Euthanasia in the Netherlands R. Cohen-Almagor,2008-04-08 The Dutch experience has influenced the debate on

euthanasia and death with dignity around the globe especially with regard to whether physician assisted suicide and euthanasia should be legitimized or legalized A review of the literature reveals complex and often contradictory views about the Dutch experience Some claim that the Netherlands offers a model for the world to follow others believe that the Netherlands represents danger rather than promise and that the Dutch experience is the definitive answer regarding why we should not make active euthanasia and physician assisted suicide part of our lives Given these contradictory views it has become clear that fieldwork is essential to developing a more informed opinion Having investigated the Dutch experience for a number of years and after thoroughly reading the vast literature published in English I went to the Netherlands for one month in the summer of 1999 to get a feel for the local situation I felt that this would provide the basis on which I could better interpret the findings of the available literature I visited the major centers of medical ethics as well as some research hospitals and spoke with leading figures in the euthanasia policy and practice The time spent was extremely beneficial and enriching I followed in the footsteps of Carlos Gomez who 1 published a book following one month of extensive research in the Netherlands

on the part of the patient Requests based on full information The patient is in a situation of intolerable and hopeless suffering either physical or mental No further acceptable alternatives to euthanasia All alternatives acceptable to the patient for relief of suffering having been tried Consultation with at least one other physician whose judgment can be expected to be independent Indirectly these guidelines became the criteria prosecutors used to decide whether or not to bring charges

We are constantly challenged to find ways of coping and surviving in the face of different types of loss Due in part to the complexities of the concept itself and the resistance many individuals feel toward discussing painful subjects it is often difficult to engage in the sort of robust inter disciplinary dialogue that is needed to explore fully the links between living suffering dying and surviving loss Thus this volume is profoundly interdisciplinary as it explores how loss can be expressed through cognitive affective somatic behavioral interpersonal and spiritual grief responses **Reconceiving Medical Ethics** Christopher Cowley,2012-02-09 This volume of original work comprises a modest challenge sometimes direct sometimes implicit to the mainstream Anglo American conception of the discipline of medical ethics It does so not by trying to fill the gaps with exotic minority interest topics but by re examining some of the fundamental assumptions of the familiar philosophical arguments and some of the basic situations that generate the issues The most important such situation is the encounter between the doctor and the suffering patient which forms one of the themes of the book The authors show that concepts such as the body suffering and consent and the role such concepts play within patients lives are much more complicated than the Anglo American mainstream appreciates Some of these concepts have been discussed with subtlety by Continental philosophers like Heidegger Ricoeur and a secondary purpose of the volume is to apply their ideas to medical ethics Designed for upper level undergraduates and graduate students with some philosophical background in ethics Reconceiving Medical Ethics opens up new avenues for discussion in this ever developing field **Basic Geriatric Nursing - E-Book** Patricia A.
