The Theory Of Moral Sentiments Ibiblio The Publics 8749:

The Theory of Moral Sentiments Smith, 1793 *The Theory of Moral Sentiments* Adam Smith, 2009 Classic from the year 2009 in the subject English Literature Works language English abstract Chap I Of Sympathy How selfish soever man may be supposed there are evidently some principles in his nature which interest him in the fortune of others and render their happiness necessary to him though he derives nothing from it except the pleasure of seeing it Of this kind is pity or compassion the emotion which we feel for the misery of others when we either see it or are made to conceive it in a very lively manner That we often derive sorrow from the sorrow of others is a matter of fact too obvious to require any instances to prove it for this sentiment like all the other original passions of human nature is by no means confined to the virtuous and humane though they perhaps may feel it with the most exquisite sensibility The greatest ruffian the most hardened violator of the laws of society is not altogether without it As we have no immediate experience of what other men feel we can form no idea of the manner in which they are affected but by conceiving what we ourselves should feel in the like situation Though our brother is upon the rack as long as we ourselves are at our ease our senses will never inform us of what he suffers They never did and never can carry us beyond our own person and it is by the imagination only that we can form any conception of what are his sensations Neither can that faculty help us to this any other way than by representing to us what would be our own if we were in his case It is the impressions of our own senses only not those of his which our imaginations copy By the imagination we place ourselves in his situation we conceive ourselves enduring all the same torments we enter as it were into his body and become in some measure the same person with him and thence form some idea of his sensations and even feel something which though weaker in degree is not altogether unlike them His agonie *The Theory of Moral Sentiments* Adam Smith, 2009-08 Purchase of this book includes free trial access to www.millionbooks.com where you can read more than a million books for free This is an OCR edition with typos Excerpt from book enjoyment Men of retirement and speculation who are apt to fit brooding at home over either grief or repentment though they may often have more humanity more generosity and a nicer sense of honour yet seldom possess that equality of temper which is so common among men of the world CHAP V Of the amiable and respectable virtues I UPON these two different efforts upon that of the spectator to enter into the sentiments of the person principally concerned and upon that of the person principally concerned to bring down his emotions to what the spectator can go along with are founded two different sets of virtues The soft the gentle the amiable virtues the virtues of candid confidence and indulgent humanity are founded upon the one the great the awful and respectable the virtues of self denial of self government of that command of the passions which subjects all the movements of our nature to what our own dignity and honour and the propriety of our own conduct require take their origin from the other How amiable does he appear to be whose sympathetic heart seems to re-echo all the sentiments of those with whom he converses who grieves for their calamities who repents their injuries and who rejoices at their good fortune When we bring

home to ourselves the situation of his companions we enter into their gratitude and feel what consolation they must derive from the tender sympathy of so affectionate a friend And for a contrary reason how disagreeable does he appear to be whose hard and obdurate heart feels for himself only but is altogether insensible to the happiness or misery of others We enter in this case too into the pain which his preference must give to every mortal with whom he converses to those especially with whom

Frazer, 2010-08-18 The Enlightenment of Sympathy reclaims the sentimental theory of reflective autonomy as a resource for enriching social science normative theory and political practice today The sentimental description of the reflective process is more empirically accurate than the competing rationalist description and can guide scientists investigating the processes by which the mind formulates moral and political principles Yet the theory is much more than merely descriptive and can also contribute to the philosophical project of finding principles including principles of justice that wield genuine normative authority Enlightenment sentimentalism demonstrates that emotion is necessarily central to our civic life and shows how our reflective sentiments can counterbalance the unreflective feelings that might otherwise lead our political principles astray
