The Time And Space Of Uncle Albert:

The Time and Space of Uncle Albert Russell Stannard,1989 Uncle Albert and Gedenken are amazed at the physics of the very fast The Time and Space of Uncle Albert Russell Stannard,1990 **The Time and Space of Uncle Albert** Russell Stannard,1993 Black Holes and Uncle Albert Russell Stannard,2005-04-01 Book Two in an action packed adventure series which also explores the three great physics theories of Albert Einstein **How We Write** Mike Sharples,2002-11-01 How We Write is an accessible guide to the entire writing process from forming ideas to formatting text Combining new explanations of creativity with insights into writing as design it offers a full account of the mental physical and social aspects of writing How We Write explores how children learn to write the importance of reflective thinking processes of planning composing and revising visual design of text cultural influences on writing global hypertext and the future of collaborative and on line writing By referring to a wealth of examples from writers such as Umberto Eco Terry Pratchett and Ian Fleming How We Write ultimately teaches us how to control and extend our own writing abilities How We Write will be of value to students and teachers of language and psychology professional and aspiring writers and anyone interested in this familiar yet complex activity **A Holistic Story of Space and Time** David Pearcey ,2023-06-28 Have you ever wondered how the space and time of our everyday lives works and why David Pearcey is here to help with A Holistic Story of Space and Time a thorough exploration through our world of space and time Explaining how space and time works as a complete system the book is helped by brief accounts of the contributions of some of the great scientists and philosophers who helped us understand its components Intended for the general reader who has no previous technical understanding A Holistic Story of Space and Time delves into several areas the types of geometries of space the motion of matter in space and how the force fields of matter pervade space as well as how we perceive space and time by treating the brain as an information management system It shows how the process of perception allows us to determine the true nature of the geometry of the space and time of the real world Much more is also looked into in detail such as Einstein s special and general theories of relativity including his unified field theory electromagnetism and quantum physics including charts and diagrams to explain some of the concepts involved The final part of the book investigates the relationship between us who perceive the real world and the space and time of the real world using the ideas developed by the philosophers Kant and Schopenhauer This all combines to give the reader a uniquely broad look into our world and explains how it works as a total entity from the cosmic world of the curved geometry of general relativity to the mysterious quantum world and then the philosophical aspects of how we are part of it Anyone with an interest in the way things work will be well suited to this extraordinary book that answers the why as well as the what and how Www.Here I Am Russell Stannard,2002-03-01 Sam didn t think much of religion What with science being able to explain almost everything about us and about the world we live in there didn t seem much point to believing in God any more But then came the day Sam was exploring the Internet and

stumbled across God's website. At least that was what it claimed to be. Sam decides to investigate and becomes engrossed in conversations with the mysterious person on the other end. Together they explore the great questions arising out of evolution, astronomy, cosmology, the laws of nature and the possibility of miracles. Not that Sam knew much science. Fortunately the stranger was able to explain the science from scratch in a way that Sam could understand. They also tackled the problems of evil, suffering and death that really set Sam thinking. Readers will be challenged to form their own personal responses to the issues raised based on a listing of forty questions at the back of the book. Sample questions include: What do you hope to achieve in your lifetime? Does belief in God play a part in that? Do you believe in evolution that you came from animals? Do you think there is life on other planets? If so, does that make human beings less important? Do the world religions contradict each other or are they simply talking about the same God in somewhat different ways? How should belief in an afterlife affect the way you live this life?
