Value Creation through Executive Development Solomon Akrofi, 2018-12-07 The ability of organisations to generate long term value and growth depends to a very large extent on the capacity of the executive cohort to conceive and implement strategic initiatives through a well motivated and enabled workforce However generating consistent value in today s volatile uncertain complex and ambiguous VUCA and rapidly evolving digital economic landscape can be challenging and therefore executives need to update their capabilities regularly to align with the changing value drivers required for long term growth To achieve the expected value and growth at a more sustainable level executive development must be managed as a strategic asset and optimised through effective design and implementation and the effects must be proactively evaluated through meaningful leading indicators and actual hard measures Value Creation through Executive Development therefore offers a well supported and clearly structured approach to address the gap between executive development initiatives and the creation of

long term organisational value and growth This book provides a valuable resource to executives and management development professionals who have experienced frustration about the lack of non value adding executive development programmes It also serves as a professional resource for managers of executive and management development programmes organisational development departments and organisational development consultants allowing them to integrate this material into existing programmes to achieve value centric outcomes and to achieve long term performance targets Additionally it serves as a teaching resource for participants in executive management development courses or seminars globally offering them the capacity to conduct value centric initiatives and gain the capacity to influence the tactical operational and strategic dimensions of their organisational performance The Political Economy of State Intervention

Gavin Poynter, 2020-11-25 Both the exponents and critics of neoliberalism assert the dominance of market forces in western nations The Political Economy of State Intervention calls this into question Through a re examination of state intervention in the USA and Britain over the course of the long depression 1970 to date this book argues that the state has performed an increasingly significant role in conserving capital propping up an economic and social order that has lost its productive dynamism The specific forms of capital's dependency on the state may vary however the underlying weaknesses of mature western economies have prompted new forms of state intervention narrowly aimed at conserving capital especially in the wake of the financial crisis The chapters consider factors which are usually posited as explanations for the long depression such as oil price shocks domestic conditions and technological innovation The work argues that the consensus view of neoliberalism has served to underplay the significance of the state's role in failing to lift this long depression in several ways it has lent a greater ideological coherence to the policies pursued by successive governments than they deserve the state has been less subordinate to the market than is usually claimed and more often its maker and there has been a significant growth in jobs located in the private sector that are funded by public money The cumulative effect of this is a narrowing of the state's purpose to conserving capital a role which has contributed to its loss of authority as an institution that claims to represent society as a whole It is theorised that this in turn has led to the insecurities of the existing political order and the rise of populism This book will be of great interest to students and scholars of political economy public policy political theory economics and sociology **Patent Management** Oliver Gassmann, Martin A. Bader, Mark James Thompson, 2020-11-28
