Pursell,1994 Technology has been called the art of the twentieth century It is the expression of everything that makes us human Our myths and rituals our fantasies and creativity all find expression in our technology The ability to forge tools by the fashioning of metal in its white heat state was preceded by the creation of tools in stone This was the first indication of humanity s capacity to shape and use the raw materials available to it It reached its peak in the industrial revolution of the nineteenth century and today its momentum can be seen in every part of our lives It is this combination of technological creativity and human passion which Carroll Pursell pursues in White Heat Professor Pursell explores technology not as a succession of gadgets and gizmos but as a study of how society s values are embedded in them Written to accompany a major television series and illustrated with some surprising and fascinating photographs his book reveals a new layer of meaning to the devices tools and machines which have been developed throughout human history **Simplicity Marketing** Steven M. Cristol,Peter Sealey,2001-03-11 For more than

half a century marketers have bombarded customers with more and more choices in products and services What is the result Unprecedented anxiety Our mental circuit breakers are on overload In fact pioneering brand strategists Steven M Cristol and Peter Sealey assert that we have reached our manageable threshold for making decisions and a watershed in product proliferation In this pathbreaking book the authors argue with compelling evidence that the next generation of marketing

successes will belong to those brands that simplify customers lives or businesses in ways that are inextricably tied to brand and product positioning They contend that if a brand is not reducing customer stress it is creating it and it is vulnerable to losing market share to more customer empathetic competitors Writing especially for product or brand managers who are struggling to simplify their portfolios Cristol and Sealey have created a breakthrough framework that is itself a lesson in simplicity After presenting two essential guideposts for managers to assess where their brand sits on the stress spectrum the authors turn to the heart of Simplicity Marketing the 4 R s of simplification Replace Repackage Reposition and Replenish Using scores of real world company examples Cristol and Sealey show how each of the 4 R s interacts with the others in powerful ways to relieve customer stress and how these strategies may be executed individually or in combination to build brand loyalty Here for the first time are ten specific strategies to relieve customer stress through consolidating aggregating or integrating products and services repositioning brands for more relevance to stress reduction and decluttering customers decision making requirements The final pages of this brilliant manifesto for a simplicity revolution provide a guide to managing simplicity strategies leveraging information technology to simplify rather than complicate customers lives and integrating all the tools in the book into an executional blueprint *Books on Education in the Libraries of Columbia University* Columbia University.
