Relational Treatment of Trauma Toni Heineman, 2015-07-24

Relational Treatment of Trauma Stories of loss and hope is the culmination of over 35 years of psychotherapy with children and adults many of whom have suffered the effects of physical emotional or sexual abuse It addresses a gap in the literature on the treatment of trauma and chronic loss that are ubiquitous parts of life in foster care While trauma informed care has received considerable attention recently there is little that focuses on the consequences of repeated unexpected and unexplained or unexplainable losses of caregivers

Relational Treatment of Trauma explores the ways in which those experiences arise in the therapeutic relationship and shows how to help clients build the trust necessary for establishing healthier and more satisfying and hopeful relationships Toni Heineman introduces and reinforces the concept of the relationship as the most powerful agent of therapeutic change She highlights the ways in which clinicians can build and sustain a relationship with clients whose experience of trauma can make them wary of trusting illustrating this theme throughout the book with compelling case vignettes The book is especially valuable for psychoanalysts clinical psychologists psychiatrists social workers and family therapists working with those who have suffered traumatic loss It is essential reading for clinicians in the early part of their career working with traumatized

individuals for the first time Dr Heineman has practiced in San Francisco for over 35 years working with children adults and families She is the founder and executive director of A Home Within Dr Heineman presents and publishes widely

Interrupting Cycles of Early Loss, Trauma and Abuse Toni Heineman, 2015-12-22 This volume offers rich and detailed illustrations of the complex emotional needs of the children and parents in vulnerable families The chapters also highlight the psychological toll that working with at risk groups takes on therapists and others charged with providing care for children and families whose internal worlds are often fragile and external worlds are often dangerous and chaotic Above all the contributions whether taken together or individually make it abundantly clear that short term solutions are simply not possible for adults or children who have been traumatized many times over They also underscore the need for those working with traumatized groups to protect themselves from psychological exhaustion in order to maintain the emotional vitality that is necessary for effective work This book was originally published as a special issue of the Journal of Infant Child and Adolescent Psychotherapy

Evidence-Based Practices for Children Exposed to Violence Clare Anderson, 2011-08 This report summarizes findings from federal reviews of research studies and program evaluations to help communities improve outcomes for children exposed to violence It cites evidence based practices that practitioners and policymakers can use to implement prevention services and activities for these children In each case programs and practices that are reviewed are supported by multiple research studies or program evaluations Charts and tables This is a print on demand edition of an important hard to find report
