The Tools Of Empire Technology And European Imperialism In The Nineteenth Century:

The Tools of Empire Daniel R. Headrick,1981 **The Tools of Empire** Daniel R. Headrick,1981 Empires and Colonies Jonathan Hart,2014-02-06 Empires and Colonies provides a thoroughgoing and lively exploration of the expansion of the seaborne empires of western Europe from the fifteenth century and how that process of expansion affected the world including its successor the United States Whilst providing special attention to Europe the book is careful to highlight the ambivalence and contradiction of that expansion The book also illuminates connections between empires and colonies as a theme in history concentrating on culture while also discussing the rich social economic and political dimensions of the story Furthermore Empires and Colonies recognizes that whilst a study of the expansion of Europe is an important part of world history it is not a history of the world per se The focus on culture is used to assert that areas and peoples that lack great economic power at any given time also deserve attention These alternative voices of slaves indigenous peoples and critics of empire and colonization are an important and compelling element of the book Empires and Colonies will be essential reading not only for students of imperial history but also for anyone interested in the makings of our modern world *Geography and Imperialism, 1820-1940* Morag Bell,1995 An examination of how European imperialism was facilitated and challenged from 1820 to 1920 With reference to geographical science the authors add to multi disciplinary debates on the complex cultural ideological and intellectual bases of European imper **The Historian 2007 (1&2)** , Medical Missionaries and Colonial Knowledge in West Africa and Europe, 1885-1914 Linda Maria Ratschiller Nasim,2023-11-02 This open access book offers an entangled history of hygiene by showing how knowledge of purity health and cleanliness was shaped by evangelical medical missionaries and their encounters with people in West Africa By tracing the interactions and negotiations of six Basel Mission doctors who practised on the Gold Coast and in Cameroon from 1885 to 1914 the author demonstrates how notions of religious purity scientific health and colonial cleanliness came together in the making of hygiene during the age of High Imperialism The heyday of evangelical medical missions abroad coincided with the emergence of tropical medicine as a scientific discipline during what became known as the Scramble for Africa This book reveals that these projects were intertwined and that hygiene played an important role in all three of them While most historians have examined modern hygiene as a European bourgeois and scientific phenomenon the author highlights both the colonial and the religious fabric of hygiene which continues to shape our understanding of purity health and cleanliness to this day *Technology and Globalisation* David Pretel,Lino Camprubí,2018-06-13 This book examines the role of experts and expertise in the dynamics of globalisation since the mid nineteenth century It shows how engineers scientists and other experts have acted as globalising agents providing many of the materials and institutional means for world economic and technical integration Focusing on the study of international connections Technology and Globalisation illustrates how expert practices have shaped the political economies of interacting countries entire regions and the world economy This title brings together a range of approaches

and topics across different regions transcending nationally bounded historical narratives Each chapter deals with a particular topic that places expert networks at the centre of the history of globalisation The contributors concentrate on central themes including intellectual property rights technology transfer tropical science energy production large technological projects technical standards and colonial infrastructures Many also consider methodological theoretical and conceptual issues

The Ascendancy of Europe M.S. Anderson, 2014-06-06 This new edition of the seminal and best selling history of Europe's century of global ascendancy includes a new introduction and bibliography The carefully drawn discussions are pulled together and reinforced by a new afterword Presented in a new textbook format and thoroughly revised throughout the survey provides students with an invaluable guide to a notoriously complex period Lucidly written and constructed as a series of essays the text covers the political and economic balance of power the mechanics of government economy and society states nations Europe and the world Armed Forces and war and romanticism evolution and consciousness Reviews of the previous editions Anderson's book is one of the few that explains economic social military intellectual and colonial developments in a clear precise and engaging manner Teaching History Packed with shrewdness wisdom and well directed erudition invaluable to university students and teachers British Book News

Mediterranean quarantines, 1750-1914 John Chircop, Francisco Javier Martinez, 2018-03-13 Mediterranean quarantines investigates how quarantine the centuries old practice of collective defence against epidemics experienced significant transformations from the eighteenth century in the Mediterranean Sea its original birthplace The new epidemics of cholera and the development of bacteriology and hygiene European colonial expansion the intensification of commercial interchanges the technological revolution in maritime and land transportation and the modernisation policies in Islamic countries were among the main factors behind such transformations The book focuses on case studies on the European and Islamic shores of the Mediterranean showing the multidimensional nature of quarantine the intimate links that sanitary administrations and institutions had with the territorial organisation of states international trade political regimes and the construction of national colonial and professional identities

Imperial Contagions Robert Peckham, David M. Pomfret, 2013-01-01 Imperial Contagions argues that there was no straightforward shift from older enclavist models of colonial medicine to a newer emphasis on prevention and treatment of disease among indigenous populations as well as European residents It shows that colonial medicine was not at all homogeneous on the ground but was riven with tensions and contradictions Indigenous elites contested and appropriated Western medical knowledge and practices for their own purposes Colonial policies contained contradictory and cross cutting impulses This book challenges assumptions that colonial regimes were uniformly able to regulate indigenous bodies and that colonial medicine served as a tool of empire

The Gun in Central Africa Giacomo Macola, 2016-04-25 Why did some central African peoples embrace gun technology in the nineteenth century and others turn their backs on it In answering this question The Gun in Central Africa offers a thorough reassessment of the history of firearms in central Africa Marrying the insights of

Africanist historiography with those of consumption and science and technology studies Giacomo Macola approaches the subject from a culturally sensitive perspective that encompasses both the practical and the symbolic attributes of firearms Informed by the view that the power of objects extends beyond their immediate service functions *The Gun in Central Africa* presents Africans as agents of technological re innovation who understood guns in terms of their changing social structures and political interests By placing firearms at the heart of the analysis this volume casts new light on processes of state formation and military revolution in the era of the long distance trade the workings of central African gender identities and honor cultures and the politics of the colonial encounter Science, Technology and Medicine in Colonial India David

Arnold,2000-04-20 Interest in the science technology and medicine of India under British rule has grown in recent years and has played an ever increasing part in the reinterpretation of modern South Asian history Spanning the period from the establishment of East India Company rule through to Independence David Arnold s wide ranging and analytical survey demonstrates the importance of examining the role of science technology and medicine in conjunction with the development of the British engagement in India and in the formation of Indian responses to western intervention One of the first works to analyse the colonial era as a whole from the perspective of science the book investigates the relationship between Indian and western science the nature of science technology and medicine under the Company the creation of state scientific services imperial science and the rise of an Indian scientific community the impact of scientific and medical research and the dilemmas of nationalist science Empires in World History Niv Horesh,2021-06-01 This study focuses on Empires from an economic historical perspective In doing so it relates current debates in international relations IR and politics to the vexed legacy of empires in the past The book includes analyses of the comparative scholarly literature on Empire in Antiquity and Empire in the Early Modern and Modern Ages asking the question if the United States is an Empire and if China an emerging Empire It contributes to the field given its interdisciplinarity bringing together both historical and IR insights into world systems in times past In addition it draws out four key points of separateness between pre modern and modern empires and emphasises specific economic data Further to that the book advances the notion of the emergence of empires from within in the 21st century that is nation states becoming more multi ethnic while often stepping back from globalization And finally it offers future scenarios for the evolution of empires in a Schumpeterian post industrial world **HISTORY AND**

Lambert, Robert J. Blyth, Jan Rüger, 2011 The name of HMS Dreadnought is closely associated with the age of empire the Anglo German antagonism and the pre First World War naval arms race Yet it was also bound up with a range of political and cultural national and international contexts central to the Edwardian period This volume investigates these contexts and their intersection in this symbolically charged icon of the Edwardian age No One's World Charles A. Kupchan, 2012-03-01 The world is on the cusp of a global turn Between 1500 and 1800 the West sprinted ahead of other centers of power in Asia and the Middle East Europe and the United States have dominated the world since But today the West's preeminence is slipping away as China India Brazil and other emerging powers rise Although most strategists recognize that the dominance of the West is on the wane they are confident that its founding ideas democracy capitalism and secular nationalism will continue to spread ensuring that the Western order will outlast its primacy In No One's World Charles A Kupchan boldly challenges this view arguing that the world is headed for political and ideological diversity emerging powers will neither defer to the West's lead nor converge toward the Western way The ascent of the West was the product of social and economic conditions unique to Europe and the United States As other regions now rise they are following their own paths to modernity and embracing their own conceptions of domestic and international order Kupchan contends that the Western order will not be displaced by a new great power or dominant political model The twenty first century will not belong to America China Asia or anyone else It will be no one's world For the first time in history an interdependent world will be without a center of gravity or global guardian More than simply diagnosing what lies ahead Kupchan provides a detailed strategy for striking a bargain between the West and the rising rest by fashioning a new consensus on issues of legitimacy sovereignty and governance Thoughtful provocative sweeping in scope this work is nothing less than a global guidebook for the 21st century How Scientific Instruments Have Changed Hands, 2016-09-12 This collection of essays discusses the marketing of scientific and medical instruments from the eighteenth century to the First World War The evidence presented here is derived from sources as diverse as contemporary trade literature through newspaper advertisements to rarely surviving inventories and from the instruments themselves The picture may not yet be complete but it has been acknowledged that it is more complex than

sketched out twenty five or even fifty years ago Here is a collection of case studies from the United Kingdom the Americas and Europe showing instruments moving from maker to market place and to some extent what happened next Contributors are Alexi Baker Paolo Brenni Laura Ch zaro Gloria Clifton Peggy Aldrich Kidwell Richard L Kremer A D Morrison Low Joshua Nall Sara J Schechner and Liba Taub Technology and Entrepôt Colonialism in Singapore, 1819-1940 Goh Chor Boon,2013 How did imported technology contribute to the development of the colony of Singapore Who were the main agents of change in this process Was there extensive transfer and diffusion of Western science and technology into the port city How did the people respond to change Examining areas such as shipping port development telegraphs and wireless urban water supply and sewage disposal economic botany electrification food production and retailing science and technical education and health this book documents the role of technology and to a smaller extent science in the transformation of colonial Singapore before 1940 In doing so this book hopes to provide a new dimension to the historiography of Singapore from a science technology and society perspective The Cambridge Economic History of the Modern World: Volume 1, 1700 to 1870 Stephen Broadberry,Kyoji Fukao,2021-06-24 The first volume of The Cambridge Economic History of the Modern World traces the emergence of modern economic growth in eighteenth century Britain and its spread across the globe Focusing on the period from 1700 to 1870 a team of leading experts in economic history offer a series of regional studies from around the world as well as thematic analyses of key factors governing the differential outcomes in different parts of the global economy Topics covered include population and human development capital and technology geography and institutions living standards and inequality international flows of trade and labour the international monetary system and war and empire
