Protein Powder Cookbook Morgan Olson, 2021-09-28 Protein is the main building blocks for our body. They are used to make muscle tendons, organs and skin, as well as enzymes, hormones, neurotransmitters and vitamins. All of these that perform many important functions. Protein is made of smaller molecules called amino acids which link together like beads on a string. These linked amino acids form long chains which then fold into complex shapes. Protein is derived from food from plants like soybeans, rice, lentils, and from animals like eggs, milk, casein, and whey. These are the main ingredients usually added to protein powder for flavoring. The most common protein powder is made from whey. The amount for a protein scoop is usually between 10 to 30 grams. Usually, protein powder is used for building muscle, but it can also be used for weight loss. Protein powder can help you lose weight, build muscle, have more energy, and perform your very best. And there are delicious ways to use protein that go beyond simply tossing a scoop of powder into your blender in the morning. Protein powders can also be used to make an infinite array of healthy and delicious foods that satisfy your tastebuds and your health and optimal fitness. They are easy to make and portable too. This book provides easy-to-follow recipes for protein bars, breads, quiches, pizza, muffins, pancakes, cookies, cakes, and more, all using the freshest and most nutritious of ingredients.
