Psychoanalysis and the Artistic Endeavor Lois Oppenheim, 2015-02-11 Psychoanalysis and the Artistic Endeavor offers an intriguing window onto the creative thinking of several well known and highly creative individuals Internationally renowned writers painters choreographers and others converse with the author about their work and how it has been informed by their life experience Creative process frames the discussions but the topics explored are wide ranging and the interrelation of the personal and professional development of these artists is what comes to the fore The conversations are unique in providing insight not only into the art at hand and into the perspective of each artist on his or her own work but into the mind from which the work springs The interviews are lively in a way critical writing by its very nature is not rendering the ideas all that much more accessible The transcription of the live interview reveals the kind of reflection censored elsewhere the interplay of personal experience and creative process that are far more self consciously shaped in a text written for print Neither private conversation nor public lecture neither crafted response as to the media nor freely associative discourse as in the analytic consulting room these interviews have elements of all The volume guides the reader toward a deeper psychologically oriented understanding of literary and visual art and it engages the reader in the honest and often provocative revelations of a number of fascinating artists who pay testimony to their work in a way no one else can This is a unique collection of particular interest for psychoanalysts scholars and anyone looking for a deeper understanding of the creative process

Fighting Fake News Jeffrey D. Wilhelm, Michael W. Smith, Hugh Kesson, Deborah Appleman, 2023-02-01 Critical thinking and online reading need to go hand in hand but they often don't Students click swipe and believe because they don't know how to do otherwise At times so do we And that's a problem Fighting Fake News combats this challenge by helping you model how to read myth bust truth test and respond in ways that lead to wisdom rather than reactivity No matter what content you teach the lessons showcased here provide engaging collaborative reading and discussion experiences so students can Notice how teacher and peers read digital content to be mindful of how various reading pathways influence perception Identify the author background the website sponsor and other evidence that help set a piece in context Stress test the facts by evaluating news sources reading laterally and other critical reading strategies Use Reader's Rules of Notice to learn to identify common rhetorical devices used to influence the reader Be aware of how for-profit social media platforms feed on our responses to narrow rather than widen our reading landscape We are still in the wild west era of the digital age scrambling to impart a safer ethical framework for evaluating information Thankfully it distills to one mission teach students and ourselves how to think critically and we will forever have the tools to fight fake news
