Fiorino, 2018-06-22 Global climate change poses an unprecedented challenge for governments across the world Small wonder that many experts question whether democracies have the ability to cope with the causes and long term consequences of a changing climate Some even argue that authoritarian regimes are

better equipped to make the tough choices required to tackle the climate crisis In this incisive book Daniel Fiorino challenges the assumptions and evidence offered by sceptics of democracy and its capacity to handle climate change Democracies he explains typically enjoy higher levels of environmental performance and produce greater innovation in technology policy and climate governance than autocracies Rather than less democracy Fiorino calls for a more accountable and responsive politics that will provide democratically elected governments with the enhanced capacity for collective action on climate and other environmental issues
