Weathering the Psalms Steve A. Wiggins,2014-12-03 The weather is all around us all the time From ancient times people have attributed the weather to the work of the gods Ancient Israel shared this perception The book of Psalms reflects theologically significant views on the weather that have not until now been fully explored In this meteorological survey of the Psalms whimsically called meteorotheology every reference to the weather is translated in accordance with the known climate and weather of ancient Israel Each verse is discussed with particular attention to the function of the weather in the hymnal of ancient Israel This book will be a resource for translators clergy and scholars with an interest in how the weather impacted religious outlooks in ancient Israel Readers will learn that some expected associations such as thunder and lightning did not influence Israelite views on the natural world in the same way that they do today Yahweh was God of the weather and the Psalms frequently use this paradigm as a reason for both praise and fear of the Lord **Stay Alive:**

The Imperial Dictionary, English, Technological, and Scientific John Ogilvie,1871 Selected Water Resources Abstracts ,1991 The Secure and the Dispossessed Nick Buxton,Ben Hayes,2015-11-20 While the world s scientists and many of its inhabitants despair at the impact of climate change corporate and military leaders see nothing but opportunities For them melting ice caps mean newly accessible fossil fuels borders to be secured from climate refugees social conflicts to be managed and more failed states in which to intervene They are securing their assets at the expense of the planet and its inhabitants The Secure and the Dispossessed looks at these deadly approaches with a critical eye It also considers the flip

side that the legitimacy of the elite is under unprecedented pressure from resistance by communities to resource grabs to those creating new ecological and socially just models for managing our energy food and water Topics covered include geoengineering militarism refugee protection greenwashing and the agricultural crisis among others Adaptation and resilience to a climate changed world is desperately needed but the form it will take will affect all of our futures

Wait Five Minutes Shelley Ingram, Willow G. Mullins, 2023-05-18 Contributions by Emma Frances Bloomfield Sheila Bock Kristen Bradley Hannah Chapple James Deutsch Mirt Hanley Christine Hoffmann Kate Parker Horigan Shelley Ingram John Laudun Jordan Lovejoy Lena Marander Eklund Jennifer Morrison Willow G Mullins Anne Pryor Todd Richardson and Claire Schmidt The weather governs our lives It fills gaps in conversations determines our dress and influences our architecture No matter how much our lives may have moved indoors no matter how much we may rely on technology we still monitor the weather

Wait Five Minutes Weatherlore in the Twenty First Century draws from folkloric literary and scientific theory to offer up new ways of thinking about this most ancient of phenomena Weatherlore is a concept that describes the folk beliefs and traditions about the weather that are passed down casually among groups of people Weatherlore can be predictive such as the belief that more black than brown fuzz on a woolly bear caterpillar signals a harsh winter It can be the familiar commentary that eases daily social interactions such as asking Is it hot or cold enough for you Other times it is simply ubiquitous If you don't like the weather wait five minutes and it will change From detailing personal experiences at picnics and suburban lawns to critically analyzing storm stories novels and flood legends contributors offer engaging multidisciplinary perspectives on weatherlore As we move further into the twenty first century an increasing awareness of climate change and its impacts on daily life calls for a folkloristic reckoning with the weather and a rising need to examine vernacular understandings of weather and climate Weatherlore helps us understand and shape global political conversations about climate change and biopolitics at the same time that it influences individual group and regional lives and identities We use weather and thus its folklore to make meaning of ourselves our groups and quite literally our world
