Silicon Valley: Planet Startup Peter Ester, Arne Maas, 2025-10-01 For decades now Silicon Valley has been the home of the future. It is the birthplace of the world's most successful high tech companies including Apple, Yahoo, Google, Facebook, Twitter and many more. So what is the secret? What is it about Silicon Valley that fosters entrepreneurship and innovation? With Silicon Valley: Planet Startup Peter Ester and Arne Maas argue that the answer lies in Silicon Valley's culture: a corporate culture that values risk taking, creativity, invention and sharing. Through extensive interviews with Dutch entrepreneurs working in the area, Ester and Maas show that Silicon Valley is above all a mind set: a belief in thinking with passion and ambition far beyond the here and now. Scholars and business people and budding entrepreneurs alike are sure to find both inspiration and illumination in the stories and analyses Ester and Maas have assembled here.

This book gives the answer. *Accelerators in Silicon Valley* is a book for those who share a fascination for building the new startup economy.

The Triple Helix Henry Etzkowitz, Chunyan Zhou, 2017-09-25 The triple helix of university-industry-government interactions is a universal model for the development of the knowledge-based society through innovation and entrepreneurship. It draws from the innovative practice of Massachusetts Institute of Technology (MIT) with industry and government in inventing a regional renewal strategy in early 20th century New England. Parallel experiences were identified in Silicon Valley where Stanford University works together with industry and government. Triple helix is identified as the secret of such innovative regions. It may also be found in statist or laissez faire societies globally. The triple helix focuses on innovation and the dynamic to foster an innovation ecosystem through various hybrid organizations such as technology transfer offices, venture capital firms, incubators, accelerators and science parks. This second edition develops the practical and policy implications of the triple helix model with case studies exemplifying the meta-theory including how to make an innovative region through the triple helix approach, balancing development and sustainability by triple helix, twins, triple helix matrix to analyze regional innovation globally and case studies on the Stanford's StartX accelerator, the Ashland Oregon Theater Arts Clusters and Linyi regional innovation in China. The Triple Helix as a universal innovation model can assist students, researchers, managers, entrepreneurs and policymakers.
