China's Search for Security Andrew J. Nathan, Andrew Scobell, 2015-02-10 Despite its impressive size and population economic vitality and drive to upgrade its military China remains a vulnerable nation surrounded by powerful rivals and potential foes Understanding China's foreign policy means fully appreciating these geostrategic challenges which persist even as the country gains increasing influence over its neighbors Andrew J Nathan and Andrew Scobell analyze China's security concerns on four fronts at home with its immediate neighbors in surrounding regional systems and in the world beyond Asia By illuminating the issues driving Chinese policy they offer a new perspective on the country's rise and a strategy for balancing Chinese and American interests in Asia Though rooted in the present Nathan and Scobell's study makes ample use of the past reaching back into history to illuminate the people and institutions shaping Chinese strategy today They also examine Chinese views of the United States explain why China is so concerned about Japan and uncover China's interests in such problematic countries as North Korea Iran and the Sudan The authors probe recent troubles in Tibet and Xinjiang and explore their links to forces beyond China's borders They consider the tactics deployed by mainland China and Taiwan as Taiwan seeks to maintain autonomy in the face of Chinese advances toward unification They evaluate the strengths and weaknesses of China's three main power resources economic power military power and soft power The authors conclude with recommendations for the United States as it seeks to manage China's rise Chinese policymakers understand that their nation's prosperity stability and security depend on cooperation with the United States If handled wisely the authors believe relations between the two countries can produce mutually beneficial outcomes for both Asia and the world

China's Evolving Approach to Peacekeeping Marc Lanteigne, Miwa Hirono, 2013-09-13 China has become an enthusiastic supporter of and contributor to UN peacekeeping Is China's participation in peacekeeping likely to strengthen the current international peacekeeping regime by China's adopting of the international norms of peacekeeping Or on the contrary is it likely to alter the peacekeeping norms in a way that aligns with its own worldview And as China's international confidence grows will it begin to consider peacekeeping a smaller and lesser part of its international security activity and thus not care so much about it This book aims to address these questions by examining how the PRC has

developed its peacekeeping policy and practices in relation to its international status. It does so by bringing in both historical and conceptual analyses and specific case oriented discussions of China's peacekeeping over the past twenty years. The book identifies the various challenges that China has faced at political, conceptual and operational levels and the ways in which the country has dealt with those challenges and considers the implication of such challenges with regards to the future of international peacekeeping. This book was originally published as a special issue of *International Peacekeeping*. **Ruling, Resources and Religion in China** Elizabeth Van Wie Davis, 2012-11-20 China is growing in importance to the economies and governments of the world and it has been run by men with very different ideas. How China copes with the pressures for good governance with the Asian economic model, treats its ethnic minorities under scrutiny and gathers resources to fuel its dynamic economy impacts us all. **Two Billion Eyes** Ying Zhu, 2010-05-04 The definitive work on Chinese television. A pioneering picture of CCTV and its crucial role in the contemporary Chinese political economy. Robert W. McChesney, author of *Corporate Media and the Threat to Democracy*. As China navigates the murky waters of a third way with liberal economic policies under a strict political regime, the surprising battleground for China's future emerges in the country's highest rated television network, China Central Television or CCTV. With 16 internationally broadcast channels and over 1.2 billion viewers, CCTV is a powerhouse in conveying Chinese news and entertainment. The hybrid nature of the network has also transformed it into an unexpected site of discourse in a country that has little official space for negotiation. While CCTV programming is state sponsored and censored, the popularity and profit of the station are determined by the people. And as the Chinese Communist Party seeks to exert its own voice on domestic and international affairs, the prospect of finding an amenable audience becomes increasingly paramount. Through a series of interviews with a fascinating cast of power players including a director of a special topic program that incited the 1989 student movement, current and past presidents of CCTV and producers at the frontline of the network's rapidly evolving role in Chinese culture, celebrated media analyst Ying Zhu unlocks a doorway to political power that has long been shrouded in mystery. An indispensable guide to the Chinese media landscape. *The New Inquiry*. Up until *Two Billion Eyes*, the view of Chinese media has often been limited. Ying Zhu expands the periphery of our vision. *Los Angeles Review of Books*. **Political Science and Chinese Political Studies** Sujian Guo, 2012-07-25 We have witnessed the substantial transformation of China studies, particularly Chinese political studies, in the past 30 years due to changes in China and its rising status in the world as well as changes in our ways of conducting research. As area studies specialists, we are no longer isolated from the larger disciplines of Political Science and International Relations (IR) but an integral part of them. This book contains theoretically innovative contributions by distinguished political scientists from inside and outside China who together offer up to date overviews of the state of the field of Chinese political studies. Combines empirical and normative researches as well as theoretical exploration and case studies. Explores the relationship between Western political science scholarship and contemporary Chinese political studies.

examine the logic and methods of political science and their scholarly application and most recent developments in the study of Chinese politics and discuss the hotly contested and debated issues in Chinese political studies such as universality and particularity regularity and diversity scientification and indigenization main problems challenges opportunities and directions for the disciplinary and intellectual development of Chinese political studies in the context of rising China China and India Chris Ogden, 2017-05-15 China and India are becoming increasingly influential powerful and prominent countries but what kind of states do their leaders and people wish them to become Will they act and behave like major Western entities or like something altogether different hence changing the very nature of international affairs And as the Asian twenty first century takes shape how will these dynamics affect the wider geopolitical landscape and the balance of power In this in depth study Chris Ogden evaluates the prospective impact of China and India upon the definition and nature of great power in the contemporary world Whilst many contend that they will rise in a similar way to current and previous great powers namely via traditional material economic and military measures Ogden explores the extent to which domestic political and cultural values as well as historical identities and perceptions are also central driving forces behind their common status ambitions and worldviews In so doing he offers a new and comprehensive analysis of these two countries past contemporary and future global significance in particular their shared status as the world's first such post imperial great powers

China's Cultural Diplomacy Xin Liu, 2019-10-02 This book examines China's contemporary global cultural footprints through its recent development of cultural diplomacy The volume presents an alternative analytical framework to examine China's cultural diplomacy which goes beyond the Western defined concept of soft power that prevails in the current literature This new approach constructs a three dimensional framework on Orientalism cultural hegemony and nationalism to decipher the multiple contexts which China inhabits historically internationally and domestically The book presents multiple case studies of the Confucius Institute and compares the global programme located around the world with its Western counterparts and also with other Chinese government sponsored endeavours and non government initiated programmes The author aims to solve the puzzle of why China's efforts in cultural diplomacy are perceived differently around the world and helps to outline the distinctive features of China's cultural diplomacy This book will be of much interest to students of diplomacy Chinese politics foreign policy and International Relations in general **Order and Disorder in the 21st**

governance and regulation The second part Case Studies groups chapters around five topic areas citizens capitalism conflict crime and courts The authors here build on the themes presented in the first part by embedding them within specific areas of international regulation such as international criminal law maritime law or finance regulation jurisdictions and regions such as Australia Canada China Japan and South Asia and subject matter such as water resources citizenship statelessness and public interest litigation This blend of contemporary subject matter empirical studies multi disciplinary perspectives and academic theories provides a comprehensive analysis to current and emerging debates in the broader global community In utilizing interdisciplinary studies to draw out common issues and alternative solutions the book will appeal to a wide readership among academics and policy makers *China's Foreign Aid and Investment Diplomacy, Volume II* John F.

Copper,2016-04-29 Today by many accounts China is the world s foremost purveyor of foreign aid and foreign investment to developing countries This is the product of China s miracle economic growth over a period of more than three decades together with China s drive to become a major player in world affairs and accomplish this through economic rather than military means This three volume work is the first comprehensive study of China s aid and investment strategy to trace how it has evolved since Beijing launched its foreign aid diplomacy at the time of the founding of the People s Republic of China in 1949 Volume II provides an analysis of China s foreign aid and investment to countries and regional organizations on the Asian continent covering all of its major sub regions during the period from 1950 to the present day Copper considers motivating factors such as the Korean War the Vietnam War and China s desire to challenge the West and later the Soviet Union Also important to China and driving its aid and investment was China s pursuit of Communist Bloc solidarity a search for secure borders and competition with India for influence in the Third World Securing its imports of energy and raw materials and markets for its products came later Marginalizing Taiwan and defeating it diplomatically constituted another goal of China s foreign aid and foreign investment analyzed here **Historical Dictionary of Chinese Foreign Affairs**

Lawrence R. Sullivan,2018-09-18 In an act of totally unnecessary and wanton destruction British forces in China during the Second Opium War 1856 1860 looted and destroyed much of the Old Imperial Summer Palace Yuanmingyuan including three imperial gardens and hundreds of halls pavilions and temples stock full of ancient artwork antiquities and literary works More than a hundred years later President Xi Jinping 2013 of the People s Republic of China PRC proclaimed the rejuvenation of the Chinese nation with the economic and especially military power to prevent any such recurrence of national humiliation Though not yet a superpower equal in global stature to the United States the PRC is undoubtedly poised to become the equal if not the superior power in the Asia Pacific region expanding its territorial claims in the South China Sea and asserting undisputed economic dominance With government business and academic leaders debating how regional and global powers should respond to a rising China Historical Dictionary of Chinese Foreign Affairs contains a chronology an introduction a glossary appendixes and an extensive bibliography The dictionary section has over 300 cross referenced

entries on major events national institutions foreign nations and personages impacting Chinese foreign affairs along with the many institutions of the post World War II international order that the PRC has engaged especially since the 1970s This book is an excellent resource for students researchers and anyone wanting to know more about Chinese foreign affairs

Chinese Foreign Relations Robert G. Sutter, 2010 A third edition of this book is now available This comprehensive and thoroughly updated introduction to Chinese foreign relations discerns the opportunities and limits China faces as it seeks increased international influence Tracing the record of twists and turns in Chinese foreign relations since the end of the Cold War Robert G Sutter provides a nuanced analysis that shows that despite popular perceptions of its growing power Beijing is hampered by both domestic and international constraints This text's balanced and meticulous assessment shows China's leaders exerting more influence in world affairs but remaining far from dominant Facing numerous contradictions and tradeoffs they move cautiously as they deal with a complex global environment

China and International Relations

Zheng Yongnian, 2010-09-13 Focussing on one of the most influential scholars writing on international relations Wang Gungwu this book explores the limitations of Western international relations approaches to China and explains China's IR from a non Western perspective and demonstrates how the study of Chinese experiences can enrich the IR field

Following the Leader David M. Lampton, 2019-04-09 With unique access to Chinese leaders at all levels of the party and government best selling author David M Lampton tells the story of China's political elites from their own perspectives Based on over five hundred interviews *Following the Leader* offers a rare glimpse into how the attitudes and ideas of those at the top have evolved over the past four decades Here China's rulers explain their strategies and ideas for moving the nation forward share their reflections on matters of leadership and policy and discuss the challenges that keep them awake at night As the Chinese Communist Party installs its new president Xi Jinping for a presumably ten year term questions abound How will the country move forward as its explosive rate of economic growth begins to slow How does it plan to deal with domestic and international calls for political reform and to cope with an aging population not to mention an increasingly fragmented bureaucracy and society In this insightful book we learn how China's leaders see the nation's political future as well as about its global strategic influence

Global Media and Public Diplomacy in Sino-Western Relations Jia Gao, Catherine Ingram, Pookong Kee, 2016-07-22 Many researchers and China observers would agree that understanding how China pursues global communication is critical for assessing its growing soft power While soft power as a concept has in many ways become almost inextricably linked with the PRC's People's Republic of China international diplomacy of the twenty first century the specific role of global media within soft power diplomacy and the corresponding influence of Western mediated public diplomacy within China is a lacuna that has remained largely unexplored Moreover the different Chinese and Western perspectives on the influence of global media and public diplomacy on Sino Western relations and the changing role of global media on this crucial aspect of international politics have not yet been critically examined This volume presents a broad

social science audience with recent innovative scholarship and research findings on global media and public diplomacy concerning Sino Western relations It focuses on the implicit nexus between global media and public diplomacy and their actual utilisation in and impact on the shifting relationships between China and the West Special attention is given to the changing nature of globalised media in both China and Western nations and how globalised media is influencing shaping and changing international politics The contributions delve deeply into both theory and practice and focus especially upon the analysis of several key aspects of the issue from both Chinese and Western perspectives This combination of approaches distinguishes the volume from most other published works on the topic and greatly enriches our knowledge base in this important contemporary field

Contemporary China Review [2024 Autumn/Winter Issue] Editors of Contemporary China Review, 2025-01-13

If Winter comes can Spring be far behind But this year s winter will probably be long lasting cold and it is unknown when spring will come 2024 can be said to have experienced another extraordinary year or it can be said to have experienced a year of stormy waves Because this year s US election can be said to have been like a lever that has moved the entire world It can be noted that not only Americans but also many Chinese people are looking forward to Trump being called the return of the king Trump has achieved a true second entry his second term road to the White House will undoubtedly bring great changes to the world The question is where will the world change Is it tragedy comedy or farce as I said when Trump took office in his first term in 2017 Or is it Make America Great Again as he said When the Republicans and their supporters celebrate together including those extreme right wingers in the United States and of course white supremacists are extremely exclusive of minority groups such as LGPTQ and will inevitably be highly exclusive of ethnic minorities an independent Chinese scholar far away in Europe said online that China is still the same while the United States is the little under its fur coat The marks on the aristocracy s buttocks are becoming more and more prominent To use Aaron s sentence I hate the Communist Party as much as the Nazis Now it should be said the other way around I hate America first white people first and Christianity first as much as I hate one party dictatorship I hate Trump Putin and Netanyahu as much as Xi Jinping Every word is powerful The world has reached such a divided state or it should be said that it has reached such a state of division Has the ancient Greek philosopher Herodotus words come true If God wants to destroy someone he must first make him crazy What changes will happen in 2025 Let s wait and see

National Identities and International Relations Richard Ned Lebow, 2016-10-20 Identity is the master variable for many constructivist scholars of international politics In this comparative study Richard Ned Lebow shows that states do not have identities any more than people do Leaders peoples and foreign actors seek to impose national identifications consistent with their political projects and psychological needs These identifications are multiple fluid and rise in importance as a function of priming and context Leaders are at least as likely to invoke national identifications as rationalizations for policies pursued for other reasons as they are to be influenced by them National identifications are nevertheless important because they invariably stress the alleged uniqueness of a people and its

country and are a principal means of seeking status and building self esteem Lebow tracks the relative appeal of these principles the ways in which they are constructed how they influence national identifications and how they in turn affect regional and international practices *New Frontiers in China's Foreign Relations* Allen Carlson, Ren Xiao, 2011-10-14 This book stands as a rebuke to any who would attempt to forward simplistic interpretations of China's rise In place of parsimonious arguments or an endorsement of any singular set of images whether pacific or confrontational it repeatedly calls attention to the remarkable complexity of China's emerging international profile More specifically the leading Chinese and American scholars working in the fields of Chinese foreign policy international political economy and national security who contributed to this volume argue that while China appears to be entering a new era in its relationship with the outside world such a development encompasses disparate even contradictory policies and as a result there is a great deal of fluidity within China's place in world politics

Going Soft? The US and China Go Global Mei Renyi, 2014-04-11 What is soft power How can a country acquire and enjoy it Is it the product of public or private initiatives How significant is soft power in world affairs The concept of soft power the idea that international success depends not just upon weaponry force and military coercion but also on admiration and respect for a country's culture and way of life is winning ever greater global attention As China enjoys ever increasing heft on the global scene many Chinese officials seek to emulate the past success of the United States in dominating the world not simply militarily but in terms of influence and prestige Most are very conscious that soft power can be extremely valuable in terms of supplementing and boosting their country's military and strategic position but are often uncertain as to how to deploy the instruments of propaganda and cultural diplomacy most effectively The essays in this volume largely written by scholars based in mainland China represent an extended effort to debate and assess the theoretical concept of soft power and just what it means and how it works in practice The authors focus upon the practical impact and implications of soft power in diverse settings and situations in the United States past and present How they ask does soft power relate to issues of religion gender race and social equality at home and abroad What do American elections and political rhetoric do for American soft power Will China succeed in rivalling the United States in power whether hard soft or smart And how will soft power feature in US China relations present and future

China, Russia, and Twenty-first Century Global Geopolitics Paul J. Bolt, Sharyl Cross, 2018 This book provides a comprehensive analysis of the Chinese Russian bilateral relationship grounded in a historical perspective and discusses the implications of the burgeoning strategic partnership between these two major powers for world order and global geopolitics The volume compares the national worldviews priorities and strategic visions for the Chinese and Russian leadership examining several aspects of the relationship in detail The energy trade is the most important component of economic ties although both sides desire to broaden trade and investments In the military realm Russia sells advanced arms to China and the two countries engage in regular joint exercises Diplomatically these two Eurasian powers take similar approaches to conflicts in Ukraine and Syria

and also cooperate on non traditional security issues including preventing coloured revolutions cyber management and terrorism These issue areas illustrate four themes Russia and China have common interests that cement their partnership including security protecting authoritarian institutions and re shaping aspects of the global order They are key players not only influencing regional issues but also international norms and institutions The Sino Russian partnership presents a potential counterbalance to the United States and democratic nations in shaping the contemporary and emerging geopolitical landscape Nevertheless the West is still an important partner for China and Russia Both seek better relations with the West but on the basis of mutual respect and equality Lastly Russia and China have frictions in their relationship and not all of their interests overlap The Sino Russian relationship has gained considerable momentum particularly since 2014 as Moscow turned to Beijing attempting to offset tensions with the West in the aftermath of Russia s annexation of Crimea and intervention in Ukraine However so far China and Russia describe their relationship as a comprehensive strategic partnership but they are not allies
