Wage-labour and Capital Karl Marx,1935 *Wage Labour and Capital and Value, Price, and Profit* Karl Marx,2020-09-20
Karl Marx is one of the most influential social theorists and political philosophers of the 19th century His hugely significant works *The Communist Manifesto* and *Das Kapital* fundamentally changed the way the world viewed economy and politics His groundbreaking theory that much of a society s conflict is based on an economic imbalance between the wealthy ruling class the bourgeoisie who control the means of production and the working class or the proletariat who are forced to sell their labor in return for wages helped spur the development of socialist and communist political systems This edition contains two of his more important essays First written in 1847 *Wage Labour and Capital* is the foundation for the economic theories that were later developed in *Das Kapital* *Value Price and Profit* was first given as a speech by Marx in 1865 and expands on his ideas regarding the relationship between wages and profit Marx argues that workers are responsible for creating the value that leads to profit and they are entitled to share in it through increased wages Marx s theories remain widely studied for their relevance and insight into the problems and inequalities that continue to exist in modern economic systems This edition is printed on premium acid free paper **Wage Labor and Capital/Value, Price and Profit** Karl Marx,2024-05-23

Wage labour in modern society Andreas N. Lytras, 2016-02-23 This elaboration is a political analysis within sociological theory The study has as subject the main propositions of a theoretical framework on the current structure of employment and on the question of the abolition of the dependent and therefore wage labour I note that the latter does not have as a precondition the overcoming of capitalism The analysis in the form of an intellectual test examines the methods and the thoroughness of enforcing the new situation of a single work status within the economic activity This type of labour has morphological similarities to self employment or otherwise to the own account workers The basic starting point of the study is the finding that many enterprises worldwide have already and in many of the aspects of production and business organization overcome the functions and the classical forms of utilization of wage labour The creation of working groups the work from a distance the instances of self management along with the extensive use of part time workers or workers in various flexible work statuses the cooperation with independent professionals through outsourcing communicates with the changes in the old type of enterprise s management However wage labour is retained as an obsession The economic need for such maintenance beyond the habit can hardly be explained The only remaining reason might be the need for entrepreneurs to command directly large groups of people while their economic interests pushing in other directions The survey at a glance examines the following issues i Major theoretical approaches and debates on the characteristics of capitalist society and the consolidation of wage labour ii The evolution of the division of labour and the industrial changes during nineteenth and twentieth century iii The realities of employment through empirical data in six groups of countries worldwide iv The evidences of the real overcoming of wage labour through the mainstreaming strategies of the contemporary enterprises despite the maintaining of the typical form of wage dependency v The elaboration on the transformation of the model of employment under the process for the imposition of autonomous labour and the abolition of wage status through the political and finally the legal interference in the modern state vi The consideration on the pattern of the social structure which could

be formed during the evolution and after the end of the previous project and vii The importance of the procedure to the social and political system In the final analysis there is an important suggestion The autonomous worker would be in equilibrium with the status of citizen A wage labourer has never had a similar balance Especially when he was under the authority of an employer during the hours of work he was not exactly a citizen We owe the restoration of social and political equilibrium because of the faith in our civilization Freedom work autonomy and democracy are the only limitations **Wage Labour and Capital** Karl Marx, 2020
