Handbook for Classical Research David Schaps,2010-09-13 The Handbook for Classical Research offers guidance to students needing to learn more about the different fields and subfields of classical research and its methods and resources

Critical Theory and the Classical World Martyn Hudson,2018-07-17 This book radically re examines Europe s imaginaries of its origin in the ancient Greek world Extracting central concepts of critical theory in its widest sense beyond the Frankfurt School like the human force spirit and domination it allies them to characters mythologies and motifs in ancient thought Just as the stories of Achilles Helen and Odysseus have become central to our modes of self understanding so we can also examine the roots and routes of the concepts of social theory out of the ancient earth and its myths An important book for scholars and students of critical theory social theory aesthetic theory and the history of the human sciences it alerts us to the catastrophe that we are facing in the 21st century a catastrophe of domination and ecological collapse that has its origins in the ancient world and the ways in which it began to define a certain sense of humanness Considering the artistic production of the ancient world in relation to the thought of Adorno Critical Theory and the Classical World argues that it is only by understanding the persistence of the haunted motifs of the past into the present that we can begin to re forge our critical theory of society and re found our social formations on a new basis *Catalogue of Books Concerning the Greek and Latin Classics in the Central Public Libraries, Newcastle-upon-Tyne* Newcastle upon Tyne (England). Troja: results of the latest researches on the site of Homer's Troy [&c.]. Johann Ludwig Heinrich Schliemann,1884 *Classified Catalogue of the Carnegie Library of Pittsburgh, 1895- 1902: Fine Arts. Literature. Fiction. History and travel, part I* Carnegie Library of Pittsburgh,1907 *The Oxford History of Classical Reception in English Literature* David Hopkins,Charles Martindale,Norman Vance,Rita Copeland,Patrick Cheney,Jennifer Wallace,Philip R. Hardie,2012 The Oxford History of Classical Reception OHCREL is designed to offer a comprehensive investigation of the numerous and diverse ways in which literary texts of the classical world have stimulated responses and refashioning by English writers Covering the full range of English literature from the early Middle Ages to the present day OHCREL both synthesizes existing scholarship and presents cutting edge new research employing an international team of expert contributors for each of the five volumes OHCREL endeavours to interrogate rather than inertly reiterate conventional assumptions about literary periods the processes of canon formation and the relations between literary and non literary discourse It conceives of reception as a complex process of dialogic exchange and rather than offering large cultural generalizations it engages in close critical analysis of literary texts It explores in detail the ways in which English writers engagement with classical literature casts as much light on the classical originals as it does on the English writers own cultural context This fourth volume and second to appear in the series covers the years 1790 1880 and explores romantic and Victorian receptions of the classics Noting the

changing fortunes of particular classical authors and the influence of developments in archaeology aesthetics and education it traces the interplay between classical and nineteenth century perceptions of gender class religion and the politics of republic and empire in chapters engaging with many of the major writers of this period

It's Not What You Say...It's What You Do Laurence Haughton,1907 An indispensable management guide to making sure that the long term strategies and day to day goals a company sets are successfully executed written by the coauthor of the national bestseller It s Not the Big That Eat the Small It s the Fast That Eat the Slow Good managers at every level recognize the importance of strategic planning and setting concrete goals for their employees But even the best among them often fail to implement and support the crucial processes that turn well laid plans into visible successes Studies show that over the last fifty years a whopping 83 percent of corporate slowdowns were attributable not to outside economic forces but to the lack of vigilant follow through within the company itself

IT S NOT WHAT YOU SAY IT S WHAT YOU DO Laurence Haughton identifies the missteps that allow initiatives to fall through the cracks and explains how to close the gap between what a company sets out to do and what actually happens Drawing on interviews with top level executives from such companies as IKEA the Wall Street Journal Charles Schwab Time Warner Watson Wyatt Pella Corp and scores of others both large and small he presents the essential strategies for ensuring the success of innovations and change including Get more buy in from employees on new initiatives Balance control with coordination to make your team more effective Make sure that expectations are crystal clear Maintain a sense of urgency and momentum on a daily basis Filled with real life examples of how effective follow through stems the waste of resources improves productivity and prevents costly mistakes

IT S NOT WHAT YOU SAY IT S WHAT YOU DO gives managers up and down the corporation or company the tools they need to eliminate failure resulting from lack of follow through and achieve their goals

Valuing Landscape in Classical Antiquity ,2016-05-18 Where am I Our physical orientation in place is one of the defining characteristics of our embodied existence However while there is no human life culture or action without a specific location functioning as its setting people go much further than this bare fact in attributing meaning and value to their physical environment Landscape denotes this

symbolic conception and use of terrain It is a creation of human culture In Valuing Landscape we explore different ways in which physical environments impacted on the cultural imagination of Greco Roman Antiquity In seventeen chapters with different disciplinary perspectives we demonstrate the values attached to mountains the underworld sacred landscapes and battlefields and the evaluations of locale connected with migration exile and travel

Archaeological Practice as Politics and Ethics John Carman, 2024-08-29 This book is of relevance to all archaeologists and all others concerned with how an interest in the past impacts on the present This book explores the manner in which archaeology as a discipline and a field of endeavour contributes to the modern world The focus throughout the book is on practices the range of different things that archaeologists do and how they do and have done it in order to explore the field as a distinctive aspect of social practice over time It also concerns the structures social political economic professional philosophical in which archaeology is performed and the consequences for the discipline and its practitioners Throughout there is a concern especially with archaeology as a field of political and ethical decision making aspects well recognised by practitioners but rarely emphasised The book both asks and answers questions about the perception of archaeology from both within and outside the field The book draws widely on previous work by the author and others looking at the techniques of the field the people involved the political and social impacts both on and by the field In doing so it seeks to bring these different perspectives together to create a more holistic idea of what archaeology is has been and could be The book is offered to those outside the field as a justification for archaeology a field coming under increasing pressure from those who consider it as so many humanities and social science disciplines as an expensive luxury
