Jawer,2009-05-21 A cutting edge

examination of feelings not thoughts as the gateway to understanding consciousness
Contends that emotion is the greatest influence on personality development
Offers a new perspective on immunity stress and psychosomatic conditions
Explains how emotion is key to understanding out of body experience apparitions and other anomalous perceptions
Contemporary science holds that the brain rules the body and generates all our feelings and perceptions
Michael Jawer and Dr Marc Micozzi disagree They contend that it is our feelings that underlie our conscious selves and determine what we think and how we conduct our lives
The less consciousness we have of our emotional being the more physical disturbances we are likely to have from ailments such as migraines fibromyalgia chronic fatigue and post traumatic stress to anomalous perceptions such as apparitions and involuntary out of body experiences
Using the latest scientific research on immunity sensation stress cognition and emotional expression the authors demonstrate that the way we process our feelings provides a key to who is most likely to experience these phenomena and why
They explain that emotion is a portal into the world of extraordinary perception and they provide the studies that validate the science behind telepathic dreams poltergeists and ESP
The Spiritual Anatomy of Emotion challenges the prevailing belief that the brain must necessarily rule the body
Far from being by products of neurochemistry the authors show that emotions are the key vehicle by which we can understand ourselves and our interactions with the world around us as well as our most intriguing and perennially baffling experiences

Widen the Window Elizabeth A. Stanley, PhD, 2019-09-24
I don't think I've ever read a book that paints such a complex and accurate landscape of what it is like to live with the legacy of trauma as this book does while offering a comprehensive approach to healing from the foreword by Bessel

van der Kolk A pioneering researcher gives us a new understanding of stress and trauma as well as the tools to heal and thrive Stress is our internal response to an experience that our brain perceives as threatening or challenging Trauma is our response to an experience in which we feel powerless or lacking agency Until now researchers have treated these conditions as different but they actually lie along a continuum Dr Elizabeth Stanley explains the significance of this continuum how it affects our resilience in the face of challenge and why an event that is stressful for one person can be traumatizing for another This groundbreaking book examines the cultural norms that impede resilience in America especially our collective tendency to disconnect stress from its potentially extreme consequences and override our need to recover It explains the science of how to direct our attention to perform under stress and recover from trauma With training we can access agency even in extreme stress environments In fact any maladaptive behavior or response conditioned through stress or trauma can with intentionality and understanding be reconditioned and healed The key is to use strategies that access not just the thinking brain but also the survival brain By directing our attention in particular ways we can widen the window within which our thinking brain and survival brain work together cooperatively When we use awareness to regulate our biology this way we can access our best uniquely human qualities our compassion courage curiosity creativity and connection with others By building our resilience we can train ourselves to make wise decisions and access choice even during times of incredible stress uncertainty and change With stories from men and women Dr Stanley has trained in settings as varied as military bases healthcare facilities and Capitol Hill as well as her own striking experiences with stress and trauma she gives readers hands on strategies they can use themselves whether they want to perform under pressure or heal from traumatic experience while at the same time pointing our understanding in a new direction The Body in Psychotherapy Don Hanlon

Johnson, Ian J. Grand, 1998-05-01 The Body in Psychotherapy explores the life of the body as a basis of psychological understanding Its chapters describe the use of movement awareness exercises and bodily imagination in work with various populations and life situations It chronicles somatic work with childhood trauma political torture and life transitions such as aging the loss of parents and the emergence of a sense of self The Body in Psychotherapy is the third in a groundbreaking series that provides a theoretical and practical context for the emerging field of Somatics The first and second book of the series are Bone Breath and Gesture and Groundworks *The Trauma Heart* Judy Crane, 2017-06-27 The majority of people addicted to substances or process addictions such as relationship disorders eating disorders self harming behaviors gambling or pornography are trauma survivors Many people caught in the web of addiction don't identify as trauma survivors until their personal familial intergenerational and in utero history is exposed Unfortunately relapse is inevitable without trauma resolution that can only take place once their history is exposed It is only when that happens that the behavior disorders will finally make sense For almost 30 years Judy Crane has worked with clients and families who are in great pain due to destructive and dangerous behaviors Families often believe that their loved one must be bad or defective and the one

struggling with the addiction not only believes it too but feels it to their core The truth is the whole family is embroiled in their own individual survival coping mechanisms the addicted member is often the red flag indicating that the whole family needs healing In *The Trauma Heart Crane* explores the many ways that life s events impact each member of the family She reveals the essence of trauma and addictions treatment through the stories art and assignments of former clients and the staff who worked with them offering a snapshot of their pain and healing
