Thomas Nagel The View From Nowhere:

The ^AView From Nowhere Thomas Nagel,1986-01-23 Human beings have the unique ability to view the world in a detached way but at the same time each of us is a particular person in a particular place each with his own personal view of the world Thomas Nagel s ambitious and lively book tackles this fundamental issue arguing that our divided nature is the root of a whole range of philosophical problems touching every aspect of human life He deals with its manifestations in such fields of philosophy as the mind body problem personal identity knowledge and skepticism thought and reality free will ethics the relation between moral and other values the meaning of life and death

Minds and Bodies Colin McGinn,1997-08-28 In Minds and Bodies Colin McGinn offers proof that contemporary philosophy in the hands of a consummate reviewer can be the occasion not only sharp critical assessment but also writing so clear and engaging that readers with no special background in the subject but simply a taste for challenging idea can feel welcome Gathering nearly forty review essays printed mainly in nonspecialist publications over the past twenty years McGinn a distinguished philosopher and teacher measures the best of recent Anglo American philosophical writing considering books by Thomas Nagel John Searle and Daniel Dennett among others and navigating with energy and wit important new work in ethics philosophy of language and philosophy of mind Opening with a section on philosophical lives books written on or by Ludwig Wittgenstein Bertrand Russell Charles Peirce and A J Ayer McGinn moves to the question of consciousness offering readers two dozen crisp and provocative pieces on work seeking to define and illuminate the mind its activity and its relation to the world of physical objects Closing with a section on ethics McGinn brings a bold and sharply original perspective to argument in such controversial areas as animal rights and feminist moral theory A bracing collection of masterfully written reviews that together form an accessible picture of philosophy as it is practiced today Minds and Bodies makes permanent the critical reflections of a gifted philosopher and writer and is destined to find an appreciative audience both within the philosophical community and in the wider culture of intellectually curious readers

The Subjectivity of the Mental Jeremy W. Bowman,1987 **Ethics in Sport** William John Morgan,2007 This is a text for students in sport philosophy sport ethics sport management and sport studies courses as well as a reference for professionals with an interest in sport ethics World renowned experts examine the moral and ethical issues surrounding sport in contemporary society addressing current debates

The View from Nowhere Thomas Nagel,1986 Human beings have the unique ability to view the world in a detached way We can think about the world in terms that transcend our own experience or interest and consider the world from a vantage point that is in Nagel s words nowhere in particular At the same time each of us is a particular person in a particular place each with his own personal view of the world a view that we can recognize as just one aspect of the whole How do we reconcile these two standpoints intellectually morally and practically To what extent are they irreconcilable and to what extent can they be integrated Thomas Nagel s ambitious and lively book tackles this fundamental issue arguing that

our divided nature is the root of a whole range of philosophical problems touching as it does every aspect of human life. He deals with its manifestations in such fields of philosophy as the mind/body problem, personal identity, knowledge and skepticism, thought and reality, free will, ethics, the relation between moral and other values, the meaning of life and death. Excessive objectification has been a malady of recent analytic philosophy, claims Nagel; it has led to implausible forms of reductionism in the philosophy of mind and elsewhere. The solution is not to inhibit the objectifying impulse but to insist that it learn to live alongside the internal perspectives that cannot be either discarded or objectified. Reconciliation between the two standpoints in the end is not always possible.

Pragmatism as Anti-Authoritarianism Richard Rorty, 2021-08-17. In his final work, Richard Rorty provides the definitive statement of his political thought. Rorty equates pragmatism with anti-authoritarianism, arguing that because there is no authority we can rely on to ascertain truth, we can only do so intersubjectively. It follows that we must learn to think and care about what others think and care about.

Confucian Ren and Feminist Ethics of Care Lijun Yuan, 2019-05-28. The rehabilitation of Confucian tradition raised new challenges to Chinese feminist thinkers. Can a Confucian ideal of reciprocity help women realize their equality? What is the hope for Chinese women seeking a social ideal of equality given the growing gender gap in the current economic development of China? Yuan argues Confucianism cannot help unless it is integrated with feminism. In this book, Yuan explores why gendered stratifications perpetuated so deeply in today's China through the influences of Confucian cultural tradition but reading early Confucian texts as a cosmological vision of Ren with Dao and ontological oneness as a whole that is the unity of heaven, earth, and humanism, we might reclaim Confucian egalitarian aspects to develop its openness for gender equity with integration of feminist critical care ethics. Throughout the book, Yuan provides multiple perspectives of comparison: relational self vs. power differentials, gender roles differences vs. political demand for equality, and individual reciprocity vs. connection-based reciprocity, etc. to embrace inclusive methodology and caring democracy. We see a great hope to break through stereotypes of binary thinking of Minben (people-oriented) and Minzhu (autonomous democracy), gender division of labor, reason and emotion, etc. Yuan argues we should integrate feminist critical thoughts of global justice care with early Confucianism since both traditions emphasize caring relationships in humanity and interdependency between social individuals within and beyond their communities in a global scale. Importantly, the integration enlarges our philosophical visions of how cultural traditions can be undeniable sources for strengthening contemporary social ideas of humanity, democracy, equality, and freedom for all.

The Illusions of Egalitarianism John Kekes, 2007. In this systematic and scathing attack on the dominant contemporary version of liberalism, John Kekes challenges political assumptions shared by the majority of people in Western societies. Egalitarianism, as it is widely known, holds that a government ought to treat all citizens with equal consideration. Kekes charges that belief in egalitarianism rests on illusions that prevent people from facing unpleasant truths. Kekes, a major voice in modern political thought, argues that differences among human beings in the areas of morality, reasonability, legality, and

citizenship are too important for governance to ignore In a rigorous criticism of prominent egalitarian thinkers including Dworkin Nagel Nussbaum Rawls Raz and Singer Kekes charges that their views present a serious threat to both morality and reason For Kekes certain inegalitarian truths are obvious people should get what they deserve those who are good and those who are evil should not be treated as if they had the same moral worth people should not be denied what they have earned in order to benefit those who have not earned it and individuals should be held responsible for their actions His provocative book will compel many readers to question their faith in liberalism Neuroscience and Critique Jan De Vos,Ed

Pluth,2015-11-19 Recent years have seen a rapid growth in neuroscientific research and an expansion beyond basic research to incorporate elements of the arts humanities and social sciences It has been suggested that the neurosciences will bring about major transformations in the understanding of ourselves our culture and our society In academia one finds debates within psychology philosophy and literature about the implications of developments within the neurosciences and the emerging fields of educational neuroscience neuro economics and neuro aesthetics also bear witness to a neurological turn which is currently taking place Neuroscience and Critique is a ground breaking edited collection which reflects on the impact of neuroscience in contemporary social science and the humanities It is the first book to consider possibilities for a critique of the theories practices and implications of contemporary neuroscience Chapter 7 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 3 0 license

The Mind As a Scientific Object Christina E. Erneling,David M. Johnson,2005-01-13 What holds together the various fields that are supposed to constitute the general intellectual discipline that people now call cognitive science In this book Erneling and Johnson identify two problems with defining this discipline First some theorists identify the common subject matter as the mind but scientists and philosophers have not been able to agree on any single satisfactory answer to the question of what the mind is Second those who speculate about the general characteristics that belong to cognitive science tend to assume that all the particular fields falling under the rubric psychology linguistics biology and son on are of roughly equal value in their ability to shed light on the nature of mind This book argues that all the cognitive science disciplines are not equally able to provide answers to ontological questions about the mind but rather that

only neurophysiology and cultural psychology are suited to answer these questions However since the cultural account of mind has long been ignored in favor of the neurophysiological account Erneling and Johnson bring together contributions that focus especially on different versions of the cultural account of the mind **The Broadview Introduction to**

False Moves in Philosophy and Social Theory Patrick Murray, Jeanne Schuler, 2023-09-12 This book considers diverse philosophical topics unified by the identification of false moves commonly found in modern philosophy mainstream Anglo American philosophy and social theory The authors expose the sources of fundamental problems that recur in philosophy basic problems with what the authors call factoring philosophy Factoring philosophy fails to attend to the phenomenological task of determining when what is distinguishable is separable and when not Consequently factoring philosophy makes phenomenological mistakes false moves when it treats as separable what is only distinguishable Analytic philosophy is prone to false moves when it fails to recognize that phenomenology is the necessary complement to analysis There is nothing wrong with analysis we might as well give up thinking as give up analysis and nothing is wrong with the values prized by analytic philosophy As Hegel observed philosophizing requires above all that each thought should be grasped in its full precision and that nothing should remain vague and indeterminate Ultimately this book contends that false moves prevail in philosophical analysis and social theory when they neglect their phenomenological foundations **Why Does the World Exist?** Jim
