Trireme Olympias The Final Report:

Trireme Olympias N. B. Rankov, 2012 This is the final publication of the Olympias project which saw the building of a 170 oared Athenian trireme of the fourth century BC and its operation in five series of sea trials The first three sea trials have already been published in separate volumes The rest of the volume is devoted to papers presenting more recent research on the trireme Provided by publisher *Ships of the Ancient Mediterranean* David Blackman, Boris Rankov, Kalliopi Baika, Henrik Gerding, Jari Pakkanen, 2013 This is the first detailed and comprehensive study of the shipsheds which were a defining symbol of naval power in the ancient Mediterranean **The Political Economy of Classical Athens** Barry O'Halloran, 2018-11-26 Recently there has been a welcome revival of scholarly interest in the economy of classical Greece In the face of increasingly compelling arguments for the existence of a market economy in classical Athens the Finleyan orthodoxy is finally relinquishing its long dominion In this book Barry O'Halloran seeks to contribute to this renewed debate by re-interrogating the ancient evidence using more recent economic interpretative frameworks The aim is to re-evaluate accepted orthodoxies and present the economic history of this emblematic city state in a new light More specifically it analyses the economic foundations of Athens through the prism of its navy Its macroeconomic approach utilises an employment demand model through which enormous naval defence expenditures created an exceptional period of demand led economic growth *Battle of Arginusae* Debra Hamel, 2015-06-25 An Athenian triumph against Sparta ended in disaster and infamy in this naval history of Ancient Greece in the 5th century BC Toward the end of the Peloponnesian War nearly three hundred Athenian and Spartan ships fought a pivotal skirmish in the Arginusae Islands Larger than any previous naval battle between warring Greeks the Battle of Arginusae was a crucial win for Athens Its aftermath however was a major disaster for its people Due to numerous factors the Athenian commanders abandoned the crews of twenty five disabled ships Thousands of soldiers were left clinging to wreckage and awaiting help that never came When the failure was discovered back home the eight generals in charge were deposed Two fled into exile while the other six were tried and executed In The Battle of Arginusae historian Debra Hamel describes the violent battle and its horrible aftermath Hamel introduces readers to Athens and Sparta the two thriving superpowers of the fifth century BC She provides a summary of the events that caused the long war and discusses the tactical intricacies of Greek naval warfare Recreating the claustrophobic unhygienic conditions in which the ships crews operated Hamel unfolds the process that turned this naval victory into one of the most infamous chapters in the city state's history *Autopsy in Athens* Margaret M. Miles, 2015-07-24 This is an exciting time to study in Athens The rescue excavations of recent years conducted during construction of the Metro system and in preparation for the 2004 Olympics Games combined with major restoration projects and a new enthusiasm for fresh examination of old material using new techniques and applications brings new perspectives and answers on many aspects of the ancient city of Athens and life politics and religion in Attica The 15 papers presented here contribute new findings that

result from intensive firsthand examinations of the archaeological and epigraphical evidence They illustrate how much may be gained by reexamining material from older excavations and from the methodological shift from documenting information to closer analysis and larger historical reflection They offer a variety of perspectives on a range of issues the ambiance of the ancient city for passersby filled with roadside shrines techniques of architectural construction and sculpting religious expression in Athens including cults of Asklepios and Serapis the precise procedures for Greek sacrifice how the borders of Attica were defined over time and details of its road system In presenting this volume the contributors are continuing in a long tradition of autopsy in the sense of personal observation in Athens that began even in the Hellenistic period and has continued through the writings of centuries of travelers and academics to the present day Sparta's Third Attic War Paul A. Rahe, 2024-11-19 When the great war pitting the Athenians against the Peloponnesians first erupted Pericles told his compatriots that if they kept up their navy focused on the conflict at hand and refrained from wasting their resources on ulterior objects they would win through and Thucydides believed him After Pericles death however to the historians dismay the Athenians pursued risky adventures tangential to their struggle with the Spartans and their allies and in Sicily thanks in large part to domestic strife they squandered not one but two great armadas Then in the aftermath of that catastrophe they found themselves bereft of triremes and short of manpower as a coalition formed against them including their Lacedaemonians rivals their longtime allies in the Aegean and the Great King of Achaemenid Persia In Sparta's Third Attic War Paul Rahe examines the armed conflict that followed attending to the impact on its outcome of the internal struggles that took place at Athens at Sparta and at the court of the Great King describing the maneuvers of the wily flexible seductive Athenian turncoat Alcibiades who dominated in turn the counsels of the Spartans the Persians and his fellow Athenians and charting the eventual emergence at Lacedaemon of a commanding figure of helot ancestry named Lysander who formed a close relationship with the younger son of the Great King and in battle outwitted the Athenians at every turn This is a story of grit determination and brilliance on both sides It examines the ambivalence of the Spartans it relates the folly that brought the Athenians down and it traces their ultimate defeat to defects in the policy and vision of Pericles *Syllecta Classica*, 2013 **Improvisation in the Arts of the Middle Ages and Renaissance** Timothy James McGee, 2003 One impression that stands out from this collection is the extent to which improvisation was an important factor in all of the arts As each of the authors assembles a case by ferreting out bits and pieces of information having to do with a single art the weight of the assembled material lends additional strength to each case By considering the overall picture that results as well as that made by each of the individual studies the reader is able to see much more clearly the role played by improvisation from the late Middle Ages through to the time of Shakespeare and beyond A careful reading of the essays brings with it the awareness that to ignore improvisation is to distort the art in a major way In light of the present volume the very concept of faithful historical re creation takes on a much broader and more complex character Historical Boat and Ship Replicas Maik-Jens

Springmann, Horst Wernicke, 2008 **Seafaring on the Ancient Mediterranean** A. F. Tilley, 2004 For the people of the ancient Mediterranean the sea was their highway the route for conquest and colonisation the means of spreading civilisation and the way to glorious booty or to profitable trade But ancient warships have left few if any remains Most of what we think we know about them comes from ancient literature and iconography of which there is a great deal The principal theme of this book is that the written and pictorial evidence on ancient ships has for the past five hundred years been treated badly even contemptuously This book takes a different approach searching for hypotheses that conform with the evidence contained in ancient literature and iconography before considering whether the writer or artist was right or wrong The result is a number of provocative and insightful reassessments of traditional interpretations of ancient seafaring *The Sea in Antiquity*

Graham John Oliver, 2000 This book gathers together papers on the place of the sea in the ancient world originally delivered at the Transpennine Research Seminar beginning in 1996 by international scholars in archaeology history classical studies and anthropology The wide range of topics covered includes histories of Mediterranean and Aegean islands with a focus on their relationship to the sea studies of ancient ship technology sailing and harbours and of the sea as a source of natural resources and a means of communication and transport analyses of ancient navies the politics of sea powers maritime trade and piracy and examinations of the symbolic and literary character of the sea in classical prose verse and ancient political and social thought **Phoenix**, 2001 **The Trireme Project** J. T.
