Walter Gropius: Buildings, Plans, Projects 1906-1969 Walter Gropius, Ise Gropius, 1972 Circulated by the International Exhibitions Foundation 1972 1974 title page [Walter Gropius](#) Carsten Krohn, 2019-06-17 As founder of the Bauhaus school Walter Gropius 1883 1969 is one of the icons of 20th century architecture While his early buildings in Pomerania were still strongly marked by his teacher Peter Behrens after an expressionistic phase focused on handicraft he ultimately arrived at geometric abstraction During the entire period he collaborated with other architects founding the collective known as The Architects Collaborative in the US The comprehensive monograph documents all 74 of the known buildings by Gropius that were realized including many early works which he never publicized but it also critically examines his unbuilt projects The book is illustrated with new photographs by the author historical figures and with as new plans drawn by the author

Gropius and the Spirit of TAC Arnold Koerte, 2025-02-21 This study describes how Walter Gropius of former Bauhaus fame transformed himself from the image of the omnipotent Master Builder to the humble Gropius of later years Having come as an emigre from his native Germany to the US he had to cope with quite a different office culture based on teamwork Not the single genius but a collective approach to problem solving was the order of the day coupled with a conciliatory manner of debate among equals With that his legendary firm The Architects Collaborative called TAC for short in Boston was to become the star of the profession in the USA over the course of some 50 years Thanks to the combined talent and vigorous input of seven younger partners the firm succeeded in gaining large commissions at home and internationally The well designed school and campus buildings in New England found their equivalent in large university projects such as in Baghdad and Tunisia Internally the special aura at TAC was personified by a strong collective spirit of individuals in their own right In turn the office attracted a highly motivated staff of apprentices from all around the world Gropius's personal charm his humor and encouragement of young people got him life long affection Not the least his pledge for the role of women in the profession left its mark on a whole new generation of architects offices to follow The author was a member of this team from 1962 to 1964 and kept in touch with Gropius until his death in 1969 An eye witness account setting straight TAC's merits to Mid Century Modernism

[Walter Gropius in Britain](#) Alborz Dianat, 2025-03-31 As the first monograph dedicated to Walter Gropius's activity in Britain this book provides a comprehensive account of the Bauhaus founder's contributions to architecture and design while living in London between 1934 and 1937 Drawing on earlier and later decades this reveals the close contact between British German and American design circles with Gropius bridging parallel developments In its approach this book concentrates on the individuals working to aid Gropius in Britain and spurring the architect's enduring dominance in English language histories This includes his architectural partner Maxwell Fry his translator P Morton Shand his employer Jack Pritchard and many other prominent figures such as Frank Pick Herbert Read Elizabeth Denby and Henry Morris The vital role of Gropius's wife Ise is also highlighted particularly as her English

language capabilities far exceeded his By uncovering this wider network the collaborative nature of his success is demonstrated Such an approach reveals Gropius s contributions beyond buildings to various debates in the period These spanned subjects including standardisation prefabrication democratisation the planning of high rises the influence of commercialism and the reform of architectural education and practice Beyond design discourse the broader impact of nationalism is considered with the support Gropius received contrasted against the attacks Jewish migr s endured This book will appeal to those interested in the Bauhaus interwar Britain architectural media and emigration studies By applying revisionist approaches and highlighting the importance of discourse beyond built forms this book advances our knowledge of the period The transnational focus holds significance for architectural developments in Germany Britain and America following Gropius s trajectory While concentrated primarily on the interwar period the postwar impact of exchanges is revealed leading up until Gropius s death in 1969 **The Grove Encyclopedia of American Art** Joan M. Artists' Impressions in Architectural Design Bob Giddings,Margaret Horne,2003-09-02 *Artists Impressions in Architectural Design* analyses the ways in which architects have presented their designs for clients and the public both historically and contemporarily It spans a period from the fifteenth to the twenty first century Architects have become familiar with change The passage of time has brought with it new and revived styles of architecture as well as innovative tools and techniques for their representation The result is that while some methods show a view of the architect s concept for a building others offer an almost real experience of the intended architecture This book provides a rare and valuable study in which the exciting technological developments of today are placed in context with the rich heritage of the past It offers an

opportunity to learn how architects have chosen to represent their ideas The authors dare to glimpse into the future and hopefully offer some reassurance for tomorrow
