autistic like behaviors he had developed Although I m not a physician and don t work in the healthcare profession I have lived through the regression and recovery of my own child This experience has led me to form the opinion that potentially too many children are being put on the autism spectrum Some children like Jackson with ASD like symptoms are not autistic and therefore are not receiving the full breadth of intervention that could potentially help them recover Do I have proof of this No because from my experience and up until this point there has not been enough research that the medical profession recognizes as reliable made available to the public or to parents like me to identify the root cause of some symptoms The purpose of my telling this story is not to give anyone or any family false hope but with good reason to encourage you to leave no stone unturned in treating a medically complex child It takes passionate determination and tenacity to find underlying and seemingly hidden causes of complex illnesses and to see the journey through to recovery when possible
