Carl, 2010 We live in a world of fast paced change that is being fueled by new technologies changing personal and social relationships and changing cultural values and economic conditions Sociology is a discipline that can help you understand this change Looking at their world through the sociological perspective enables students to better understand themselves and their place in an evolving and complex world Designed for today's students THINK SOCIOLOGY shows you how sociologists think and how to understand the rapidly changing world they live in *Crisis, Movement, Management: Globalising Dynamics* James Goodman, Jonathan Marshall, 2016-05-23 Globalised neo liberalism has produced multiple crises social ecological political In the past crises of global order have generated large scale social transformations and the current crises likewise hold a transformative promise Social movements become a crucial barometer in signalling both the demise and rise of political formations and programs Elite strategies framed as crisis management create their own disordering side effects Experiments in movement strategy gain greater significance as do contending elite efforts at repressing managing or displacing the fall out In this book we investigate both movements and management in the face of crisis taking crisis and unanticipated consequences as a normal state of play The book enquires into the winners and losers from crisis and investigates the movement management nexus as it unfolds in particular localities as well as in broader contexts The book deals with some of the most pressing conflicts of our time and produces a range of theoretical insights the ubiquity of crisis is seen as not only a hallmark of social life but a way into a different kind of social analysis This book was published as a special issue of Globalizations Design Thinking Research Hasso Plattner, Christoph Meinel, Larry Leifer, 2014-07-16 Design thinking as a user centric innovation method has become more and more widespread during the past years An increasing number of people and institutions have experienced its innovative power While at the same time the demand has grown for a deep evidence based understanding of the way design thinking functions This challenge is addressed by the Design Thinking Research Program between Stanford University Palo Alto USA and Hasso Plattner Institute Potsdam Germany Summarizing the outcomes of the 5th program year this book imparts the scientific findings gained by the

researchers through their investigations experiments and studies The method of design thinking works when applied with diligence and insight With this book and the underlying research projects we aim to understand the innovation process of design thinking and the people behind it The contributions ultimately center on the issue of building innovators The focus of the investigation is on what people are doing and thinking when engaged in creative design innovation and how their innovation work can be supported Therefore within three topic areas various frameworks methodologies mind sets systems and tools are explored and further developed The book begins with an assessment of crucial factors for innovators such as empathy and creativity the second part addresses the improvement of team collaboration and finally we turn to specific tools and approaches which ensure information transfer during the design process All in all the contributions shed light and show deeper insights how to support the work of design teams in order to systematically and successfully develop innovations and design progressive solutions for tomorrow

Thinking Through Sociality Vered Amit, 2015-02-01 As issues and circumstances investigated by anthropologists are becoming ever more diverse the need to address social affiliation in contemporary situations of mobility urbanity transnational connections individuation media and capital flows has never been greater Thinking Through Sociality combines a review of classical theories with recent theoretical innovations across a wide range of issues locales situations and domains In this book an international group of contributors train attention on the concepts of disjuncture field social space sociability organizations and network mid range concepts that are good to think with Neither too narrowly defined nor too sweeping these concepts can be used to think through a myriad of ethnographic situations

The Republican Brain Chris Mooney, 2012-03-27 Bestselling author Chris Mooney uses cutting edge research to explain the psychology behind why today's Republicans reject reality it's just part of who they are From climate change to evolution the rejection of mainstream science among Republicans is growing as is the denial of expert consensus on the economy American history foreign policy and much more Why won't Republicans accept things that most experts agree on Why are they constantly fighting against the facts Science writer Chris Mooney explores brain scans polls and psychology experiments to explain why conservatives today believe more wrong things appear more likely than Democrats to oppose new ideas and less likely to change their beliefs in the face of new facts and sometimes respond to compelling evidence by doubling down on their current beliefs Goes beyond the standard claims about ignorance or corporate malfeasance to discover the real scientific reasons why Republicans reject the widely accepted findings of mainstream science economics and history as well as many undeniable policy facts e.g. there were no death panels in the health care bill Explains that the political parties reflect personality traits and psychological needs with Republicans more wedded to certainty Democrats to novelty and this is the root of our divide over reality Written by the author of The Republican War on Science which was the first and still the most influential book to look at conservative rejection of scientific evidence But the rejection of science is just the beginning Certain to spark discussion and debate The Republican Brain also promises to add to the lengthy list of

persuasive scientific findings that Republicans reject and deny *Management and gender in higher education* Pat O'Connor, 2015-11-01 This book is a definitive examination of higher education locating it in a wider neo liberal context involving the state and the market with a specific focus on recent higher policy and on the elite group of senior managers in universities Written in a clear accessible style it provides an in depth analysis of university structures cultures and practices at senior management level Despite the managerialist rhetoric of accountability we see structures where access to power is through the Presidents blessing very much as in a medieval court We see a culture that is less than comfortable with the presence of women and which in its narratives stereotypes and interactions exemplifies to a rather nineteenth century view of women Sites and sources of change are also identified In a global context where diversity is crucial to innovation it challenges us to critically reflect on management and on higher education **Military Design Thinking** Aaron P. Jackson, 2024-09-30 This book examines the newly emergent field of military design thinking how it has been developed inside and outside of military doctrine and the paradigms that underlie its key thinkers and methodologies From the emergence of its initial methodologies in the late 1990s military design thinking s development rapidly accelerated in the mid 2000s in response to perceived failures of existing military doctrine and practice to adapt to the wars of the early 21st century To establish a foundation for exploring the significance of the challenge military design thinking presented to dominant approaches to warfare the early chapters in the book examine the ontology and epistemology of military doctrine which is defined as a written expression of a military s institutional belief system regarding how to wage war They also explain how attempts to incorporate military design thinking into doctrine ultimately led to its assimilation into this belief system requiring military design thinkers to continue to explore and develop the field outside of doctrine Since the mid 2010s non doctrinal military design methodologies have become increasingly prominent within several Western militaries including the US Canada UK Australia and several European militaries Later chapters offer an exploration of the paradigms underlying non doctrinal as well as doctrinal design methodologies This book highlights how the field has evolved shows how military design thinking differs from its civilian equivalents developed in fields such as commerce and business management and discusses how it may evolve in the near future This book will be of much interest to students of military studies security studies and international relations as well as to military professionals **Complexity Thinking in Translation Studies** Kobus Marais, Reine Meylaerts, 2018-10-26 This volume highlights a range of perspectives on the ways in which complexity thinking might be applied in translation studies focusing in particular on methods to achieve this The book introduces the topic with a brief overview of the history and conceptualization of complexity thinking The volume then frames complexity theory through a variety of lenses including translation and society interpreting studies and Bible translation to feature case studies in which complexity thinking has successfully been or might be applied within translation studies Using complexity thinking in translation studies as a jumping off point from which to consider the broader implications of implementing

quantitative approaches in qualitative research in the humanities this volume is key reading for graduate students and scholars in translation studies cultural studies semiotics and development studies **Discovering the Scientist Within** Gary W. Lewandowski, Jr., Natalie J. Ciarocco, David B Strohmetz, 2015-12-03 Discovering the Scientist Within offers an utterly unique approach to the research methods course Rather than taking students through statistical methods one at a time the authors provide a series of realistic and engaging case studies with each design focused chapter presenting a single study start to finish *The Writers Directory* ,2013 **Thinking Seriously about Youth Work, and how to Prepare People to Do it** Council of Europe, 2017 If we consider the 50 states having ratified the European Cultural Convention of the Council of Europe or the member states of the European Union the multiple and divergent nature of the realities theories concepts and strategies underlying the expression youth work becomes evident Across Europe youth work takes place in circumstances presenting enormous differences with regard to opportunities support structures recognition and realities and how it performs reflects the social cultural political and economic context and the value systems in which it is undertaken By analysing theories and concepts of youth work and by providing insight from various perspectives and geographical and professional backgrounds the authors hope to further contribute to finding common ground for and thus assure the quality of youth work in general Presenting its purified and essential concept is not the objective here The focus rather is on describing how to provide opportunities for all young people to shape their own futures as Peter Lauritzen described the fundamental mission of youth work The best way to do this remains an open question This Youth Knowledge book tries to find some answers and strives to communicate the strengths capacities and impact of youth work to those within the youth sector and those beyond to those familiar with its concepts and those new to this field all the while sharing practices and insights and encouraging further reflection *Environment & Planning* ,2012 *Journal of Gender Studies* ,2012 **Undergraduate and Graduate Courses and Programs** Iowa State University, 2009 **Catalogue of the Historical Library of Andrew Dickson White ...** Cornell University.
