LANDON,2025 *Age of Deception* Jon R. Lindsay,2025-10-15 At the heart of cybersecurity lies a paradox Cooperation makes conflict possible In Age of Deception Jon R Lindsay shows that widespread trust in cyberspace enables espionage and subversion While such acts of secret statecraft have long been part of global politics digital systems have

dramatically expanded their scope and scale Yet success in secret statecraft hinges less on sophisticated technology than on political context To make sense of this Lindsay offers a general theory of intelligence performance the analogue to military performance in battle that explains why spies and hackers alike depend on clandestine organizations and vulnerable institutions Through cases spanning codebreaking at Bletchley Park during WWII to the weaponization of pagers by Israel in 2024 he traces both continuity and change in secret statecraft Along the way he explains why popular assumptions about cyber warfare are profoundly misleading Offense does not simply dominate defense for example because the same digital complexity that expands opportunities for deception also creates potential for self deception and counterdeception

Provocative and persuasive *Age of Deception* offers crucial insights into the future of secret statecraft in cyberspace and beyond **Restoring Restraint** Rebecca K.C. Hersman, William Pittinos, 2018-07-27 In 2012 a 20 year moratorium on state employment of chemical weapons use was broken Since then there have been more than 200 uses against civilians military targets and political enemies These attacks have broken norms against the use of weapons of mass destruction and create a gap in the nonproliferation fabric despite the robust international architecture of laws treaties agreements and norms designed to restrain the proliferation and use of these weapons Accountability for these recent attacks has been limited or nonexistent which threatens the credibility of the nonproliferation regime and only encourages further use Leaders must find the political and moral strength to use a full spectrum of tools to reestablish this system of restraint By understanding the system built on taboos norms deterrence and a lack of benefits and corresponding accountability approaches military legal political diplomatic economic and educational leaders can utilize a menu of potential actions for building more diverse flexible scalable and implementable options to hold accountable users of chemical weapons *The Untold Story Kim*
