future Introduction to Coastal Processes and Geomorphology begins by discussing coastal systems and shows how these systems link to the processes examined in detail throughout the book. These include the morphodynamic paradigm: tides, waves and sediment transport. Later chapters explore fluvial deltas, estuaries, beaches and barriers, coastal sand dunes and geologically influenced coasts such as cliffs, coral reefs and atolls. A new chapter addresses the forward facing aspect of coastal morphodynamics including the ways in which coasts respond to rapid climate changes such as present day global warming. Also new to this second edition is a chapter on future coasts which considers the wider effects of coastal change on other important aspects of coastal systems including ecology, management, socio-cultural activities, built and natural heritage and archaeology. Case studies using examples from around the world illustrate theory in practice and bring the subject to life. Each chapter starts by outlining the aims and questions, at the end allow you to track your progress. This book is accompanied by additional resources online at www.hodderplus.com geography including Answers to the questions available to download as MP3 files. Expanded case studies with colour photos, links to relevant websites and a map link to pinpoint the case study location. Interactive multiple choice questions and worked examples.
