The Travails Of Two Woodpeckers Ivory Bills And Imperials:

The Travails of Two Woodpeckers Noel F. R. Snyder, David Earl Brown, Kevin B. Clark, 2009 The long sad story of the failure of efforts to prevent the extinction of two of nature's most impressive woodpeckers offers lessons for preventing the extinctions of other species

Woodpeckers of the World Gerard Gorman, 2014-06-19 The first definitive photographic guide to woodpeckers covering all 239 species Woodpeckers remain one of the most popular families of birds and they are certainly one of the more unusual Their legendary ability to excavate holes in wood is well known and they are uniquely adapted for living in trees though a few species have become more adapted to ground dwelling The family ranges from the tiny piculets of tropical forests to the mighty Imperial Woodpecker of Mexico sadly now extinct In between there is a considerable variety of species all of a roughly similar shape and design inhabiting forests and woodlands through the world except Australasia and Antarctica Detailed text looks in detail at the biology of the birds with particular emphasis on field identification along with voice habitat status racial variation and distribution The text is accompanied by a series of high quality photographs more than 750 images carefully selected to highlight identification criteria Each species entry is completed by an accurate colour range map A sister to *Owls of the World* in the Helm Photographic Guides series

Woodpeckers of the World is an informative fact filled and beautifully illustrated guide to a group beloved by all birders

Imagining Extinction Ursula K. Heise, 2016-08-10 We are currently facing the sixth mass extinction of species in the history of life on Earth biologists claim the first one caused by humans Activists filmmakers writers and artists are seeking to bring the crisis to the public's attention through stories and images that use the strategies of elegy tragedy epic and even comedy *Imagining Extinction* is the first book to examine the cultural frameworks shaping these narratives and images Ursula K Heise argues that understanding these stories and symbols is indispensable for any effective advocacy on behalf of endangered species More than that she shows how biodiversity conservation even and especially in its scientific and legal dimensions is shaped by cultural assumptions about what is valuable in nature and what is not These assumptions are hardwired into even seemingly neutral tools such as biodiversity databases and laws for the protection of endangered species Heise shows that the conflicts and convergences of biodiversity conservation with animal welfare advocacy environmental justice and discussions about the Anthropocene open up a new vision of multispecies justice Ultimately *Imagining Extinction* demonstrates that biodiversity endangered species and extinction are not only scientific questions but issues of histories cultures and values

The Annihilation of Nature Gerardo Ceballos, Anne H. Ehrlich, Paul R. Ehrlich, 2015-09-30 Environmental scientists reveal the victims of humanity's massive assault on nature Gerardo Ceballos Anne H Ehrlich and Paul R Ehrlich serve as witnesses in this trial of human neglect where the charge is the massive and escalating assault on living things Nature is being annihilated not only because of the human population explosion but also as a result of massive commercial endeavors and public apathy Despite the well intentioned work of conservation organizations and governments the authors warn us that not enough is being done and time is short for the most vulnerable of the world's wild birds and mammals Thousands of populations have already disappeared other populations are dwindling daily and soon our descendants may live in a world containing but a minuscule fraction of the birds and mammals we know today *The Annihilation of Nature* is a clarion call for engagement and action These outspoken scientists urge everyone who cares about nature to become personally connected to the victims of our inadequate conservation efforts and demand that restoration replace destruction Only then will we have any hope of preventing the worst case scenario of the sixth mass extinction

Flock Together B.J. Hollars, 2017-02-01 After stumbling upon a book of photographs depicting extinct animals B J Hollars became fascinated by the creatures that are no longer with us specifically extinct North American birds How he wondered could we preserve so beautifully on film what we've failed to preserve in life And so begins his yearlong journey to find out one that leads him from bogs to art museums from archives to Christmas

Counts until he at last comes as close to extinct birds as he ever will during a behind the scenes visit at the Chicago Field Museum Heartbroken by the birds we've lost Hollars takes refuge in those that remain Armed with binoculars a field guide and knowledgeable friends he begins his transition from budding birder to environmentally conscious citizen a first step on a longer journey toward understanding the true tragedy of a bird's song silenced forever Told with charm and wit Flock Together is a remarkable memoir that shows how knowing the natural world even just a small part illuminates what it means to be a global citizen and how only by embracing our ecological responsibilities do we ever become fully human A moving elegy to birds we've lost Hollars's exploration of what we can learn from extinct species will resonate in the minds of readers long beyond the final page Watch a book trailer for Hollars's newest book **Midwestern Strange** **Lost Animals** Errol Fuller, 2013-11-21 Caught on camera prior to their demise this book reveals the surprisingly rich photographic record of now extinct animals A photograph of an animal long gone evokes a feeling of loss more than a painting ever can Often tinted sepia or black and white these images were mainly taken in zoos or wildlife parks and in a handful of cases featured the last known individual of the species There are some familiar examples such as Martha the last Passenger Pigeon or the Ivory billed Woodpecker recently fledged and perching happily on the hat of one of the biologists that had just ringed it But for every Martha there are a number of less familiar extinct birds and mammals that were caught on camera The photographic record of extinction is the focus of this remarkable book written by the world's leading authority on vanished animals Errol Fuller **Lost Animals** features photographs dating from around 1870 to as recently as 2004 the year that saw the demise of the Hawaiian Po'ouli From a mother Thylacine and her pups to now extinct birds such as the Heath Hen and Carolina Parakeet Fuller tells the tale of each animal why it became extinct and discusses the circumstances surrounding the photography itself in a book rich with unique images The photographs themselves are poignant and compelling They provide a tangible link to animals that have now vanished forever in a book that brings the past to life while delivering a warning for the future

Before They Vanish Paul R. Ehrlich, Gerardo Ceballos, Rodolfo Dirzo, 2024-09-17 Legendary conservationists show us that we still have the power to prevent critical consequences of the sixth extinction in this game changing book Can we save threatened animals and ecosystems in the midst of a mass extinction The answer is a resounding yes **Before They Vanish** shows us how In this wise and impassioned book renowned conservation scientists Paul R Ehrlich Gerardo Ceballos and Rodolfo Dirzo urge us to shift our thinking rather than succumb to grief over the losses that humanity faces This comprehensive look at a crucial but often overlooked aspect of conservation population extinction or the loss of a species within a specific geographic location guides us onto a new hopeful path The authors argue that conservationists have placed too much emphasis on the extinction of entire species which occurs gradually enough that we only detect it in the direst of cases By that time meaningful action may be impossible By shifting our focus to identifying extinction threats at the more localized population level we can intervene more rapidly and effectively to prevent broader declines before it's too late This

change in perspective represents a critical step in saving these vanishing species early detection and intervention may be our last best hope for stemming the tide of this global crisis Using examples from the worlds of vertebrates invertebrates plants fungi and microorganisms the authors explain the concept of population extinction its causes and consequences and how to prevent the mass destruction of the amazing and unique creatures with whom we share our planet This call to action is a must read for anyone concerned with saving endangered and threatened species our natural world and ourselves **Ghosts**

Behind Glass Dolly Jørgensen, 2025-11-28 How museums display extinct species and what these exhibits say about us While it s no longer possible to encounter a dodo in the wild we can still come face to face with them in museums The remains of extinct species whether taxidermied skeletal drawn or sculpted stare back at us from display cases In this moving meditation on what s lost and what endures environmental historian Dolly J rgensen visits natural history collections worldwide from Shanghai to Philadelphia from Edinburgh to Hobart Australia to understand the many ways that museums tell stories about extinction She encounters extinct animals that are framed as cultural artifacts and as rare valuables that are memorialized with lists and that are brought to life through augmented reality She draws our attention to creatures with prominent afterlives passenger pigeons giant moas thylacines as well as those that are less likely to be discussed or displayed Throughout J rgensen examines the relationship between museums and the natural world so readers can look more closely at exhibits about extinction studying the displays for what is there as well as what is missing During a period of rapid species loss driven by humanity s environmental impact Ghosts Behind Glass asks what we can learn about our world from the presence of the extinct [La aniquilación de la naturaleza](#) Gerardo Ceballos, Anne H.
