## Judicial Branch

### WHERE DO THEY MEET TO WORK?

The Judicial Branch is made up of the courts. The Supreme Court is the highest court in the country. The courts decide what the meaning of the law is and whether or not the laws break the Constitution. It has nine Justices, that are chosen by the President.

### Where do they meet to work?

## Why?

The founding fathers wrote the Constitution. This was to form a government that did not allow one person to have too much power. They decided to separate the power into three branches. Each branch has different jobs that help the country run smoothly. The branches are legislative, executive, and judicial.

## How does it work?

## Executive Branch

### PRESIDENT

The President is the head of the executive branch. The President can sign or veto a law passed and appoint or remove judges. When the President needs advice he has a group of people called the Cabinet. The Vice President is in the Cabinet.

### Where do they meet to work?

## Legislative Branch

### CONGRESS

The US Congress is made up of the House of Representatives and the Senate. It is responsible for writing, passing, and funding laws.

### SENATE

There are 100 Senators in the Senate. There are two Senators from each of the 50 states. They serve a term of 6 years.

### HOUSE OF REPRESENTATIVES

There are 435 Representatives in the House. There are 100 Representatives from each of the 50 states. This is based on the number of people in each state. They serve a term of 2 years.

**The World and Us** Roberto Mangabeira Unger, 2024-02-27 A restless visionary striving to realize the highest aspirations of modernity itself New York Times A radical re envisioning of the human condition by the acclaimed Brazilian philosopher In The World and Us Roberto Mangabeira Unger sets out to reinvent philosophy His central theme is our transcendence everything in our existence points beyond itself and its relation to our finitude everything that surrounds us and we ourselves are flawed and ephemeral He asks how we can live so that we die only once instead of dying many small deaths how we can breathe new life and new meaning into the revolutionary movement that has aroused humanity for the last three centuries but that is now weakened and disoriented and how we can make sense of ourselves without claiming for human beings a miraculous exception to the general regime of nature For Unger philosophy must be the mind on fire insisting on our prerogative to speak to what matters most From this perspective he redefines each of the traditional parts of philosophy from ontology and epistemology to ethics and politics He turns moral philosophy into an exploration of the contest between the two most powerful contemporary moral visions an ethic of self fashioning and non conformity and an ethic of human connection and responsibility And he turns political philosophy into a program of deep freedom showing how to democratize the market economy energize democratic politics and give the individual worker and citizen the means to flourish amid permanent innovation

Subcommittee on Census and Population, 1980      Education for Liberal Democracy Walter C. Parker, 2023 Our democracy is in crisis Both political trust and a shared standard of truth are broken In this book Walter Parker shows why and how a civic education can help Offering a centrist approach suitable for a polarized society Parker focuses on two linked curriculum objectives disciplinary knowledge and voice He illustrates how classroom discussion alongside concept formation and deep reading expand students minds while developing their ability to speak with others and form opinions When children come to school they emerge from the private chrysalis of babyhood and kin to interact with a diverse student body along with teachers curriculum instruction and the school s unique mission education Parker argues that these assets make school the ideal place to teach young people the liberal arts of studying and discussing public issues and academic controversies both in and beyond school The chapters in this collection spanning 20 years and coming from one of civic education s most influential scholars show that voice can be taught right alongside disciplinary knowledge Drawing students into dialogue with one another on the curriculum s central questions is a teacher s most ambitious goal and when it happens teaching s greatest accomplishment Book Features Argues that the proper aim of civic education in schools is to shore up liberal democracy Shows how discussion can be a main course and not a side dish of classroom instruction Demonstrates how to use discussion to develop voice defined as the freedom to make and express uncoerced decisions and disciplinary knowledge defined as the knowledge that results from a public process of error seeking contestation and validation Explains why students need to learn both disciplinary knowledge and voice if they are to take their place on the public stage and hold the office of citizen in a democracy Treats subject centered and student centered instruction as partners not opponents      **Completion Report[s] and Schedule[s] ... Beschel Jr., Changyong Choi, 2016-06-28 This volume a collaborative work between the World Bank s Global Governance Practice and a team of researchers working with the Korean Development Institute is dedicated to the proposition that there is much that can be learned from a careful and nuanced assessment of Korea s experience with e governance It seeks to draw lessons both from the large reservoir of experience as to what has worked as well as the more limited and isolated examples of what has not In particular it seeks to achieve two objectives The first is to accurately understand capture and distill the key dimensions of Korea s e governance experience so that it can be properly understood and appreciated Towards this end some of the world s leading experts on Korea s e governance experience have been engaged in its preparation and their conclusions have been carefully vetted and reviewed by other leading scholars of the role of IT systems within government The goal is to avoid flip generalizations or characterizations such as political will is important or it is important to embed e governance within a broader strategy to develop a domestic IT industry but to truly understand the complex interplay

between differing political economic and bureaucratic interests and how they shaped decisions about developing the technological and human infrastructure that would support Korea's successful thrust to be the world's leading nation in this area. The second is to ponder the lessons learned and what did and did not work from Korea's experience for other developing countries seeking to strengthen the role of information technology within their public sectors. *The Government's Wartime Research and Development, 1940-44* United States.
