Finding God Bill Glenn,2022-04-19 Ideas matter What you believe affects everything you do It influences how you think and talk what you value and want who you view as a role model where you spend your time how you treat others It determines who you become in life and where you live after death I was raised by a Christian mother and regularly attended worship services as a child I was baptized when I was 10 But during my secular college

experience I was confronted with ideas that challenged my religious beliefs. Some of my intelligent and educated professors said materialistic chance had displaced God as the creator of all things. My mom loved me and I didn't think she would intentionally lie to me but she had never even been to college. As much as I loved her, nobody wants to be duped. I wanted and needed to know the truth. So I spent some agonizing years weighing the evidence concerning God and Christianity until finally a number of simple but far-reaching revelations became obvious to me. I eventually arrived at the unwavering conclusion that those accomplished but misguided professors were simply wrong. And I came to recognize evolution as a pseudoscience long on bluster but short on facts. Finding God begins by giving you a solid foundation for belief in an amazing loving eternal God. And you don't have to take my word for it. Some of the world's greatest minds past and present provide strong support for that belief. Then it adds several firm principles to strengthen your faith. Whether you look far out into the cosmos or peer deep inside the cell, God is there. Read and believe. Concepts and Society (RLE Social Theory) Ian C. Jarvie, 2014-08-21. The main concern of Dr Jarvie's book is the relation of belief to action. He argues that people act in society because of beliefs because of the way they see things. There is the world of physical and social conditioning where fixed roles tropisms adaptations seem to operate there is the world of mind where action alternatively seems to originate but then there is Karl Popper's third world where dwell the objects of thought ideals theories beliefs values which directly affect how people act and thus affect the way the world is. Reform change improvement modification all proceed from the competitive interaction between our private beliefs about the world and their third world brothers. Jarvie contends that the struggle of privately held beliefs to realize themselves in the world through the actions of their believers is a fundamental force behind social change.
