Thinking And Deciding Edition 3:

Thinking and Deciding Jonathan Baron, 2000-12-28 Thinking and Deciding has established itself as a required text and important reference work for students and scholars of human cognition and rationality. In this the third edition Jonathan Baron delves further into many of the key questions addressed in the previous editions. For example, how should we think? What if anything keeps us from thinking that way? How can we improve our thinking and decision making? Baron has also revised or expanded his treatment of topics such as risk, utilitarianism, Bayes's theorem, moral thinking, trust, utility measurement, and decision analysis and values. By emphasizing decision making, Baron has made Thinking and Deciding Third Edition more relevant to researchers in applied fields such as medicine, business, public policy, and law, while maintaining its appeal to graduate and undergraduate students.

Thinking and Deciding Jonathan Baron, 2023-08-10 The fifth edition of the classic text Thinking and Deciding updates the broad overview of the field of judgments and decisions offered in previous editions. It covers the normative standards used to evaluate conclusions such as logic, probability, and various forms of utility theory. It explains descriptive accounts of departures from these standards largely in terms of principles of cognitive psychology, emphasizing the distinction between search processes and inferences. Chapters cover decisions under risk, decision analysis, moral decisions, and social dilemmas, and decisions about the future. Although the book assumes no particular prerequisites beyond introductory high school algebra, it is most suited to advanced undergraduates, early graduate students, and active researchers in related fields such as business, politics, law, medicine, economics, and philosophy.

Cognitive Sophistication and the Development of Judgment and Decision-Making Maggie E. Toplak, 2021-10-27 Cognitive Sophistication and the Development of Judgment and Decision Making reviews the existing literature on the development of reasoning, judgment, and decision making with a primary focus on measures from the heuristics and biases tradition. The book presents a model based on cognitive sophistication to examine the development of judgment and decision making, including age-related differences in developmental samples, associations with intellectual abilities, and executive functions and associations with dispositional tendencies that support judgment and decision making. Additional sections cover the empirical findings of a longitudinal study conducted over seven years that tie together the discussed aspects related to cognitive sophistication. This book will provide a much needed description of the theoretical and conceptual issues, a review of empirical findings, and an integrative summary of the implications for developmental models of reasoning, judgment, and decision making. Explores whether individual heuristics and biases are associated. Reviews individual differences in cognitive abilities and thinking dispositions. Examines reasoning from the lens of cognitive sophistication. Discusses the implications for models including dual process models. Tests and elaborates using empirical findings from a longitudinal study.
