Esser, H. Hefele, I. Heinrich, W. Hofmann, D. Krahn, V. R. Matas, L. D. Schmadel, G. Zech, 2013-11-11 *Astronomy and Astrophysics Abstracts* aims to present a comprehensive documentation of the literature concerning all aspects of astronomy astrophysics and their border fields It is devoted to the recording summarizing and indexing of the relevant publications throughout the world *Astronomy and Astrophysics Abstracts* is prepared by a special department of the Astronomisches Rechen Institut under the auspices of the International Astronomical Union Volume 44 records literature published in 1987 and received before February 15 1988 Some older documents which we received late and which are not surveyed in earlier volumes are included too We acknowledge with thanks contributions of our colleagues all over the world We also express our gratitude to all organizations observatories and publishers which provide us with complimentary copies of their publications Dr Siegfried B hme retired from his duties as co editor of *Astronomy and Astrophysics Abstracts* on December 31 1987 Since 1950 he participated in the bibliographic work of the institute He served as a reviewer for the *Astronomischer Jahresbericht* and became one of the editors of *Astronomy and Astrophysics Abstracts* in 1969 After his retirement in 1975 he took care of particularly the Russian literature on a voluntary basis for 12 years It is a pleasure to thank Siegfried B hme for his valuable contributions Starting with Volume 33 all the recording correction and data processing work was done by means of computers The recording was done by our technical staff members Ms Helga Ballmann Ms Christiane Jehn Ms Monika Kohl Ms Black Hole Marcia Bartusiak, 2015-04-28 The award winning science writer packs a lot of learning into a deceptively light and enjoyable read exploring the contentious history of the black hole *New Scientist* For more than half a century physicists and astronomers engaged in heated dispute over the possibility of black holes in the universe The strange notion of a space time abyss from which not even light escapes seemed to confound all logic Now Marcia Bartusiak author of *Einstein's Unfinished Symphony* and *The Day We Found the Universe* recounts the frustrating exhilarating and at times humorous battles over one of history's most dazzling ideas Bartusiak shows how the black hole helped revive Einstein's greatest achievement the general theory of relativity after decades of languishing in obscurity Not until astronomers discovered such surprising new phenomena as neutron stars and black holes did the once sedate universe transform into an Einsteinian cosmos filled with sources of titanic energy that can be understood only in the light of relativity *Black Hole* explains how Albert Einstein Stephen Hawking and other leading thinkers completely changed the way we see the universe *Transactions and Proceedings of the Royal Society of Victoria During the Years ...* Royal Society of Victoria (Melbourne, Vic.), 1887 **Canadian Journal of Physics** ,2012
