Thinking Physics Lewis C. Epstein,Paul G. Hewitt,1979 *Re-Thinking Time at the Interface of Physics and Philosophy* Albrecht von Müller,Thomas Filk,2015-05-19 The current volume of the Parmenides Series On Thinking addresses our deepest and most personal experience of the world the experience of the present from a modern perspective combining physics and philosophy Many prominent researchers have contributed articles to the volume in which they present models and express their opinions on and in some cases also their skepticism about the subject and how it may be or may not be addressed as well as which aspects they consider most relevant in this context While Einstein might have once hoped that the present would find its place in the theory of general relativity in a later discussion with Carnap he expressed his

disappointment that he was never able to achieve this goal This collection of articles provides a unique overview of different modern approaches representing not only a valuable summary for experts but also a nearly inexhaustible source of profound and novel ideas for those who are simply interested in this question **Illusions of Human Thinking** Gabriel

and the God of Israel Norbert M. Samuelson,2002-05-23 Revelation and the God of Israel explores the concept of revelation as it emerges from the Hebrew Scriptures and is interpreted in Jewish philosophy and theology The first part is a study in intellectual history that attempts to answer the question what is the best possible understanding of revelation The second part is a study in constructive theology and attempts to answer the question is it reasonable to affirm belief in revelation Here Norbert M Samuelson focuses on the challenges given from a variety of contemporary academic disciplines including evolutionary psychology political ethics analytic philosophy of religion and source critical studies of the Bible This important book offers a unique approach to theological questions and fresh solutions to them and will appeal to those interested in the history of philosophy religious thought and Judaism **Mind** ,1912 A quarterly review of philosophy **The Whole Truth**

P. J. E. Peebles,2022-08-02 From the Nobel Prize winning physicist a personal meditation on the quest for objective reality in natural science A century ago thoughtful people questioned how reality could agree with physical theories that kept changing from a mechanical model of the ether to electric and magnetic fields and from homogeneous matter to electrons and atoms Today concepts like dark matter and dark energy further complicate and enrich the search for objective reality The Whole Truth is a personal reflection on this ongoing quest by one of the world s most esteemed cosmologists What lies at the heart of physical science What are the foundational ideas that inform and guide the enterprise Is the concept of objective reality meaningful If so do our established physical theories usefully approximate it P J E Peebles takes on these and other big questions about the nature of science drawing on a lifetime of experience as a leading physicist and using cosmology as an example He traces the history of thought about the nature of physical science since Einstein and succinctly lays out the fundamental working assumptions Through a careful examination of the general theory of relativity Einstein s cosmological principle and the theory of an expanding universe Peebles shows the evidence that we are discovering the nature of reality in successive approximations through increasingly rigorous scrutiny A landmark work The Whole Truth is essential reading for anyone interested in the practice of science **The Sibley Journal of Engineering** ,1916
