Miller, 2010 Networks, Markets, and the Pacific Rim W. Mark Fruin, 1998-11-19 Despite the negative press Asian economies have received in connection with the recent financial crisis their record of spectacular growth over the past few decades remains irrefutable In an effort to provide a rich textured analysis of these economies editor W Mark Fruin presents a collection of essays that explores the wide range of network organizations that have been established in the Pacific Rim Conventional studies of economic organization have tended to center on markets and hierarchies the two forms of organization most common in the West But today the world moves too quickly and too unpredictably for the idealized organizations of microeconomic theory to keep up It is no accident that the region that has generated the world's most explosive economic growth is also the region where network organizations sets of independent actors who cooperate frequently for mutual advantage are most pervasive Rapid economic social and technical changes favor the formation of network organizations and vice versa The contributors to this volume identify and elucidate four basic types of networks naturally occurring networks market replacing networks hierarchy replacing networks and market enhancing networks They show how all of these have been shaped by the history government legal system and culture of each country under consideration These network organizations allow the authors to compare and contrast network forms in China Japan South Korea Taiwan and the United States according to features such as degrees of formalization rule definition and market conformance The works collected here make an important contribution to a networks markets hierarchies framework that recognizes and emphasizes the diversity of organizational forms and behaviors A unique resource for scholars and professionals in the fields of management and economics this book enables a complex analysis of one of the world's fastest growing and most theoretically challenging regions On Strike and on Film Ellen R. Baker, 2012-09-01 In 1950 Mexican American miners went on strike for fair working conditions in Hanover New Mexico When an injunction prohibited miners from picketing their wives took over the picket lines an unprecedented act that disrupted mining families but ultimately ensured the strikers victory in 1952 In On Strike and on Film Ellen Baker examines the building of a leftist union that linked class justice to ethnic equality She shows how women's participation in union activities paved the way for their taking over the picket lines and thereby forcing their husbands and the union to face troubling questions about gender equality Baker also explores the collaboration between mining families and blacklisted Hollywood filmmakers that resulted in the controversial 1954 film *Salt of the Earth* She shows how this worker artist alliance gave the mining families a unique chance to clarify the meanings of the strike in their own lives and allowed the filmmakers to create a progressive alternative to Hollywood productions An inspiring story of working class solidarity Mexican American

dignity and women's liberation *Salt of the Earth* was itself blacklisted by powerful anticommunists yet the movie has endured as a vital contribution to American cinema Ties That Bind, Ties That Break Lensey Namioka, 1999 Ailin lives in China in 1911 and everyone in her family wants her to have her feet bound but she refuses Did she make the right choice

The Irish Ecclesiastical Record , 1925 **Networked Urbanism** Talja Blokland, 2016-04-22 Despite considerable interest in social capital amongst urban policy makers and academics alike there is currently little direct focus on its urban dimensions In this volume leading urban researchers from the Netherlands the UK the USA Australia Italy and France explore the nature of social networks and the significance of voluntary associations for contemporary urban life Networked Urbanism recognizes that there is currently a sense of crisis in the cohesion of the city which has led to public attempts to encourage networking and the fostering of social capital However the contributors collectively demonstrate how new kinds of networked urbanism associated with ghettoization suburbanization and segregation have broken from the kind of textured urban communities that existed in the past This has generated new forms of exclusionary social capital which fail to significantly resolve the problems of poor residents whilst strengthening the position of the advantaged Grounded in theoretical reflection and empirical research Networked Urbanism will be of interest to scholars and students of sociology geography and urban studies as well as to policy makers Wounds to Scars Maureen Ann Morrison, 2025-07-20 Maureen

The Return of the Past Uzi Rabi, 2019-11-04 This book argues that the Arab Spring brought to the forefront numerous societal political and historical problems in the Middle East that scholars and practitioners throughout the 20th century and into the 21st century have continually glossed over or reduced in their analysis and analytical frameworks when studying the Middle East These include the prevalent and persistent impact of Islam on political life an impact of transnational and subnational identities including sect tribe and regional identity as well as the overuse of the state as the fundamental unit of analysis when studying the region As a result this book asserts that primordial identities including religion sect and tribe have and will continue to have a significant impact on the conduct of politics in the Middle East
