**Varanoid Lizards of the World** Erick Pianka, Dennis King, Ruth Allen King, 2004-09-21 Monitor lizards genus *Varanus* have attracted a great deal of interest these large and impressive lizards are often the centerpiece of reptile house exhibits Monitors tend to be fairly wary and difficult to observe therefore they are not particularly tractable research subjects but they have nevertheless received an extraordinary amount of attention from devoted students *Varanoid Lizards of the World* is a comprehensive account of virtually everything important that is known about monitor lizards beginning with detailed species accounts and proceeding to various modern comparative analyses Where possible people who have had detailed field experience with a particular species have assembled species accounts In the process of reporting what is known we also identify what remains to be learned about these lizards We hope to establish a prototype showing how such a diverse monophyletic group can be exploited both to identify and to understand the actual course of evolution As such this effort becomes a protocol for future workers to follow for other groups of closely related species [Australian Lizards](#) Stephen K. Wilson, 2012 The extraordinary lives of lizards remain largely hidden from human eyes Lizards feed mate lay eggs or give live birth and carefully manage their temperatures They struggle to survive in a complex world of predators and competitors The nearly 700 named Australian species are divided into seven families the dragons monitors skinks flap footed lizards and three families of geckos Using a vast array of artful strategies lizards have managed to find a home in virtually all terrestrial habitats *Australian Lizards A Natural History* takes the reader on a journey through the remarkable life of lizards It explores the places in which they live and what they eat shows how they make use of their senses and how they control their temperatures how they reproduce and how they defend themselves Lavishly illustrated with more than 400 color photographs this book reveals behavioral aspects never before published offering a fascinating glimpse into the unseen lives of these reptiles It will appeal to a diverse readership from those with a general interest in natural history to the seasoned herpetologist **The Action Plan for Australian Lizards and Snakes 2017** Nicola Mitchell, Neil Cox, Philip Bowles, Reid Tingley, Stewart Macdonald, Glenn Shea, J Scott Keogh, John Woinarski, David Chapple, 2019-12-01 Lizards and snakes squamate reptiles are the most diverse vertebrate group in Australia with approximately 1000 described species representing about 10% of the global squamate diversity Squamates are a vital part of the Australian ecosystem but their conservation has been hindered by a lack of knowledge of their diversity distribution biology and key threats *The Action Plan for Australian Lizards and Snakes 2017* provides the first comprehensive assessment of the conservation status of Australian squamates in 25 years Conservation assessments are provided for 986 species of Australian lizards and snakes including sea snakes Over the past 25 years there has been a substantial increase in the number of species and families recognised within Australia There has also been an increase in the range and magnitude of threatening processes with the potential to impact squamates This has resulted in an increase in the proportion of the Australian squamate fauna that is considered Threatened

Notably over this period the first known extinction post European settlement of an Australian reptile species occurred an indication of the increasingly urgent need for better knowledge and management of this fauna Six key recommendations are presented to improve the conservation management and plight of Australian squamates This Action Plan represents an essential resource for research scientists conservation biologists conservation managers environmental consultants policy makers from Commonwealth and State Territory governments and the herpetological community
