Barry Brown

War In Human Civilization:

War in Human Civilization Azar Gat, 2008-03-26 Why do people go to war Is it rooted in human nature or is it a late cultural invention How does war relate to the other fundamental developments in the history of human civilization And what of war today is it a declining phenomenon or simply changing its shape In this truly global study of war and civilization Azar Gat sets out to find definitive answers to these questions in an attempt to unravel the riddle of war throughout human history from the early hunter gatherers right through to the unconventional terrorism of the twenty first century In the process the book generates an astonishing wealth of original and fascinating insights on all major aspects of humankind s remarkable journey through the ages engaging a wide range of disciplines from anthropology and evolutionary psychology to sociology and political science Written with remarkable verve and clarity and wholly free from jargon it will be of interest to anyone who has ever pondered the puzzle of war

The Causes of War and the Spread of Peace Azar Gat, 2017 The causes of war why people fight is one of the big questions of human existence Azar Gat s book ranging from the beginning of prehistory to the 21st century offers a definitive answer to the lingering mystery

The Logic of the Cold War Tian-jia Dong, 2018-08-24 The Cold War revealed for the first time in human history the logic of human togetherness which indicated that it was not only necessary for nation states to live together but also possible for them to do so The necessity was because of the inescapably shared vulnerability of mutually assured destruction not only in terms of security but more so in economic well being and political stability The possibility was due to the unipolar world structure sustained by the global governance web of interdependent partnership which worked powerfully between the power agents to ensure the best of all possible world This latent governance system was both hierarchical and dynamic because its power was connective in the sense that power was rooted in one another and the ability to be interdependent by empowering other power agents and sharing vulnerability at the same time was the way of becoming the nucleus on the global web of interdependent partners and hence gaining power in transforming one another connectively and governing the world collectively George Kennan s patience in building up hard and soft powers within individual power agents of the web and Wilson Roosevelt s institutionalization of collective power above each power agents contributed to the construction of the system The Soviet big brotherly governing type was proven a failure

War, Peace, and Human Nature Douglas P. Fry, 2015-02 The chapters in this book posit that humans clearly have the capacity to make war but since war is absent in some cultures it cannot be viewed as a human universal And counter to frequent presumption the actual archaeological record reveals the recent emergence of war It does not typify the ancestral type of human society the nomadic forager band and contrary to widespread assumptions there is little support for the idea that war is ancient or an evolved adaptation Views of human nature as inherently warlike stem not from the facts but from cultural views embedded in Western thinking Amazon com

War and Peace in the Western Political Imagination Roger Manning, 2016-03-10 This book is open access and available on www.bloomsburycollections

com It is funded by Knowledge Unlatched The study of war in all periods of prehistory and recorded history has always commanded the attention of historians dramatists poets and artists The study of peace has however not yet gained a comparable readership and the subject is attracting an increasing amount of scholarly research This volume presents the first work of academic research to tackle this imbalance head on It looks at war and peace through the ages from the Classical world through to the 18th century It considers the nature and advocacy of war and peace both from an historical perspective but also a philosophical one particularly looking at how universal peace which began as a personal philosophy became over the centuries a political philosophy that underpins much of modern society s attitudes towards warfare and militarism Roger Manning begins his journey through history by looking at the Greek martial ethos and philosophical concepts of peace and war in the ancient world moving through the Roman empire s military advances he explores the concepts of war and peace in the medieval world and the Renaissance with the writing of Machiavelli and Erasmus finally his account of the search for a science of peace in the 17th and 18th centuries brings the book to its conclusion **An**

Humanity Barry Brown,2017-01-17 [What Causes War?](#) Greg Cashman,2013-07-29 Now in a thoroughly revised and updated edition this classic text presents a comprehensive survey of the many alternative theories that attempt to explain the

causes of interstate war For each theory Greg Cashman examines the arguments and counterarguments considers the empirical evidence and counterevidence generated by social science research looks at historical applications of the theory and discusses the theory's implications for restraining international violence Among the questions he explores are Are humans aggressive by nature Do individual differences among leaders matter How might poor decision making procedures lead to war Why do leaders engage in seemingly risky and irrational policies that end in war Why do states with internal conflicts seem to become entangled in wars with their neighbors What roles do nationalism and ethnicity play in international conflict What kinds of countries are most likely to become involved in war Why have certain pairs of countries been particularly war prone over the centuries Can strong states deter war Can we find any patterns in the way that war breaks out How do balances of power or changes in balances of power make war more likely Do social scientists currently have an answer to the question of what causes war Cashman examines theories of war at the individual substate nation state dyadic and international systems level of analysis Written in a clear and accessible style this interdisciplinary text will be essential reading for all students of international relations
