set to once again change the way the publishing industry conducts business. Author Michael Fusco explains how newsrooms have overcome the initial hiccups of the transition to new media and are now seeking to maximize profitability. Michael Fusco is a graduate of Lehigh University holding a Bachelors of Arts degree in Journalism, English, and History.

Excellence in Online Journalism David A. Craig, 2010-09-24 Like the technologies that support it the craft of online journalism is evolving quickly This timely book helps students develop standards of excellence through interviews with more than 30 writers editors and producers and dozens of examples of strong work The author provides a framework of concepts to show how the field is evolving and challenged by competition staffing limitations and other pressures Discussion is organized around four key elements speed and accuracy with depth in breaking news comprehensiveness in multimedia content open endedness in story development including public contributions and conversation with users Chapter length treatments of these topics bring home the realities of online work to students who also come to appreciate how excellence and ethics online go hand in hand

The Web as History Niels Brügger, Ralph Schroeder, 2017-03-06 The World Wide Web has now been in use for more than 20 years From early browsers to today s principal source of information entertainment and much else the Web is an integral part of our daily lives to the extent that some people believe if it s not online it doesn t exist While this statement is not entirely true it is becoming increasingly accurate and reflects the Web s role as an indispensable treasure trove It is curious therefore that historians and social scientists have thus far made little use of the Web to investigate historical patterns of culture and society despite making good use of letters novels newspapers radio and television programmes and other pre digital artefacts This volume argues that now is the time to ask what we have learnt from the Web so far The 12 chapters explore this topic from a number of interdisciplinary angles through histories of national web spaces and case studies of different government and media domains as well as an introduction that provides an overview of this exciting new area of research
